MICROLOG 90-03089 1 fiche

Review of various studies and observations concerning different kinds of councils and their characteristics. Not all relevant councils are included, particularly in the provincial area, and no recommendations are given. The report gives a history of the Canadian Environmental Advisory Council and describes external pressures for a reformed Council. The types of environmental councils (ministerial, independent, expanded ministerial) are described, along with the structure, relationships and functions of governmental councils and advisory bodies as set out by various studies. Additional processes and mechanisms for advising the minister and the public are then described, concluding with an overall assessment and conclusions. The role of the Council in 1981 and 1984 is given, along with data on the work performed from 1983/4 to 1987/8.

#### On the selectivity of gillnet for pomfret

by K. Shimazaki, S. Sasaki and S. Yamamoto. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 18 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5174) *Originally published in Japanese, at Hokkaido, Japan.* ISSN 0704-3716  
MICROLOG 90-00081 1 fiche

Pomfret is an important species as a constituent of an ecological system which migrates from the subtropical region to the subarctic region from spring to summer. Recently, this species has been noted as a promising resource yet to be developed. In order to clarify the distribution, biological composition, and the relative abundance of the fish, it is necessary to study whether or not the amount of catch and the value of the biological measurements obtained by gillnets can be used. This report gives the results of selectivity curves of mesh sizes for pomfret and the composite curves using samples obtained by experimental fishing done by the research vessel Hokusei Maru in the summer of 1980.

#### On the sensitivity to low pH of some selected freshwater crustaceans *Daphnia and Gammarus, Crustacea*

by J. Brehm and M.P.D. Meijering. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 15 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5213) *Originally published in German, by E. Schweizerbart'sche Verlagsbuchhandlung at Stuttgart, Federal Republic of Germany.* ISSN 0704-3716  
MICROLOG 90-02696 1 fiche

Measuring pH levels is a standard test in limnology, but in contrast to oxygen concentrations, salinities, or temperatures, pH levels are rarely discussed in detail for their capacity to limit ecophysiological factors and have a decisive influence on the distribution of aquatic organisms. According to the distribution pattern of time and locality in water bodies, *Gammarus pulex* should be less sensitive to acid than its sister species *Gammarus fossarum*. Of the species pair *Daphnia magna* and *Daphnia pulex*, the latter should be more acid-resistant. To clarify this matter, laboratory and field tests were carried out on the different acid sensitivities of these 4 crustacean species.

#### On the significance of lipids in Antarctic zooplankton

by W. Hagen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 150 p. : ill., maps. (Canadian translation of fisheries and aquatic sciences ; no. 5458) *Originally published in German, by Alfred-Wegener-Institut für Polar- und Meeresforschung at D-2850 Bremerhaven.* ISSN 0704-3716  
MICROLOG 90-00583 2 fiche

Description of the special significance of lipids for animals of the polar regions such as polar whales and seals. The paper begins with a review of various studies of lipids in polar plankton, then investigates the use of global qualitative and quantitative data on the lipids of zooplankton from the Antarctic Peninsula (spring, summer) and Weddell Sea (summer). Supplemented by biological data (developmental stage, sex, length, wet- and dry-weights, abundance, primary productivity) the findings can help in answering questions on ontogeny and seasonality. The study focused on copepods and Euphausiacea, which make up the major fraction of the Antarctic zooplankton biomass. Data is included on other lipids of various other zooplankton species, from different taxa and trophic levels, which are important components in the trophic chain of the South Polar Sea.

#### On winter food for whitefish or observations on the biology of whitefish caught by ice fishing

by T. Turunen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 7 p. (Canadian translation of fisheries and aquatic sciences ; no. 5454) *Originally published in Finnish.* ISSN 0704-3716  
MICROLOG 90-00608 1 fiche

This paper deals with the biology of whitefish ice-fished in Hoytinen, North Karelia, Finland, and their potential as a winter catch. Whitefish were caught in winter 1987, measured for length and weight, age determined using scale samples, growth determined by back-calculation, gill rakers removed, and stomachs collected for food analysis. The paper gives the results of the analysis and discusses the use of whitefish as winter catch.

**Ontario child health study : children at risk**

Toronto : Ministry of Community and Social Services, 1989. iv, 30 p. : ill. Bibliogr. French ed. (*Etude sur la santé des enfants...*) : 90-05342/1. ISBN 0-7729-6288-X  
MICROLOG 90-04999 1 fiche

The Ontario Child Health Study (OCHS) was a province-wide survey of the mental and physical health of a randomly selected sample of more than 3,000 Ontario children aged 4-16, carried out in 1983 as the first part of a longitudinal study. This summary highlights major findings on groups of children at risk for psychiatric disorder, perceived need of professional help for emotional or behavioural problems, and poor school performance. It looks at how well the risk indicators of family on social assistance, one parent in the home, and family living in subsidized housing can identify groups of children with increased rates of the 3 outcomes. Results are presented for the frequency and overlap of the risk indicators and of the outcomes; the strength of the association between the risk indicators and the outcomes, and the extent to which they vary as a function of the child's sex, age, and urban or rural area of residence; the extent to which family dysfunction and low income explain or account for the relationship between a risk indicator and an outcome; and the issues of attributable risk.

#### Ontario scrap tires inventory study : final report

R.J. Long Consulting Limited. Toronto : Ministry of the Environment ; Ministry of Energy, 1986. vii, 47 p. : ill., maps. *Bibliogr.* ISBN 0-7729-3554-8  
MICROLOG 90-01706 2 fiche

More than 10 million scrap passenger tire equivalents are generated annually in southern Ontario. This report describes scrap tire generation demographics and reviews current initiatives to reduce, reuse, recover and recycle this component of municipal solid waste. The southern Ontario study area consisted of 41 counties and regions, including 26 cities with populations greater than 50,000 persons. For this study, southern Ontario was subdivided into inventory units representing the 18 Ministry of the Environment administrative districts. A survey of more than 300 scrap tire generators was conducted which included agriculture, aviation, bus, construction, manufacturing, military, municipal, remoulding, retail sales, trucking and tire and casing dealer sectors. The report discusses such recycling and reuse as tire remoulding (retreading), blasting mats, rubber products, and tire grinding and reclaim.

#### Ontario's labour market : long term trends and issues in the 1990's

Toronto : Ministry of Skills Development, Labour Market and Research, 1990. xiv, 65 p. : ill. *French ed. (Le Marché du travail de l'Ontario...)* : 90-06780/2. CSI 55131.205. ISBN 0-7729-6946-9  
MICROLOG 90-06778 1 fiche

The purpose of this study is to analyze changes in the job mix of Ontario's economy and their implications for skills development. It reviews a number of trends in Ontario's economy that have affected demand in the labour market during the past 28 years. It also provides an analysis of how the mix of jobs in Ontario has evolved over time in response to these changes in the economy. It uses a projection to the year 2000 of trends in the demand for labour across occupations to offer a number of insights into future shifts in the occupational mix and their implications for the educational and training requirements of the work force. In addition, it presents a projection of labour supply growth and changes in the demographic characteristics of the work

force during the decade ahead, along with a review of sources of new labour force entrants with advanced levels of education and training. It concludes with a discussion of labour market issues that will become much more important in the 1990s.

#### Open learning and distance education in Canada

Ottawa : Dept. of the Secretary of State of Canada, Canadian Studies Directorate, 1990. 46, 51 p. (Canadian studies resource guide) *Bilingue (L'Enseignement ouvert...)*. ISBN 0-662-5721C-6  
MICROLOG 90-06860 2 fiche

There is a growing understanding and acceptance of open and distance learning approaches by practitioners within the educational community, as well as those working in the private sector. Yet many Canadians remain unaware of the learning opportunities afforded them through the effective application of instructional design and instructional technology. This guide to open learning and distance education in Canada has been prepared for readers who wish to develop an elementary understanding of the current state of open and distance learning in this country.

#### Operational testing of two thermal energy storage furnaces

by N.H. Milligan. Toronto : Ontario Hydro, Research Division, 1989. 12 p. (Report ;

no. 89-274-K)

MICROLOG 90-03522 1 fiche

Thermal energy storage is a practical method of shifting on-peak load to off-peak hours. One of the most convenient and largest loads available for shifting in the residential sector is space heating, where a diversified load of approximately 8 kW can be shifted to off-peak periods using such furnaces. This report presents the results of an evaluation of 2 thermal energy storage furnaces in the laboratory. One furnace used a low density crushed rock as the storage medium; the other used high density ceramic brick. The furnaces were tested to determine standby heat loss, operating efficiencies, and safety.

### Operational yields resulting from typical silvicultural treatments under FRDA

prepared for Ministry of Forests, Industry Development and Marketing Branch and Forestry Canada, Pacific and Yukon Region, Economic Analysis Section; by Stephen Smith. S.I. : Forest Resource Development Agreement, 1989. i, 72 p. Bibliogr. (FRDA report ; 099) *Contractor: Stephen Smith and Associates* ISSN 0835-0752 ISBN 0-662-17381-3  
MICROLOG 90-04419 1 fiche

Under the Forest Resources Development Agreement, investments are made which affect the quantity and quality of timber available for harvest in the future. This report provides estimates of the biological responses to different treatments (investments) applied using the PROGNOSIS model, a forest stand simulation model developed by the U.S. Forest Service. The report covers the existing literature and studies in the planting of backlog areas, brushing and weeding and conifer release, juvenile spacing, fertilization, spacing and fertilization, and growth response; a description of the PROGNOSIS model and its use; response estimates for interior species and for coastal species, and operational conditions.

### Opportunities for technology transfer in communications in New Brunswick : final report

Government of New Brunswick, Atlantic Canada Opportunities Agency. Fredericton : Applied Management Consultants, 1990. ii, 50 p. MICROLOG 90-06983 1 fiche

The federal Dept. of Communications (DOC) is seeking opportunities to transfer technology developed at their research facilities, particularly that carried out at the Communications Research Centre (CRC) and the Canadian Workplace Automation Research Centre (CWARC). New Brunswick is also interested in opportunities for increasing its base of technology-related business and developing advanced technological applications. This study was undertaken in response to both these interests and was managed by a steering committee of DOC and provincial government representatives. The economic sectors included fisheries, mining, justice, environment, forestry, transportation, municipal affairs, information systems, and health services. Information was gathered through visits to CRC and CWARC and structured group interviews from the relevant sectors, then selection of the highest potential technology transfer candidates and development of a strategy for the use of each.

### An Optimal algorithm for weighted minimax flow centers on trees -- Rev.

by H.A. Eiselt and M. Gendreau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 8 p. Bibliogr. (Publication ; no. 634)  
MICROLOG 90-06420 1 fiche

Let a tree be given with supplies assigned to its nodes and weights assigned to its edges. The problem considered here is to locate a facility so that the flow pattern which results from shipping all supplies to the facility is such that it minimizes the largest weighted flow on any individual edge. Some properties of such facility locations are first derived and then a linear time algorithm for their determination is given.

# Optimizing infrared detection for bridge deck deterioration

by T. Masliwec. Toronto : Ministry of Transportation, Research and Development Branch, 1990. iii, 57 p. : ill. Bibliogr. MICROLOG 90-05555 1 fiche

Infrared thermography is used in non-contact, non-destructive testing of bridge decks for deterioration. The thermographic images, in mapping the ambient temperature levels of the surveyed deck, identify areas of relative heat concentration that correlate well with subsurface delaminations in the deck. While the system is capable of mapping such deterioration in exposed or asphalt covered decks, operational limits, due to weather conditions, inhibit its year-round use. This report describes research studies undertaken to develop a theoretical heat transfer model for different types of bridge deck, to assess the validity of the theoretical model by collecting field data and performing correlation tests, and to provide guidelines for the application of the infrared imaging system relative to the ambient conditions at test sites. # Organic parameters in reagent water and effluents

Ontario. Ministry of the Environment. Quality Assurance Office. Toronto : The Office, 1989. 64 p. : ill. (Interlaboratory study : 88-1) MICROLOG 90-03231 1 fiche

Interlaboratory performance studies, or round robins, are conducted to assess the comparability of data among different laboratories and help in the identification of biases, precision or accuracy problems and in improving individual laboratory performance and maintaining performance standards. The Ontario Ministry of the Environment instituted an on-going program of round robins to assess and promote the performance of environmental laboratories providing analytical services for a variety of different programs. Round robin 88-1 was designed to assess the analytical variability of organic parameters in reagent water and 2 different effluent matrices. Eight laboratories were invited to participate: 1 government lab, 2 industrial labs, and 5 commercial labs. Two sets of 9 samples were distributed to each participant, consisting of spiked reagent water and two different spiked effluents. One set of samples was spiked with volatile organic compounds and the other set of samples was spiked with extractable organic compounds. This report gives the results of those tests. EV ON PR SC

# L'Organisation du loisir municipal au Québec

Québec : Ministère du loisir, de la chasse et de la pêche, 1989. 30 p. : ill. ISBN 2-550-19877-8 MICROLOG 90-01793 1 fiche

Depuis le Sommet québécois du Loisir, de nombreuses études ont permis de combler en partie l'absence de données sur la pratique du loisir des Québécois. La situation concernant l'organisation du loisir, et principalement dans

les municipalités de moins de 5 000 habitants, demeure cependant peu connue. Lors de la dernière année d'application du Programme national de soutien aux activités de loisir municipal (PNSALM), le ministère du Loisir, de la Chasse et de la Pêche a doublé son formulaire d'inscription d'un questionnaire sur le mode d'intervention en loisir dans les municipalités. Ce document fait la lumière sur le sujet. CU MU PR QU

# Organisation et financement des services de transport en commun en France

par M. Beaulé et L. Beaulieu. Québec : Gouvernement du Québec, Ministère des transports, 1988. 89 p. (Etudes et recherches en transports) (Systèmes de transport) ISBN 2-550-18929-9 MICROLOG 90-01785 2 fiche

L'état du développement des services au Québec appelle une révision des orientations passées. De ce point de vue, l'expérience française peut s'avérer fort pertinente. L'histoire récente du développement des transports urbains dans ce pays est en effet assez semblable à celle du Québec. Ce document porte essentiellement sur l'organisation des services de transport en commun en France; le financement; le transport scolaire; et les agglomérations de Lyon, de Grenoble et d'Annecy. ### ORNAMENT : Ontario road noise analysis method for environment and transportation : technical document

by V. Schroter and C. Chiu. Toronto : Environment Ontario, Noise Assessment and Systems Support Unit, 1989. iv, 71 p. : ill. Bibliogr. ISBN 0-7729-6376-6 MICROLOG 90-04273 1 fiche

Background and description of a procedure to predict road traffic noise based on road traffic

parameters, receiver description and topographical features. The Ministry of the Environment requires the use of this method to assess the noise impact from existing roadways on planned residential land uses, to assess the noise impact of roadway projects, and to establish the ambient noise level criterion for approval of new noise sources and for complaint investigation. Based on a model developed by the U.S. Federal Highway Administration, ORNAMENT evaluates a reference sound level and adjusts it by a series of adjustments accounting for the gradient of the roadway, the pavement surface, the distance between the road and the receiver, the topography and any shielding obstructing the sound path. It is valid from 15 m to about 500 m, with decreasing accuracy after that distance. The method does not apply to traffic volumes less than 40 vehicles per hour and to speeds less than 50 km/h. EV ON PR SC TR

### L'OTAN : Organisation du Traité de l'Atlantique Nord

Ottawa : Institut canadien pour la paix et la sécurité internationales, 1988. 2 p. (Fiche d'information ; 2) L'é.d. anglaise (NATO : North...) sur la même fiche. ISBN 0-662-94840-8 MICROLOG 90-01979 1 fiche

Le Canada, les Etats-Unis et la plupart des pays d'Europe appartiennent soit à l'OTAN (Organisation du Traité de l'Atlantique Nord), soit au Pacte de Varsovie (également appelé Organisation du Traité de Varsovie ou OTV). Ces deux organisations sont en fait des alliances, c'est-à-dire des groupes guidés par des intérêts communs. Dans le contexte des relations internationales, une alliance suppose habituellement que les membres partagent des intérêts militaires. Les alliances que sont l'OTAN et l'OTV ont pour objet d'empêcher toute attaque contre leurs membres respectifs. Cette fiche fait la lumière sur l'OTAN. • CA EX

### L'OTAN dans le nouveau contexte international

par M. Rossignol. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 25 p. Bibliogr. (Etude générale ; BP-205F) L'é.d. anglaise (NATO in a changing world) sur la même fiche. ISBN 0-660-92710-1 MICROLOG 90-01901 1 fiche

Depuis la création de l'OTAN en 1949, la cohésion de l'Alliance a été mise à rude épreuve par une longue succession de crises politiques causées par des frictions entre ses membres, des divergences sur la stratégie militaire et des appréciations changeantes de la menace qu'elle a mission de contrer. Ce document se penche sur le malaise de l'Alliance et sur la position de l'OTAN à l'ère de Gorbatchev. Cependant, on porte une attention toute particulière aux sujets suivants: le relâchement du lien entre les Etats-Unis et l'Europe occidentale, les répercussions du Traité INF, l'Allemagne de l'Ouest et la modernisation des missiles nucléaires de courte portée, les conséquences de la stratégie défensive soviétique, l'avenir des alliances. CA EX

### The Other shoe : the GST : stage two of tax reform

by R.D. Brown. Toronto : C.D. Howe Institute, 1989. 16 p. Bibliogr. (Fiscal policy monitor ; no. 3) ISSN 0843-641X MICROLOG 90-01017 1 fiche

This document examines reasons for replacing the federal sales tax, the basic mechanics of the value-added tax, and difficulties in convincing Canadians of the need for a general sales tax. • CA CI CO

**Un Outil interactif-graphique de planification de zones de livraison**

par A. Langevin. Montréal : Université de Montréal, Centre de recherche sur les transports, 1990. 11 p. Bibliogr.  
 (Publication ; no. 687)  
 MICROLOG 90-06639 1 fiche

Cet article propose une méthode interactive-graphique pour résoudre la première phase, i.e. le regroupement des points par véhicule. L'objectif du document est de déterminer la forme et les dimensions des secteurs de livraison (chaque secteur étant affecté à un seul véhicule) de façon à minimiser la distance totale parcourue par l'ensemble des véhicules. Les véhicules partent d'un dépôt commun, se rendent à leur secteur de livraison puis, après avoir visité tous les clients de leur secteur, reviennent au dépôt. Finalement, le document présente des formules analytiques qui permettent de prévoir la longueur des tournées en fonction du nombre de points à visiter et de l'aire à couvrir.

**Ovarian structure and plasma steroid hormones of triploid female rainbow trout**

by M. Nakamura...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 4 p. (Canadian translation of fisheries and aquatic sciences ; no. 5334) *Originally published in Japanese.* ISSN 0704-3716  
 MICROLOG 90-01473 1 fiche

Advantages with the sterility of triploid female salmonid sterility are many in culturing, among them cessation in the decline in growth which accompanies maturation, and avoidance of death after spawning. This report observed the microstructure of the ovaries of rainbow trout which had reached maturity, as well as measuring the plasma steroid hormones. The specimens were reared for 21-27 months and were triploid fish obtained through the high-temperature treatment of fertilized eggs. A group of diploid mature females were used as a control group.

**Owikeno Lake (Rivers Inlet, statistical area 9) fall sockeye salmon escapement survey, 1989**

by I. Winther, S.K. Bachen and R.D. Goruk. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1990. iii, 13 p. (Canadian data report of fisheries and aquatic sciences ; no. 794) ISSN 0706-6465  
 MICROLOG 90-07171 1 fiche

Owikeno Lake (statistical area 9) is the largest sockeye salmon producing system in the Central Coast. Sockeye returns to Owikeno Lake support commercial fisheries held in the lower reaches of Rivers Inlet. Sockeye salmon are enumerated in the spawning streams of Owikeno Lake annually from September to October. This report presents the result of the 1989 survey. River systems were surveyed approximately every 10 days, weather and water conditions permitting. Sampling strategy was to collect hypural length, sex and otoliths from the first 100 dead fish in each of the 10 streams surveyed. Female sockeye from the Washwash River were sampled for fecundity and 50 fish were seined from the mouth of the river and sampled for hypural length, and number of eggs. Scales and otoliths were collected for aging.

**OWMC treatment facility : preliminary physical/chemical treatability tests : final report**

Zenon Environmental Enterprises, Ltd  
 Toronto : Ontario Waste Management Corporation, 1987. iv, 61 p. : ill. Bibliogr  
 MICROLOG 90-02860 1 fiche

Ontario Waste Management Corp.'s (OWMC) proposed physical/chemical treatment plant will be designed to treat wastes which are primarily organic in nature. However, these wastes also contain varying concentrations of inorganic contaminants which must also be removed, destroyed and/or detoxified. The specific types and concentrations of organics likely to be present in these wastes are not known. There is, at the present, very little information available on the partitioning behaviour of organics between the solid and liquid phases in actual wastes which are subjected to physical/chemical treatment. This study provides the first step to collecting this information. The study focuses on using a single inorganic waste which contains some organics and is spiked with a range of additional organic contaminants of potential concern. Treatment was carried out using treatment processes of the type which have been included in the preliminary design of OWMC's physical/chemical treatment plant.

**Oxide characterization : Pickering 'A' feeders**

by V.S. Chew. Toronto : Ontario Hydro, Research Division, 1989. v, 42 p. : ill. Bibliogr. (Report ; no. 89-3-K)  
 MICROLOG 90-00411 1 fiche

Oxides on the Pickering Units 1, 2 and 3 inlet and outlet feeders were examined and compared to earlier results to identify whether the oxide character plays a major role in limiting decontamination radiation field reductions. The information will also be used to estimate the total Co-60 and oxide inventory on the carbon steel surfaces and IX resin requirements for the planned Unit 3 decontamination in 1989. Analytical techniques employed include scanning electron microscopy to determine the surface morphology; energy dispersive X-ray fluorescence spectrometry to

identify the inactive elements on the oxide; X-ray diffraction to identify the structure of the oxide (whether the iron-oxide is magnetite or hematite); gamma spectrometry and atomic absorption spectrophotometry to obtain the depth profiles of both radioelements and inactive elements.

### Oxyfluorfen (Goal) trials with bareroot forest seedlings in British Columbia, 1987

by D.B. Trotter and G.M. Shrimpton. Victoria : Forest Resource Development Agreement ; Ministry of Forests, 1989. vi, 22 p. : ill. Bibliogr. (FRDA report ; 092) ISSN 0835-0752 ISBN 0-7726-1022-3 MICROLOG 90-02642 1 fiche

Herbaceous weeds are a serious problem in forest nurseries, affecting the growth and survival of seedlings by reducing the efficiency of fertilizers and irrigation, and harbouring tree-damaging insects and pathogens. A promising herbicide which has been registered for use in U.S. forest nurseries since 1979 is oxyfluorfen (Goal). On the basis of its potential and extensive use in nurseries in the U.S., oxyfluorfen was chosen by the Canadian Forest Nursery Weed Management Assoc. as a candidate for registration. A standardized oxyfluorfen trial was designed by the Association to facilitate and coordinate weed control and crop tolerance data from different regions of Canada. The trials were conducted across the country, and provided information on the tolerance of 1 plus 0 and 2 plus 0 bareroot Douglas-fir and lodgepole pine to oxyfluorfen, and the degree of herbicide efficacy in controlling weeds commonly found in B.C. forest nurseries.

### Oxygen isotope composition of sulphate produced during bacterial oxidation of metal sulphides : dependence upon O2 pressure and oxygen isotope compositions of H2O and O2

by H.R. Krouse. Calgary, Alta : University of Calgary, Dept. of Physics, 1989. 74 p. : ill. Bibliogr. CANMET contract: 89161-01-SS MICROLOG 90-05675 1 fiche

The oxygen isotope composition of sulphate produced during sulphide oxidation is highly variable, with the mechanism a combination 'oxidation-hydrolysis' in which oxygen can be

incorporated from O2 and H2O molecules. In 1987, experiments were conducted using not only pyrite but other metal sulphides. In some of these experiments, there was substantial background carry over from the inoculum. It was clear that the participation of the water molecule in the reaction was substantial but the extent to which it was by direct reaction or isotope exchange with reaction intermediates was still debatable. To resolve these alternatives, further experiments were designed which incorporated 18O-enriched O2 as well as H2O, were conducted at different O2 pressures and were conducted with postulated intermediates of the oxidation reaction with or without enzymes. This report describes the results of those experiments.

### PAH and heavy metal pollution of the Sydney Estuary : summary and review of studies to 1987

by J.H. Vandermeulen. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. ix, 48 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 108) ISSN 0711-6774 MICROLOG 90-05155 1 fiche

First reports of unexpected and very high levels of benzo(a)pyrene in lobsters taken from the Sydney estuary came in 1980. Subsequent environmental surveys of various potential PAH-sources in the area indicated the Sysco coking facility and the nearby 'tar pond' in Muggah Creek as the likely sources of hydrocarbon contamination, with runoff and effluent from these apparently polluting the entire waters and biota of the greater Sydney estuary. This report summarizes the data to 1987 on heavy metal and to a lesser extent PAH contamination of estuarine bottom sediments. The report describes the local setting, including Muggah Creek and the tar-ponds, and coal-tar as a contaminant, then describes the input of PAH and heavy metals to the water and air. The contaminant effects into Sydney Harbour, and their mutagenic, histopathological and

ecosystem effects, are then discussed.

### Parametric study of icebreaking bow forms

by D. Carter. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1990. xv, 87 p. : ill., fold. ill. Bibliogr.  
MICROLOG 90-07195 2 fiche

A study of icebreaking resistance has been conducted for the last 8 years to explore the possibility of deriving, on purely analytical grounds, a relatively simple model, sensitive to both hull characteristics and environmental conditions, which could predict ship resistance to continuous motion through level ice and provide a better understanding of the complex interactions of the ship-ice interface. A totally new analytical approach was proposed by Carter in 1983 and a computer program ICEBREAK was developed which could predict the normal and the frictional components of the icebreaking force at any point along the hull-ice interface. This report gives an overview of the whole project, emphasizing its last phase of bow form optimization for level ice performance. The report covers the mode of approach and assumptions, ice failure criterion, bow geometry definition, level ice resistance, correlation analysis, influence of ship and ice parameters, and bow form optimization.

MICROLOG 90-05943 6 fiche

This forum was organized to bring a number of Committees of the House of Commons together in joint hearings on a topic of great general interest. The forum covered public attitudes and perceptions, the scientific dimensions, and policy implications. Expert witnesses from industry, transportation, energy,

fisheries, forestry, agriculture, labour, and the health disciplines gave their views, followed by a question and answer period. This document is a transcript of the forum, including keynote speakers, expert witnesses, and the joint committee sessions.

#### Part-time work -- Rev.

by M. Baker. Ottawa : Library of Parliament, Research Branch, 1989. 14 p. Bibliogr. (Current issue review : 85-7E) French ed. (*Le Travail à temps partiel*) on the same fiche. ISBN 0-660-13522-1  
MICROLOG 90-05730 1 fiche

Over the past three decades, part-time workers increased from 3.8% of all those employed in Canada in 1953 to 15.6% in 1986. This paper defines part-time work, and describes types of part-time workers. It also discusses condition of work, the long-term implication of part-time work, major studies of part-time work, and the federal government as employer. It includes information on parliamentary action on this matter.

#### Partenaires dans la croissance : une vision de l'industrie agro-alimentaire canadienne

Ottawa : Agriculture Canada, 1989. 81 p. : ill. L'éd. anglaise (*Growing together...*) : 90-02026/1. ISBN 0-662-95712-1  
MICROLOG 90-02027 1 fiche

Les 20 dernières années ont mis à rude épreuve la collectivité agricole canadienne. L'expansion des années 1970, suivie d'une croissance de l'endettement, de la sécheresse et des guerres commerciales des années 1980, ont montré clairement la vulnérabilité du secteur face aux marchés changeants, aux facteurs économiques et au climat. Ce document aborde principalement les points suivants: la vigueur du secteur agro-alimentaire canadien; les motivations d'un examen de la politique; le choix d'une nouvelle perspective; les orientations en vue du changement; et la mise en pratique des principes.

**Passenger car fleet fuel consumption estimation program : examples of use**

Ottawa : Transport Canada, Road Safety, 1989. iii, 19, iii, 23 p. : ill. Bibliogr. *Bilingual* (*Le Programme d'estimation...*).  
MICROLOG 90-04491 1 fiche

Demonstration of 4 typical applications of a passenger car fleet fuel consumption estimation program. The program is used to determine the effect of various factors on the overall fuel consumption of passenger cars in Canada. The factors studied include changes in average speeds and traffic volumes on urban streets,

changes in average speed on rural highways and freeways, vehicle technology improvements and a shift in the percentage of driving done in each vehicle class. Data for the 1987 Canada passenger car fleet is used and realistic estimates of on-road fuel savings are given. The effect of cold start is not included due to a lack of reliable data.

**Pathways : a study of labour market experiences and transition patterns of high school leavers**

Toronto : Ministry of Skills Development, 1989. xv, 174 p. : ill. *French ed. (Itinéraires : étude de la vie...)* : 90-00822/3. ISBN 0-7729-5593-X  
MICROLOG 90-00841 3 fiche

This study identifies the transition paths of young Ontarians who enter the labour force directly from high school, and the extent to which they secure lasting and stable employment. It also measures the extent to which this group obtains further education or training and specifies the background factors associated with obtaining further education or training, including barriers to this training. In addition, it establishes the impact of further education or training (or lack thereof) on securing lasting and stable employment and income, and on attitudes toward work. Finally it identifies changes over time in transition patterns, and the location of further education and training and the types of programs that are undertaken.

**Patterns of domestic air pollution in rural India**

by J. Ramakrishna. Ottawa : International Development Research Centre, 1990. ix, 137 p. : ill. Bibliogr. (Manuscript report ; 254e)  
MICROLOG 90-06131 2 fiche (Available on fiche only)

Most people in the world today cook on simple mud stoves and burn unprocessed biomass fuels such as wood, animal dung, and crop residues. The burning of such fuels in simple, unvented cookstoves causes poor air quality in the cooking area, leading to health problems. This report addresses these problems in one north Indian and 2 south Indian villages. Measurements of the cook's exposure to and kitchen concentrations of 2 indicator pollutants were taken in households using different stoves and fuels in a variety of kitchen arrangements. Using these data, information on fuel utilization, and the cooking-related characteristics of each place, the report identifies cultural, environmental, architectural, and policy factors that influence the pattern of domestic air pollution, and arrives at an estimate of their relative influence. Major factors investigated include stove type, fuel type, kitchen location and construction materials, and cooking process and practices, with an emphasis on stove type.

### Pelican Lake enhancement project : report on hearing

Manitoba. Clean Environment Commission. Winnipeg : The Commission, 1990. 63 p. : ill., maps.  
MICROLOG 90-07157 1 fiche

A proposal was filed in August 1989 for the construction of water control works which would allow regulation of Pelican Lake water levels. Severe fluctuations in water levels caused by year to year variations in the regional climate adversely affect recreational use of the lake at very low levels and cause property damage at very high levels. On the premise that sufficient water can be borrowed from the Pembina River, the proposed works were designed to reduce the magnitude of both high and low water levels in Pelican Lake, and to maintain water levels as close as possible to a target level based on long term mean lake water levels. This report summarizes responses to the proposal by Pelican Lake users, downstream interests, those with jurisdictional/environmental concerns, and local and provincial governments. A list of exhibits and presentations is included.

### Pemberton MLS/StOL Flight Demonstration Project : technical report

McNeal and Associates Consultants, Limited. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1988. xxii, 155 p. : ill. Bibliogr. *Contractor: Air BC.* MICROLOG 90-07188 2 fiche

AirBC plans to operate a scheduled air service to Pemberton, B.C. to serve the Whistler resort area. The air service will be provided by deHavilland DHC-7 STOL aircraft capable of conducting steep approaches into the mountain valley airport. A conventional instrument approach system could not be developed due to the surrounding mountain terrain affecting electronic signals of an instrument land system precision aid, or the obstacle clearance limits needed to safely operate in and out of the valley. Combining STOL aircraft capabilities with microwave land system technology allowed the design of an instrument approach system. A comprehensive research program was designed and conducted, and is described in this report, along with a description of the

systems used and the results.

### Penetrating the United States construction market : a study of the U.S. market : final report

for the Dept. of External Affairs and International Trade and the Canadian Construction Association ; by Ernst and Young Management Consultants. S.I. : The Consultants, 1990. viii, 142 p. Bibliogr. MICROLOG 90-06873 2 fiche

While in the past several Canadian entrants have enjoyed success in the American market, there are also examples of firms who have encountered problems with unions, local favouritism, and a lack of local market awareness. The purpose of this report is to provide Canadian construction firms with the market background required to succeed in the U.S. market. The report describes the opportunities, constraints and characteristics of the market for those Canadian firms who may be interested in particular regions or particular segments.

### Penser et agir famille : guide à l'intention des intervenants publics et privés -- 2e éd.

avis du Conseil de la famille à la ministre déléguée à la Condition féminine et responsable de la famille. Québec : le Conseil, 1989. 65 p. (Avis ; no 89.2) *L'éd anglaise (Think and act...)* : 90-04481/2. ISBN 2-550-20135-3  
MICROLOG 90-02811 1 fiche

Cet avis se présente en deux parties. La première explique le contexte d'intervention de la politique familiale. Il rappelle d'abord les orientations et les objectifs adoptés par le Conseil des Ministres, situant la famille et la politique familiale dans le contexte de la société d'aujourd'hui. Le Conseil cherche ensuite à initier le lecteur au concept d'évaluation tel que développé dans l'appareil gouvernemental pour enfin, présenter quelques commentaires sur la créativité dans l'évaluation et signaler des questions qui restent en suspens. La deuxième partie est constituée de la grille d'évaluation ou du cadre de référence pour évaluer les politiques, les programmes et les services dans une perspective familiale. Cette partie se veut un véritable outil de travail pour toutes les personnes concernées par l'approche familiale. Des critères familiaux sont développés et le Conseil suggère des questions susceptibles d'en vérifier le respect. Le Conseil indique ensuite les étapes qui devraient être suivies pour réaliser une démarche cohérente et significative d'évaluation.

### **The Performance of wood frame walls with respect to resistance against door jamb spreading**

prepared for R.D. Stapleton ; by G.J. Van Rijn. Ottawa : Canada Mortgage and Housing Corporation, 1988. 52 p. : ill. Bibliogr.  
MICROLOG 90-01864 1 fiche

The task group on physical security in residential buildings of the associate committee on Part 9 of the National Building Code of Canada requires test data to judge the appropriateness of a proposed requirement for solid blocking at lock height in 2 stud spaces on each side of an exterior door. This report evaluates the effectiveness of various strategies of increasing the resistance of residential door frame and wall assemblies against forced entry by jamb spreading. Nine wall designs were selected for testing, including the use of blocking at lock height constructed both wet and dry. Measurements were made of the shrinkage of the studs during drying. Three replications were made of each type. The test method was based on ASTM F476 on the security of swinging door assemblies but was modified to study the effect of the wall construction rather than the door assembly.

### **Periodic changes in the weight of the gonads and the spawning cycle of Baltic and Belt Sea cod *G. morhua callarias*/*G. morhua morhua* in different parts of the Baltic**

by M. Berner. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 36 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5452) *Originally published in German.* ISSN 0704-3716  
MICROLOG 90-00580 1 fiche

Over the year, the maturity cycle can entail considerable changes not only in the weight of the gonads, but also in the total weights of all affected length-groups and ages. However, partial questions such as the relation between maturity cycles and the length of the fish have usually been studied only for both sexes together, and according to maturity stages rather than by directly weighing the gonads. This paper analyzes the spawning behaviour of the Baltic cod separately for each sex. The length-weight relations for the gonads were calculated to determine the gonadosomatic indices or percentage changes in the weight of the gonads.

### **Permafrost and terrain research and monitoring : Norman Wells Pipeline, vol. 1 : environmental and engineering considerations**

by K.L. MacInnes...et al. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1989. xxix, 132 p. : ill., maps. Bibliogr. (Environmental studies ; no. 64) ISBN 0-662-17529-8  
MICROLOG 90-04411 2 fiche

The 324 mm (12.7 in) diameter Norman Wells pipeline, owned and operated by Interprovincial Pipeline (NW) Ltd., is the first completely buried oil pipeline in the discontinuous permafrost zone in northern Canada. Permafrost and terrain monitoring was established to evaluate impacts

and identify improvements for this and future projects and is planned to continue for 5-10 years or until conditions stabilize. Major aspects of the program include examining thermal and terrain conditions at 23 main instrumented sites (pipe temperature sensors and a series of 5 and 20 m ground temperature cables on and off the right-of-way) over 819 km; regular observations of overall right-of-way conditions; and reviewing the performance of wood chip insulation used on thaw-sensitive slopes. Vol. I of the report summarizes environmental and engineering considerations related to the pipeline design, construction and operation. Comparisons are made with the Canol pipeline (Norman Wells to Whitehorse), the Pointed Mountain natural gas pipeline, and the Trans-Alaska pipeline system.

#### The Persistence of polynuclear aromatic hydrocarbons in soil

by T.L. Bulman...et al. Ottawa : Petroleum Association for Conservation of the Canadian Environment, 1985. v, 76 p. : ill. Bibliogr. (PACE report ; no. 85-2)  
MICROLOG 90-02796 1 fiche

Polynuclear aromatic hydrocarbons (PAHs) are a group of organic chemicals which are

produced by a variety of industrial processes, including the refining of oil, and which have been identified as potential environmental and health hazards. This report reviews information regarding the sources and properties of PAHs and processes affecting their persistence in soil, and describes studies to further define the fate of PAHs in soil. Two incubation studies were performed. In the first, a mixture of 8 PAHs was added to soil and the concentrations of each compound were monitored with time. In the second, 14C labelled benzo(a)pyrene and anthracene were added to soil in biometer flasks. The distribution of 14C as volatile, absorbed and degraded products was determined in sterilized and biologically active soil. The kinetics of disappearance were defined for several PAHs. The results of this study are specific to unacclimated agricultural soil incubated under specified conditions. The relevance of these results to land treatment of oily wastes is discussed and recommendations made for waste and soil monitoring programs and for future research.

#### Personal mass spectral data in floppy disk system, II : correlations between mass spectra and unsaturation in hydrocarbons

by Y. Koyama and K. Maeda. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 32 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5337) *Originally published in Japanese.* ISSN 0704-3716  
MICROLOG 90-01472 1 fiche

A personal mass spectra database was built for 1,813 hydrocarbons, containing the m/z of the base peaks as well as the 10-13 m/z of the characteristic peaks, about 10% higher in the increasing order of ionic strength and expressing at most only the relative sizes in the order of these arrangements. There appears to be a close relationship between the peaks appearing in the mass spectra and the chemical structure of the molecules, as well as a close relationship between the ion peaks and the molecular structure. This report examines the correlation between the structural data held mainly by the molecular formulae and the base peaks, as well as the other characteristic peaks.

#### Pesticides, recherche et surveillance : Rapport annuel 1987-88

Ottawa : Environnement Canada, 1989. viii, 115 p. L'éd. anglaise : 90-02246/1. CSI 21111.019F. ISBN 0-662-95714-8. MICROLOG 90-02247 2 fiche

La pulvérisation aérienne de pesticides est essentielle pour protéger les cultures dans l'industrie forestière. L'efficacité des opérations de pulvérisation aérienne dépend d'un certain nombre de facteurs tels que le type d'aéronef, les conditions de vol, l'atomiseur et la stabilité de la masse d'air. On trouvera dans ces études les résultats des études entreprises au cours de l'année 1987-1988 par les bureaux régionaux et de district, les instituts et les centres de recherche, les directions et les services du ministère. Les études ont été groupées par région du pays où elles ont été réalisées et la dernière partie du rapport concerne les études faites au Centre national de recherche sur la faune, à Hull. On trouve également dans le rapport des documents d'information résumant les effets de cinq pesticides sur l'environnement: l'oxyfluorène, le pentachlorophénol, le triadiméfone, le metsulfuron-méthyl et le propiconazole.

#### Petrographic examination of aggregate and concrete in Ontario

by C.A. Rogers. Toronto : Ministry of

Transportation, Engineering Materials Office,  
1989. 35 p. : ill. Bibliogr. (Report ; EM-91)  
ISBN 0-7729-6454-8  
MICROLOG 90-01952 1 fiche

Petrographic examination of aggregate and hardened concrete has been conducted since the late 1940s. Because of problems in communicating results of petrographic examination of aggregates to engineers, a petrographic number system was developed in which 4 quality categories were recognized. This report describes the system, its development, the current procedure, training materials available, the re-evaluation of the system in the 1980s, the correlation of petrographic numbers with other tests, the precision of a petrographic number, and methods for examination of fine aggregate and concrete.

### Petroleum resources of the Scotian Shelf

by J.A. Wade...et al. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1989. iii, 26, iii, 28 p. : ill., maps. Bibliogr. (Paper ; 88-19) *Bilingual* (Ressources pétrolières...). ISSN 0068-7650  
ISBN 0-660-55066-0  
MICROLOG 90-01146 1 fiche

From the inception of petroleum exploration in 1959 through the end of 1983, 62 wildcat wells have been drilled on the Scotian Shelf. This activity has resulted in 13 significant discoveries of gas and liquid hydrocarbons. This paper summarizes the history of exploration for gas and oil on the Scotian Shelf and provides details on the discoveries. It reviews the regional and petroleum geology and describes a set of play data used to develop an assessment of the ultimate recoverable hydrocarbon resource potential of the area. Finally, it casts the expected resource endowment in terms of a series of pool sizes which, if discovered, could support a viable offshore development.

### The Petrology, geochemistry and mineralogy of potash ore mill products from the Potash Company of America Mine and the Denison Potacan Mine

by J.A.R. Stirling. Fredericton. New Brunswick Research and Productivity Council, 1989. 219 p. : ill. CANMET contract: OSQ-84-00443.  
MICROLOG 90-03500 3 fiche

The production of potash concentrate has become one of the major mineral commodities in New Brunswick. Potash is produced at the Potash Co. of America Mine and the Denison Potacan potash mine, both near Sussex. A third deposit in the Sussex area is under development by BP Canada. Samples of potash ore, host rocks, salt horses, and mill products were collected from the 2 mines, although not from BP Canada's deposit. The

evaluation of the concentrators' performance, a better understanding of the geology of the deposits, and the development of mineralogical methods with which to predict the performance of the ore in the mill was achieved by quantitative mineralogical, and chemical and image analysis of the ore and mill samples. Multi-element analysis by ICP and fluid inclusion studies were not done. Presentation of the data and interpretations are made for each mine separately.

### Phase II report on development and evaluation of cement/fly ash-based sealants for capping pyritic slate outcrops at Halifax Airport

Hardy BBT Limited. Burnaby, B.C. : The Corporation, 1989. i, 49 p. : ill. CANMET contract: 89164-01-SQ  
MICROLOG 90-03967 1 fiche

This study evolved from the need to provide a solution to the problem of acid leachates from exposed pyritic slates at the Halifax airport. One of the possible control measures available is the reduction of the penetration of surface water into the slate outcrop. This study focuses on the material properties of high volume fly ash/portland cement shotcrete with integral high volume fibrillated polypropylene fibre reinforcement for capping. The Phase I part of the study evaluated a broad range of laboratory trial mix designs from which the most promising mixes were identified for the full scale shotcrete test program in Phase II. This Phase II report evaluates low water permeability, long term durability, ductility, chemical resistance to seeping leachates, and commercial viability. Six mixes from Phase I were selected for full scale shotcreting and fabrication of shotcrete test panels. The principle mix variables are 2 cementitious contents and 3 additional rates of polypropylene fibres of 0%, 3% and 6%.

### Phase splitting in complex hydrocarbon systems

by J.M. Shaw. Toronto : University of Toronto, Dept. of Chemical Engineering and Applied Chemistry, 1989. 35 p. : ill. Bibliogr. CANMET contract: 89241-01-SQ  
MICROLOG 90-00183 1 fiche

Significant fluctuations in the light oil yield obtained from laboratory and pilot scale models of heavy oil upgrading, coal/oil coprocessing and direct coal liquefaction processes, arising from apparently minor perturbations in operating conditions, are frequently attributed to synergism. This study explains some aspects of observed synergistic behaviour in terms of relevant liquid-liquid equilibria. Partial phase diagrams for simple and complex hydrocarbon mixtures including model diluent/solvent mixtures such as pyrene/naphthalene/tetralin, and bitumen/heavy oil/anthracene oil mixtures are presented.

### Phosphate in southeastern British Columbia (82G and 82J)

by S.B. Butrenchuk. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1987. 103 p. : ill., maps. Bibliogr. (Open file ; 1987-16) ISSN 0835-3530 ISBN 0-7718-8586-5  
MICROLOG 90-01266 2 fiche

Although extensive phosphate deposits occur in B.C. and other regions of Canada, at present all phosphate rock used in Canada is imported, mainly from the U.S. Phosphate is produced from marine sedimentary deposits, igneous apatite (carbonatites and related alkaline intrusions) and guano-derived deposits. B.C. is known to have extensive marine sedimentary phosphate deposits although none are considered economic at the present time. Recent studies have delineated several carbonatite bodies, some of which are reported to contain apatite. This report gives the results of a 1986 program to study phosphate deposits in southeastern B.C., to identify economic deposits, to study their chemical and mineralogical characteristics, and to identify potential beneficiation problems and economic byproducts (rare earths).

### Physical oceanographic observations in the Cardigan Bay region of Prince Edward Island, 1982-87

by K. Drinkwater and B. Petrie. Dartmouth, N.S. : Bedford Institute of Oceanography, 1988. iv, 37 p. : ill. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 110) ISSN 0711-6774  
MICROLOG 90-05157 1 fiche

The deaths of 3 elderly people and the severe illness of over 150 others from November to mid-December 1987 were attributed to the consumption of toxic blue mussels harvested from the cultivated mussel farms in Cardigan Bay, P.E.I. The toxin was identified as domoic acid and is believed to have been associated with a phytoplankton bloom of *Nitzschia pungens*. This report reviews the physical oceanography of the region; presents the available physical oceanographic data; derives some physical parameters that characterize the Bay; and discusses conditions during 1987. No detailed study of the Bay was conducted but temperature and salinity data were collected as part of monitoring programs for various biological investigations. These data are also presented, along with a brief description of the region, a discussion of circulation patterns and estimates of the flushing time of the water in the Bay.

### Physical performance and carbohydrate consumption in CF commandos during a 5-day field trial

by I. Jacobs...et al. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1989. 44 p. Bibliogr. (DCIEM research report ; no. 89-RR-48)  
MICROLOG 90-01829 1 fiche

Evaluation of the capacity of military personnel to perform maximal exercise before and after 5 days of sustained physical activity and whether a carbohydrate supplement to the regular field rations would reduce the extent of any performance impairments. Twenty-nine male volunteers were allowed 4-5 hours of

sleep each 24 hours and 45 min/meal but were otherwise continuously occupied with physically demanding missions in a field environment. Mean 24 h energy expenditure in the field was estimated from continuous HR recordings and direct oxygen uptake measurements with field portable equipment. Regular individual meal packets were distributed to half the subjects, with the other half consuming the meal packets and starch candies. Performance tests administered 2 days before and at the end of the trial included evaluations of maximal aerobic power during cycle exercise, anaerobic power, muscular strength and endurance, rate of maximal force development and reaction time. Muscle and blood tissue samples were obtained before and after the trial to clarify the relative contribution of fat and carbohydrate energy stores to meeting the metabolic cost.

### Phytotoxicology assessment survey investigation in the vicinity of Clintar Groundskeeping Services, 17 Dundas St. E., Mississauga, June 2, 1988

by R. Emerson. Toronto : Ministry of the Environment, 1990. 6 p.  
MICROLOG 90-04333 1 fiche

Report on the cause of decline of mature maple trees at the north property limit of Clintar Groundskeeping Services in Mississauga, Ontario. A salt pile had been stored on the Clintar property in the general area of the declining trees during the 1987-88 winter, directly on the ground. Prior to the investigation, the salt pile was removed, along with a shallow layer of surface soil. Visual observations of the trees and the area around them were conducted, along with samples of soil from two sites where a salt-like material was observed on the surface of the hard, clay soil. Surface soil was also sampled at 3 other sites slightly upgrate of the former salt pile. Twigs were collected from one of the leafless maples, as well as from the foliated tree. Control samples were collected from a healthy

Norway maple tree in the area.

### Plains Hydrology and Reclamation Project : spoil groundwater chemistry and its impacts on surface water

compiled by Mark R. Trudell. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1988. xix, 135 p. : ill. Bibliogr. (Report : RRTAC 88-2)  
 MICROLOG 90-03267 2 fiche

Description of the chemical makeup of spoil groundwater at Diplomat and Vesta mines in the Battle River mining area, 200 km southeast of Edmonton within the Lower Horseshoe Canyon coal zone; and at Highvale and Whitewood Mines in the Lake Wabamun mining area, 100 km west of Edmonton within the Ardley coal zone. This report compares the chemical characteristics of the spoil groundwater for each mine to those of the principal premining aquifer that is disrupted by surface mining. The characterization of spoil groundwater chemistry is based on the sampling and analyses of groundwater from piezometers installed in reclaimed areas. Forty-three samples were collected from 23 piezometers at Vesta Mine, and 54 samples were collected from 32 piezometers at Diplomat Mine. At Highvale Mine, 29 samples were collected from 13 piezometers installed in the reclaimed area at Pit 01. Eleven samples were also collected from piezometers installed in spoil at Whitewood Mine to augment a study of that site.

### Le Plan d'action gouvernemental en matière de condition féminine, 1986-87

Québec : Ministère du conseil exécutif, Secrétariat à la condition féminine, 1986. 63 p. ISBN 2-550-16222-6  
 MICROLOG 90-01695 1 fiche

Ce plan d'action gouvernemental porte sur le maintien et le développement des interventions gouvernementales en matière de condition féminine au cours de l'année 1986-87. On y examine particulièrement les points suivants: la participation des groupes de femmes aux mécanismes de consultation et de concertation; l'amélioration des conditions de formation des filles et des femmes; l'amélioration de la situation des québécoises sur le marché du travail; l'amélioration de la situation de clientèles spécifiques; l'amélioration de la sécurité économique des travailleuses au foyer; l'amélioration des services collectifs, et, l'état-employeur.

### Le Plan d'urbanisme et le rôle d'évaluation

Québec : Gouvernement du Québec, Ministère des affaires municipales, 1989. 11 p. (Aménagement et urbanisme) ISBN 2-550-19561-0  
 MICROLOG 90-02189 1 fiche

Chaque municipalité utilise son rôle d'évaluation à des fins de taxation. Grâce aux nombreuses améliorations apportées à chaque mise à jour, ce fichier contient des informations de plus en plus complètes à l'égard de chacune des unités d'évaluation du territoire. La matrice graphique du rôle d'évaluation permet une localisation précise de ces informations. La première partie du document met en relief les avantages que comporte la consultation du rôle et de son sommaire en urbanisme. Ensuite, un exemple illustre un traitement des données du sommaire du rôle. Ces données permettent à titre d'indicateurs de compléter les connaissances déjà acquises sur le territoire. Finalement, la troisième partie du document est un guide expliquant chaque composante de l'exemple.

### Plan de développement touristique : résumé : Bas-Saint-Laurent

Rivière-du-Loup, Québec : Association touristique du bas St. Laurent, 1989. 15 p.  
 MICROLOG 90-03627 1 fiche

Le projet de doter la région du Bas-Saint-Laurent d'une stratégie de développement touristique remonte à 1984. Après une première tentative infructueuse, ce projet fut repris en 1986 par l'Association touristique du Bas-Saint-Laurent assistée par un comité de gestion formé spécialement pour réviser le travail précédemment accompli. Le plan de développement a été adopté en novembre 1988 et fait consensus dans le milieu. L'objectif du plan de développement consiste à identifier les principes qui permettent d'orienter et de prioriser les actions destinées à développer le produit touristique bas-laurentien et à le rendre plus accessible.

# **A Plan for a water protection programme for the sea off Kuivaniemi with reference to fish farming : working group proposal**

Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 86 p. : ill., maps. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5271) *Originally published in Finnish, by the Government of Finland.* ISSN 0704-3716  
MICROLOG 90-02741 1 fiche

The volume of rainbow trout culture increased sharply in marine areas in Finland at the end of the 1970s, encouraged by low investment costs associated with net cages and a faster growth rate of the fish. Just over half of the tonnage of fish produced was cultured in the Turku archipelago and plans were being made for further increases. Since the operations could cause conflict with recreational use, coastal housing, fishing and conservation of some islands, a plan to control water pollution was necessary. The plan observed the pollution in the area, its development and contributing factors; the possibilities of reducing pollution caused by existing fish farming; and the possibilities of increasing fish farming in the area.

# **A Plan to identify and assess emission reduction opportunities from transportation, industrial engines and motor fuels**

prepared by Energy and Emissions Engineering, Transport Canada, Road Safety and Motor Vehicle Regulation ; Transportation Systems Division, Environment Canada, Industrial Programs. Ottawa : Transport Canada ; Environment Canada, 1989. 50 p.  
MICROLOG 90-06310 1 fiche

Plan to identify and assess opportunities to reduce emissions associated with the use of internal combustion engines and the fuels that power those engines. The plan focuses on emission reductions possible from transportation motor vehicles; industrial equipment used in construction, agriculture, forestry, and mining; and motor fuel production, distribution, marketing and use. The plan addresses the issues of climate change, depletion of the ozone layer, acid deposition, photochemical oxidants and other toxic air pollutants. Canadian actions in reducing these emissions are described, along with the Canadian approach to environmental protection. Emission inventories and projections for non-methane hydrocarbons, carbon monoxide, carbon dioxide, oxides of nitrogen and particulate matter are given. A description of the initiatives under study, the proposed emission reductions and the schedule of reductions are also included.

by E.A. Sauder and G.V. Wellburn. Victoria : Ministry of Forests and Lands, 1989. vi, 47 p. : ill., maps. Bibliogr. (Land management report ; no. 59) (FERIC special report ; no. SR-57) ISSN 0702-9861 ISBN 0-7718-8767-1  
MICROLOG 90-04420 1 fiche

Discussion of the process of planning logging operations on steep, unstable terrain on the Queen Charlotte Islands, B.C. The report describes the current logging planning process, its data requirements and methods of data collection, and the results of a series of alternative logging plans prepared to minimize the potential for logging-accelerated mass wasting. Recommendations are also made for improving the planning process through the amount and quality of data required, evaluating alternative plans, and logging-system selection. Intensive ground mapping on 2 watersheds provided data for the preparation of detailed logging plans. The logging plans involved various combinations of equipment, including equipment that was in common use at the time (highlead, mobile yarding crane, and grapple), equipment that was less common (tower skyline), and equipment not yet available (helicopter).

**Plantation assessment private lands, 1985**

Truro, N.S. : Dept. of Lands and Forests, 1988. 15 p. : ill. Bibliogr. (Forest research report ; no. 5)  
MICROLOG 90-02225 1 fiche

From 1977-84, over 10 million seedlings were shipped to private woodlot owners for the reforestation of cutovers, abandoned fields, and other non-regenerating or poorly stocked lands in Nova Scotia. In November 1985, a survey was conducted of selected plantations established on these woodlots. Plantation records were utilized to determine the location and background for each plantation sampled, then plots were established, located at predetermined, equal intervals along parallel and equally spaced cruise lines in each plantation. Planted trees were categorized as healthy, unhealthy or dead and vegetative competition for each planted tree was noted as either light, moderate or severe. The percentage stocking for plantations was determined for planted trees to total area; planted trees to plantable area; natural regeneration to total area; and planted trees plus natural regeneration to total area.

### Plants of Riding Mountain National Park, Manitoba

by W.J. Cody. Ottawa : Agriculture Canada, Research Branch ; Environment Canada, Canadian Parks Service, 1988. 319 p. : ill. Bibliogr. ISBN 0-660-12879-9

MICROLOG 90-00005 4 fiche

Within the boundaries of Riding Mountain National Park, a total of 88 families, which include 300 genera, 669 species, and 2 hybrids, are known to occur. This publication provides a workable key to the vascular plants found within the park, including brief descriptions of each. The book is based on studies carried out during the summers of 1979 and 1983 and on the study of extensive collections made during the first year in particular. A list of excluded species and a checklist of species, along with a glossary, are included.

### Plasma synthesis of ultrafine silicon carbide powders : final report

by C. Laflamme, J. Jurewicz and M.I. Boulos. Sherbrooke, Que. : Université de Sherbrooke, Dept. of Chemical Engineering, Plasma Technology Research Centre, 1990. 40 p. : ill. CANMET contract: 79180-01-SS. MICROLOG 90-05652 1 fiche

Feasibility study for the plasma synthesis of high purity ultrafine powders of silicon carbide, with special attention given to raw material and energy cost in the selection of the reaction

route and the reactor design used. Priority was given to the possible use of relatively low-cost raw materials such as silica or elemental silicon as starting material in favour of more expensive traditional feedstocks such as silane or silicon tetrachloride used by earlier investigations in this field. The proposed approach is based on the direct carburization of silicon vapour/condensed droplets using methane as quench gas.

**Les Pluies acides -- Rév.**

par T. Curren. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 24 p. Bibliogr. (Bulletin d'actualité ; 79-37F) L'éd. anglaise (*Acid rain*) sur la même fiche. ISBN 0-660-92762-4 MICROLOG 90-03019 1 fiche

Les précipitations acides, ou les pluies acides comme on les appelle communément, préoccupent de plus en plus bon nombre de Canadiens. Ce n'est pas pour autant un problème nouveau, puisque l'acidification des lacs remonte au début des années 50 en Ontario. A cette époque-là, on considérait que c'était simplement un problème local résultant de la proximité des fonderies de nickel de Sudbury, mais depuis, les savants ont démontré l'acidification et la contamination de beaucoup d'autres lacs; on reconnaît maintenant que l'acidification est un phénomène répandu qui présente un grand danger pour l'environnement. Ce document porte sur les pluies acides et en examine les faits saillants. CA EV SC

**Les Pluies acides, un compte à rebours : résumé et analyse de la septième série de rapports d'étape, 31 juillet 1989, remis par les quatre principales sources d'émission d'anhydride sulfureux de l'Ontario**

Toronto : Ministère de l'environnement, 1990. 19 p. L'éd. anglaise (*Countdown acid rain...seventh...*) : 90-04332/1. MICROLOG 90-05977 1 fiche

Ce programme, mis sur pied en 1985, fixe à 885 kilotonnes par an la quantité maximale d'anhydride sulfureux qui pourra être émise dans la province à compter de 1994. Pour que cette limite soit respectée, des règlements ont été adoptés en décembre 1985 imposant aux quatre entreprises intéressées une réduction précise de leurs émissions de SO<sub>2</sub> entre 1986 et 1994, date à laquelle le plafond autorisé s'élèvera à 665 kilotonnes. Ce document résume les septièmes rapports présentés par ces entreprises (c'est-à-dire les premiers rapports préparés pendant la phase de mise en oeuvre), ainsi que les réponses du gouvernement. EV ON PR SC

**Les Pluies acides, un compte à rebours : résumé et analyse de la sixième et dernière série de rapports d'étape remis par les trois principaux producteurs d'anhydride sulfureux du secteur métallurgique en Ontario**

Toronto : Ministère de l'environnement, 1989. iii, 39 p. MICROLOG 90-05978 1 fiche

Le programme 'les pluies acides', un compte à rebours, créé par voie de règlement en 1986, oblige les quatre grands pollueurs à ramener leurs émissions à un seuil précis d'ici 1994 et à présenter des rapports d'étape semestriels. Au terme d'une phase de recherche-développement d'une durée de trois ans, les entreprises concernées ont remis un rapport final sur leurs plans de lutte contre la pollution; ces rapports sont l'objet de ce document. EV ON PR SC

**Les Pluies acides, un compte à rebours, deux ans plus tard : résumé et analyse de la quatrième série de rapports d'étape remis par les quatre principales sources d'émissions d'anhydride sulfureux de l'Ontario**

Toronto : Ministère de l'environnement, 1988. 11 p. MICROLOG 90-05976 1 fiche

Le programme 'les pluies acides', un compte à rebours, lancé par le gouvernement de l'Ontario en décembre 1985, vise à faire tomber, à l'échelle de la province, les émissions d'anhydride sulfureux (SO<sub>2</sub>) de 2 194 kilotonnes qu'elles étaient en 1980 à 885 kilotonnes en 1994. A cette fin, les quatre sociétés qui produisent environ 80 % des émissions de SO<sub>2</sub> en Ontario sont soumises depuis 1986 à des règlements non susceptibles d'appel qui les obligent à réduire graduellement leurs émissions jusqu'à ce qu'elles atteignent l'objectif fixé pour 1994. Le document donne une description complète du Programme de lutte contre les gaz acides de l'Ontario. EV ON PR SC

**Pneumatic transport of raw material from wharf to tank**

by A. Sangolt. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 3 p. (Canadian translation of fisheries and aquatic sciences ; no. 5318) Originally published in Norwegian. ISSN 0704-3716 MICROLOG 90-02109 1 fiche

Trials with a pneumatic raw material conveyor were carried out in the fall of 1979 and gave promising results. The structure was set up between the wharf and a raw material tank, and trawl fish of various sizes and mackerel were successfully conveyed. This paper describes the system, and compares the pneumatic system with a pumping system. ● CA CF FI SC

**Poids lourds et carburants : tendances et prospective**

par S. Vespa et R.F. Webb. Montréal : Transports Canada, Groupe des politiques et de la coordination, Centre de développement des transports, 1990. 16 p. Bibliogr. Communication pour le 25e congrès annuel Association québécoise du transport et des routes MICROLOG 90-07192 1 fiche

Au cours des 15 dernières années, la productivité des poids lourds a fait un bond impressionnant, sous la double impulsion de l'essor fulgurant dans le domaine du transport de marchandises, où la concurrence est féroce, et de la spirale ascendante du prix des carburants. De 1975 à 1990, le prix du carburant diesel a triplé; il compte désormais pour 15 p. 100 du coût total du transport routier lourd, qui s'établit à près de deux dollars au kilomètre, et il n'est dépassé que par le coût de la main-d'oeuvre. Ce document se penche sur cette question et fournit des détails importants. CA EN SC TR

**Poisonous plants of Canada**

by G.A. Mulligan and D.B. Munro. Ottawa : Agriculture Canada, 1990. 96 p. Bibliogr. French ed (*Plantes toxiques du Canada*) : 90-05909/1. ISBN 0-660-13467-5 MICROLOG 90-05904 2 fiche

This publication contains documented evidence on all the native, naturalized, and cultivated plants of Canada that are known to have poisoned humans or animals, or both. Only the most important of those plants which cause dermatitis are mentioned. Also excluded are those plants that cause injuries because of barbs and spines, poisonous blue-green algae, and plant products or plants that produce toxic substances because of the actions of microorganisms. Plants are listed alphabetically by botanical names, with indices to common names and botanical names. AG CA SC

**Les Politiques institutionnelles d'évaluation des apprentissages dans les établissements privés sous permis**

avis au Ministre de l'enseignement supérieur et de la science. Québec : Conseil des collèges, 1989. 36 p. Bibliogr. ISBN 2-550-19644-9  
MICROLOG 90-01996 1 fiche

La première partie de cet avis présente brièvement les principales caractéristiques des établissements d'enseignement collégial privés sous permis. La deuxième partie fait état du constat établi par la Commission de l'évaluation à la suite de l'examen des politiques et des projets de politique élaborés par ces établissements. La troisième partie explique les raisons qui justifient l'obligation, pour chacun des établissements sous permis, d'élaborer et d'appliquer une politique institutionnelle d'évaluation des apprentissages reconnue comme satisfaisante par la Commission de l'évaluation. Enfin, le Conseil des collèges formule des recommandations à l'intention du ministre.

**Pollination techniques, I : pollen collection**

by P.L. Copis. Chalk River, Ont. : Forestry Canada, Petawawa National Forestry Institute, 1990. 4 p. : ill. Bibliogr. (PNFI technical reports ; 4) ISSN 1180-2618 ISBN 0-662-17944-7  
MICROLOG 90-06804 1 fiche

In most tree improvement programs, the production of progeny with known pedigree through controlled pollination is an essential component, especially after the first generation. This is the first of 3 technical notes describing the procedures used in the production of control-pollinated seedlots. Pollen collection techniques are given, along with information on the timing of dehiscence (pollen release) for different species, based on data gathered over the past 40 years.

**A Population analysis of rock grenadier based on the genetic polymorphism of nonspecific esterases and myogenes**

by B.M. Logvinenko...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 14 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5406) Originally published in Russian, by Legkaya i pishchevaya promyshlennost', at Moscow, U.S.S.R. ISSN 0704-3716  
MICROLOG 90-01538 1 fiche

The rock grenadier is a commercially important deep-sea species that occurs widely in the Northern Atlantic. In order to exploit the rock grenadier efficiently, it is necessary to have some concept of its intraspecific structure. The best results can be obtained by using biochemical genetics, in particular the electrophoretic analysis of enzymes and nonenzyme proteins. This paper examines the results of comparing rock grenadier samples from various portions of its geographic range on the basis of their polymorphic systems of myogenic nonspecific esterases and water-soluble proteins.

**Population characteristics of grizzly and black bears in west central Alberta**

by J.A. Nagy...et al. Edmonton : Alberta Environmental Centre, 1989. iv, 33 p. Bibliogr. MICROLOG 90-02881 1 fiche

The boreal forest in west central Alberta supports one of the few remaining populations of grizzly bears outside of mountain habitats in the province. In 1980, 7,720 sq km of this area were leased to British Columbia Forest Products for long-term commercial rotational cutting and reforestation, raising concerns about the future welfare of the population, as well as that of other sensitive wildlife. This study investigated the population ecology of grizzly bear in the boreal upland ecoregion in the Berland and Little Smoky rivers area in west central Alberta to determine its size, density, productivity and stability. Because grizzly bears

occur sympatrically with black bears in the Berland area, data was also obtained on the population characteristics of black bears. Trapping was conducted in prime spring grizzly bear habitat. Eighteen male and 20 female grizzly and 16 male and 16 female black bears were captured.

### Portrait financier de l'industrie du bois de sciage de 1980 à 1985 : analyse

par D. Paré. Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Direction du développement industriel, Division des études industrielles, 1989. xvii, 68 p. : ill. Bibliogr.  
MICROLOG 90-02756 1 fiche

Le ministère de l'Énergie et des Ressources a réalisé cette étude dans le but de tracer un portrait financier de l'ensemble de l'industrie du bois de sciage, tant au Québec qu'ailleurs en Amérique du Nord. L'analyse repose sur des données financières et économiques qui fournissent des repères pour évaluer et comparer la rentabilité de l'industrie québécoise du bois de sciage. L'étude identifie les facteurs qui en ont déterminé l'évolution de 1980-85. On y quantifie l'impact d'une variation du coût des principaux intrants ou d'une augmentation du prix des copeaux sur le taux de rentabilité. Enfin, l'analyse évalue la rentabilité selon la région au Québec, selon la taille des entreprises et selon le type de produit fabriqué dans l'entreprise.

### The Possibility of obtaining reproductive products and larvae of bivalve mollusks by hormonal stimulation within a specified period

by S.M. Nikitina...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 11 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5423) Originally published in Russian, at Moscow, U.S.S.R. ISSN 0704-3716  
MICROLOG 90-01523 1 fiche

Knowledge of the endocrine regulation of seasonal biological phenomena such as reproduction in invertebrates is important to the development of the biotechnology of breeding commercially promising species. Some steroid and peptide hormones affect the reproduction of vertebrates and in some cases invertebrates, possibly intensifying the metabolic processes in cultivated animals and realizing their reproductive potentials to a fuller extent. This investigation studied the stimulating effect of various hormonal preparations on the spawning of the Black Sea mussel. Experiments were carried out from June-October 1984 and included both the one-time effect of hormonal preparations and their combinations on 26 groups of animals taken from a natural habitat at different stages of the sexual cycle; and injections with the same hormonal preparations 2 and 3 times (groups 2 and 3) at time intervals from 2-6 weeks. The stimulating effect of each hormone was judged by the number of spawning individuals and the quantity of spawned reproductive products.

### Possible effects of intensive harvesting on continuous productivity of forest lands

by S.M. Malondo. Fredericton : Canadian Forestry Service - Maritimes, 1988. iii, 26 p. Bibliogr. (Information report ; M-X-171) French ed. (Effets possibles de la récolte...) on the same fiche. ISSN 0834-066X ISBN 0-662-16415-6  
MICROLOG 90-04044 1 fiche

Intensive (whole-tree) harvesting of natural forest stands is widespread in the Maritime provinces. In some cases, the goal of whole-

tree harvesting is to increase usable biomass, but often foliage and branch components are discarded at the landing site. This report examines the possible effects of whole-tree harvesting on long-term site productivity, and particularly on soil fertility. The report evaluates published data collected from different parts of the world concerning potential decline in soil fertility resulting from the loss of organic matter and base cations caused by different harvesting methods. Biomass and the amount of base cations that would be removed both by conventional and whole-tree harvesting are calculated. Published data from different stands in New Brunswick and Nova Scotia were used to examine the effect of species and site quality on base cation losses and the potential increase in soil acidification which would result from whole-tree harvesting. The consequences of high base cation losses, especially from the infertile acid soils of the region on long-term infertile acid soils of the region on long-term site productivity are discussed.

### Post pillar recovery strategies at Nanisivik Mine, Nanisivik, Northwest Territories, phase 1 : ground control instrumentation and stress determinations

by B. Arjang and G. Herget. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. iv, 41 p. : ill., maps. Bibliogr. (Report ; MRL 89-147(TR))  
MICROLOG 90-05992 1 fiche

The Nanisivik Mine is located at the northern tip of Baffin Island and produces zinc and some lead from a near surface underground mine in permafrost. The potential exists to boost ore recovery from the present 80% by pillar recovery. This report presents the results of a rock mechanics investigation to achieve pillar recovery without serious deterioration occurring in roof and wall strata. The program involved field investigations, laboratory testing, and analysis of excavation stability and monitoring. Field investigations included stress determinations, in situ rock deformation modulus measurements, video inspection of roof competence, installation of strain monitoring and ground movement monitoring systems and core samples for laboratory testing at selected test sites. Pillar recovery is planned to start after the instrumentation for ground control monitoring is completed and a numerical model of excavation stability has been developed.

### La Potasse au Canada, 1980 à l'an 2000

par G.S. Barry. Ottawa : Énergie, mines et ressources Canada, 1989. xii, 123 p. : ill. MICROLOG 90-02831 2 fiche

Ce rapport décrit diverses possibilités de mise en valeur. Il aborde des sujets tels : la situation mondiale actuelle de la potasse, l'industrie canadienne de la potasse, les prévisions mondiales de la potasse, l'équilibre mondial entre l'offre et la demande de potasse, et les possibilités pour le Canada d'accroître la production pendant les années 90. Les annexes du rapport contiennent des tableaux historiques et des prévisions concernant la production, les prix, les tendances commerciales et des statistiques sur la consommation qui ne sont pas facilement accessibles dans d'autres publications. Le rapport donne également des détails sur Canpotex Limited et sur diverses sources d'information et services offerts par les gouvernements provinciaux.

**Potential crushed stone deposits on tidewater in Nova Scotia**

by G. Dickie. Halifax : Dept. of Mines and Energy, 1987. 15 p. : maps. (Open file report ; 87-027) MICROLOG 90-02326 1 fiche

This report describes 5 locations where deposits of aggregate quality rock suitable for the export market occur. Site selection was based on rock types, topography, water depth, and property ownership. Reconnaissance sampling and mapping was carried out and samples of fresh material were obtained using portable drilling equipment. Each sample was crushed to minus 20 mm and splits were taken to conduct tests for Los Angeles abrasion loss, sodium sulphate soundness loss, the petrographic number, and polished stone value. **The Potential effects of tanker traffic on the bowhead whale in the Beaufort Sea**

by W.R. Koski, G.W. Miller and R.A. Davis. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1989. xvii, 150 p. : ill., maps. Bibliogr. (Environmental studies ; no. 58) ISBN 0-662-16734-1 MICROLOG 90-04552 2 fiche

Offshore exploration for oil and gas in waters deep enough to be used by endangered bowhead whales began in 1976 in the Canadian Beaufort Sea and in the 1980s in the Alaskan Beaufort Sea, with the largest find being about 50 km north of the Mackenzie Delta. Original plans called for production beginning in late summer 1988 with a shuttle tanker used to transport crude oil to a large oil tanker stationed off the northwest coast of Alaska. This raised concerns about the potential effects of the increased ship traffic on the bowheads that summer in, and migrate through, the Beaufort Sea. This report integrates the major studies undertaken since 1980 on the potential effects of industrial activity, reproductive biology, and censuses of population size. The report covers the distribution of calves, age

segregation, effects of age on behaviour, photo identification file and data base, micro-scale movements, site fidelity within a season and between-years, known effects of ship traffic, separation of cow-calf pairs, and interference with bowhead movements. CA EV NO SC TR

**The Potential for cogeneration in the commercial sector**

Proctor & Redfern Group. Toronto : Ministry of Energy, 1989. i, 125 p. : ill. MICROLOG 90-01350 2 fiche

The commercial sector is the third largest user of electricity in Ontario, using 21% of the total electricity demand in 1985. This report identifies, assesses the impact, and ranks the most attractive cogeneration opportunities in various commercial establishments where cogeneration would be a viable option given current market conditions and emerging technologies. Identifies the types of buildings considered and their energy requirements, selecting preferred building categories for further assessment of cogeneration potential; reviews current and emerging system technologies; identifies the various factors affecting economic viability, including an economic and sensitivity analysis of the systems; and summarizes building owner and operator requirements and identifies barriers to cogeneration systems implementation. **Potential impact of snow cover of Cape Churchill Wildlife Management Area on a proposed release of muskoxen, *Ovibos moschatus***

by D.W. Soprovich. Winnipeg : Manitoba Natural Resources, Wildlife, Biological Services, 1989. viii, 67 p. : ill. Bibliogr. (Technical report ; no. 89-05) MICROLOG 90-00432 1 fiche

Interest in the reintroduction of muskoxen into Manitoba led to the identification of a suitable site southeast of Churchill and within the Cape Churchill Wildlife Management Area. However, this area is outside the known range, which led to concerns about heavy snow and ice cover and lack of food. A cover map of the Cape Churchill area was prepared using Landsat satellite data and plant frequencies data were collected within several habitat types. This study examined snow conditions within the beach ridge and adjacent fen plant communities of the study area and assessed the potential impact of this important component of the environment upon the proposed release of the muskoxen. #### Precipitation and runoff characteristics, Queen Charlotte Islands

by D.L. Hogan and J.W. Schwab. Victoria : Ministry of Forests and Lands, 1990. v, 46 p. : ill. Bibliogr. (Land management report ; no. 60) ISSN 0702-9861 ISBN 0-7718-8766-3  
MICROLOG 90-03818 1 fiche

Regional evaluation of precipitation and streamflow on the Queen Charlotte Islands. All available hydrometeorological data were consolidated from federal and provincial government agencies. The Queen Charlotte Islands were stratified into regions with homogeneous precipitation regimes and this regionalization was then used to develop relationships between monthly runoff and monthly precipitation. Frequency analyses for large magnitude rainstorms and runoff events

are presented and used to determine the relationship between storm runoff and storm precipitation. For design purposes, where no data exists for storm precipitation characteristics, a statistically significant relationship for estimating mean annual peak flows, based on watershed properties and mean annual precipitation, is presented. Standard hydrology analyses are used.

### **Predation of bivalves by sea stars, with special reference to the predation of *Pseudocardium sybilae* and *Macra chinensis* by *Luidia yesoensis***

by N. Takamaru and I. Sato. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 19 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5218). Originally published in Japanese, in Japan. ISSN 0704-3716  
MICROLOG 90-02691 1 fiche

Sea stars are generally carnivorous and are known to be predators of bivalves in particular. They cause considerable damage to fishing grounds for useful bivalves and are a factor causing large decreases in the number of seed *Andara broughtonii* and *Patinopecten yesoensis* immediately after their release. This study observed the distribution and stomach contents of sea stars along the shore of Notsuke Peninsula in the central part of the Nemuro Strait and the vicinity of the Ryujin Bank. The sea stars were collected in November 1981 using a dredge net, sorted by species and counted, and for some of the specimens the length of the arms, the wet weight and the contents of the stomach were determined. Samples of the substrate were also obtained

using a bottom sampler, and the *P. sybilae* and *M. chinensis* were separated from the substrates. These were collected, and the shell lengths were measured.

### **Prediction of the environmental fate of pentachlorophenol as a function of pH using fugacity models**

by W.P. Mortimer. Toronto : Ontario Hydro, Research Division, 1989. 13 p. : ill. Bibliogr. (Report ; no. 89-55-K).  
MICROLOG 90-03999 1 fiche

The Clean Air Program of the Ontario Ministry of the Environment uses a number of criteria to classify pollutants and to determine the type of emission controls required for a given source of the pollutant. The pollutant's environmental behaviour, including transport, persistence and bioaccumulation is considered in the classification. These factors can be determined experimentally via field or laboratory studies, or through the use of the fugacity level II model if specific data are lacking. The fugacity model uses the physical, chemical and biological properties of a chemical to estimate its environmental fate. In this report, fugacity levels I and II models are applied to pentachlorophenol, the major wood pole preservative used by Canadian utility companies.

### **Prefeasibility of ammonium paratungstate production at the Mount Pleasant Tungsten Mine, New Brunswick**

by J.D. Thibault. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1989. iv, 111 p. Bibliogr. (Open file report ; 89-44). ISSN 0712-4562  
MICROLOG 90-00977 2 fiche

Assessment of the feasibility of ammonium paratungstate (APT) production from ores at the Mount Pleasant Mine and assessment of development for the commercialization of the Mount Pleasant tungsten ore zone. The study also includes an overview of test programs administered by the New Brunswick Dept. of Natural Resources previous to this work. The study is composed of preliminary engineering and production economics for a processing plant but does not include mining or ore handling considerations. Flowsheet design, equipment sizing and mass balance is derived from bench scale testing for the treatment of run-of-mine ore by grinding, gravity separation and chemical processing of APT. Preliminary order of magnitude costs are based on equipment supplier quotes for major equipment and factored equipment costs for a specific duty.

### **A Preliminary assessment of the effect of external abrasion on the smolt-to-adult survival of net-pen cultured steelhead trout**

by P.A. Slaney, B.R. Ward and L. Berg. Victoria : Ministry of Environment and Parks, 1990. i, 111 p. : ill. Bibliogr. (Fisheries technical circular ; no. 88). ISSN 0319-9436 ISBN 0-7726-1078-9  
MICROLOG 90-04748 1 fiche

The effect of external abrasion of smolts on the return rate of maiden adult steelhead was assessed in a preliminary experiment at the Keogh River in south coastal B.C. Abrasion was defined by the incidence of scale loss, fin abrasion and opercular abrasion. Smolts with low abrasion and moderate abrasion were marked and released at similar sizes in the lower Keogh River during early May 1984 and population estimates of returning adults were conducted in 1986 and 1987. In addition, recoveries of adults as upstream migrants and downstream kelts combined were examined for differences between the two abrasion groups.

### **Preliminary data on the presence of periosteal growth lines in the mandible of the harbour porpoise *Phocoena phocoena* L. and their use as age indicators**

by Y. De Buffrenil. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 15 p. (Canadian translation of fisheries and aquatic sciences ; no. 5128). Originally published in French. ISSN 0704-3716  
MICROLOG 90-00544 1 fiche

Until now, all age-determination studies of the harbour porpoise were based on dentinal growth-mark counts. The method is known to have serious limitations because of the structure of dentinal growth marks is variable and dentinal deposition ceases rather early in life. Bone growth marks have not been described in detail in the harbour porpoise or other small odontocetes except *Delphinus delphis*; therefore they have not been put to practical use. This paper shows that sharply defined growth lines exist in the mandibular periosteal bone of the harbour porpoise, and are used to show age indicators.

### Preliminary evaluation of a regional secondary upgrader and satellite mining : Aostri Taciuk process production facilities

by R. Padamsey, M. Farries and R. Ritcey.  
Edmonton : Alberta Oil Sands Technology and Research Authority, 1989. 42 p. : ill.  
MICROLOG 90-00372 1 fiche

During the second half of 1987, the Alberta Chamber of Resources evaluated the concept of a regional upgrader, with a base case developed for production of 30,000 BPCD of bitumen. The upgrader was based on the VEBA combi-cracking technology and was located approximately 30-50 km NE of Edmonton. In order to evaluate the application of the AOSTRA Taciuk Process (ATP) to the concept of regional upgrader, AOSTRA undertook an inhouse study. The ATP is a thermal retorting process developed by AOSTRA which provides for simultaneous extraction and primary upgrading of bitumen derived from mined oil sands. Details are included in an appendix. Consistent with the design basis for the base case, the ATP case employing satellite mining/ATP production facilities, and a regional secondary upgrader was developed and evaluated. This report outlines the methodology used in developing and evaluating the ATP case and summarizes the results.

### Preliminary identification of grade and recovery relationships at the Durham Mine concentrator, Prince William, New Brunswick

by J.D. Thibault. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1989. 61 p. : ill. Bibliogr. (Open file report ; 89-49) ISSN 0712-4562  
MICROLOG 90-01603 1 fiche

Summary of in-plant testing and assessment of antimony recovery limitations at the Dominion Explorers Inc., Durham mine concentrator from June 1986 to March 1987. The work identified and quantified separation limitations so technical

and economic factors could be considered prior to process modifications. In-plant separation data was derived at various time intervals under optimum steady state operating conditions. This report includes an assessment of this data, as well as a technical review of the test program results based on particle size analysis, mass balance and mineralogical data of various process streams and a review of economic criteria and recommendations for future studies on the optimization of antimony separation and recovery. The assessment discusses data from preliminary bench-scale grinding and batch flotation tests on run-of-mine ore and gravity separation tests on secondary cyclone underflow; assays, particle size analysis and antimony particle size distribution data on various process streams for 7 individual in-plant tests; and mass balance calculations for both dry solids and antimony, based on particle size distribution for various flowsheet configurations.

### Preliminary report for the first six months of monitoring in the petroleum refining sector : Dec. 1, 1988 to May 31, 1989

Toronto : Environment Ontario, Water Resources Branch, 1989. 35 p. ISBN 0-7729-6375-4  
MICROLOG 90-01802 1 fiche

The Petroleum Refining Sector Effluent Monitoring Regulation was promulgated in June 1988 and amended in November 1988 to further clarify some requirements. Except for

an initial reporting requirement, which came into force September 1988, the Regulation came into force December 1988. During the monitoring period, data are collected by industry under strict protocols to ministry specifications. Companies are also required to carry out a quality control program to help validate the monitoring data. Besides flow monitoring and sampling for chemical analyses, the dischargers are also required to perform toxicity testing on their process effluents and once-through cooling water. As some validations of data are pending, only the first 6 months of data were reviewed for this report.

#### Preliminary test results comparing heat pump performance of refrigerants R-134a and R-12

by J.W. Linton, W.K. Snelson and P.F. Hearty. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1989. iv, 20 p. : ill. Bibliogr. (Technical report ; TR-LT-017)

MICROLOG 90-07012 1 fiche (Available on fiche only)

Performance comparison tests were carried out on R-134a, which is being considered as a substitute refrigerant to replace R-12. The two refrigerants were tested in a small prototype exhaust air heat pump (EAHP) designed for R-12. Both refrigerants were tested over the same range of air temperatures supplied to the EAHP. From the test data, graphs were plotted to compare performance of the unit as a function of outdoor air temperature. In this report, comparisons are presented of refrigerant evaporating/condensing temperatures and pressures, heating capacities, compressor power requirements, and coefficients of performance. Thermostatic expansion valve behaviour is also described, including the

internal orifice changes which were necessary to provide satisfactory control in the R-134a tests.

#### Le Premier pas vers l'alphabétisation, l'éducation de base et le rattrapage scolaire dans le milieu acadien en Nouvelle-Ecosse

par C. D'Entremont. Halifax : Ministère de l'enseignement supérieur et de la formation, 1990. 120, 70 p. : ill. Bibliogr. Bilingue (The First step...)

MICROLOG 90-06039 2 fiche

En proclamant 1990 Année internationale de l'alphabétisation, les Nations unies ont mis la question de l'alphabétisation à l'ordre du jour dans l'opinion publique et sur la scène politique. L'alphabétisation est devenue l'objet d'un débat intensif aux niveaux provincial, national, et international. Le domaine de l'alphabétisation des francophones a progressé d'une manière spectaculaire ces quelques dernières années. Les francophones du Canada entier sont en train de se rendre compte de l'importance de la dimension à la fois culturelle, sociale et linguistique de l'alphabétisation dans un contexte minoritaire. Ce rapport présente une excellente vue d'ensemble de l'état actuel des programmes de français dans les provinces et territoires canadiens et il identifie certains des obstacles principaux auxquels doivent faire face les minorités francophones de nos jours. C'est dans le cadre de ce contexte plus général que l'alphabétisation des Acadiens de la Nouvelle-Ecosse sera examinée.

**Presentation of a new graph to determine the confidence limits for an estimation of the most probable population using the Petersen method**

by P. Lamarque. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 14 p. ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5444) Originally published in French. ISSN 0704-3716 MICROLOG 90-00625 1 fiche

When the Petersen method is used for estimating a fish population, the population must be broken down by species and length categories to calculate its size and confidence limits, since fishing efficiency varies with these factors. This requires a large number of calculations demanding a great deal of time even when computer programs or office calculators are used. This paper describes a method of estimating a fish population which produces a rapid and easy-to-use graph. It provides symmetrical confidence limits for the most probable fish population as well as the level of precision of the census, thereby making it possible in the field to determine the advisability of extending fishing operations.

**Press and opposition in the Nova Scotia Legislative Assembly**

by S.L. Simm. Halifax : House of Assembly, 1987. 34 p. Bibliogr. MICROLOG 90-00971 1 fiche

The issue is analyzed from the perspective of opposition members and their communications staff. It studies the interplay between the role of opposition parties and the press, what the role of the press should be, and how the press has fulfilled that role. It also ascertains whether consideration of press reaction had any effect on the choice of issues to be raised, and how they were presented by the opposition.

**Pressure history of a gas pipeline**

by O. Vosikovsky. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1990. ii, 7 p. : ill. Bibliogr. (Report ; MTL 90-3(TR)) MICROLOG 90-03376 1 fiche

Extensive stress corrosion cracking (SCC) has been found in Canadian gas pipelines and beginning in 1985, has resulted in several operational and hydrotest failures in lines operated by TransCanada Pipelines (TCPL). Examination of failures and extensive field research revealed that SCC in Canadian pipelines differs from the known 'classical' SCC in that the electrolytes found above SC cracks are dilute and have lower pH (near neutral). The crack tip strain rate generated (among other factors) by stresses from pressure fluctuations in a pipeline is one of the most important parameters controlling the crack growth rate. Since representative pressure histories of gas pipelines are not available, cycle counting was performed on the TCPL pipeline which experienced several service failures. The method of cycle counting and the results - a 1-year pressure sequence to be used in SC crack growth rate tests - are described.

**The Prevalence of healthfulness in Alberta : highlights from the 1985 General Social Survey**

Edmonton : Alberta Health, 1989. 8 p. : ill. CSI 36018.203 MICROLOG 90-06714 1 fiche

Two principal objectives of the survey were to gather time-series data on trends in Canadian Society, and to provide information on specific policy issues of interest. Because of the broad scope of the survey, this report can only present a few points of interest from the results. The focus is on the prevalence of chronic diseases and disability in Alberta as indicated by the results of the survey. Numerical results for Alberta and, where appropriate, a comparison with Canada and other provinces or regions are presented geographically with accompanying discussion in the text.

**Prévention du crime et traitement des délinquants : recueil de ressources sur les expériences canadiennes**

Ottawa : Ministère de la justice, 1990. vi, 81, vi, 74 p. Bibliogr. Bilingue (The Prevention of crime...). ISBN 0-662-57687-X MICROLOG 90-06859 2 fiche

Cet ouvrage a pour objectif d'offrir au lecteur une évaluation des moyens dont dispose le Canada pour répondre à la plupart des points à l'ordre du jour du Congrès qui sont : une liste de texte, de programmes informatiques ou bases de données choisis et de centres d'information; et, une orientation à suivre afin d'en savoir davantage sur l'expérience canadienne. Le recueil de ressources est réparti en sept sections dont chaque sujet est divisé en sous-thèmes présentant un intérêt particulier pour le Canada. Ils expliquent la démarche canadienne et font état des mesures et des lois adoptées récemment. De plus, il présente une liste de centres d'information - organismes, bureaux du gouvernement, etc. - ainsi que certains documents de référence, accompagnés de notes à l'intention des lecteurs qui désirent obtenir de plus amples renseignements.

### Primary and secondary school teachers' salaries in Ontario : a public/private sector comparison : report no. 7

by D. Auld and H. Kitchen. Toronto : Ontario Public Sector Pensions Consultations, 1988. 34 p. : ill. Bibliogr. MICROLOG 90-02983 1 fiche

Examines the trend in Ontario teachers' and professors' salaries for various years, 1966-85, using taxation statistics and comparing these changes to the salaries of other public sector workers and several professional groups. It also reviews trends in base wage rate increases for education workers in Ontario as reflected in collective agreements and compares this data with several other public sector groups and the private sector. In addition, it compares elementary and secondary teachers' salaries in Ontario with similar salaries in all of Canada and other education workers in

Ontario: university professors and college teaching masters. Finally it provides a summary of the data and concludes with some observations on the forces shaping these trends.

### Primary production in the northern Sargasso Sea in September, 1988

by B. Irwin...et al. Dartmouth, N.S. : Bedford Institute of Oceanography, 1990. iv, 93 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 798) ISSN 0706-6465. MICROLOG 90-05165 2 fiche

The cruise was undertaken to collect data to test the existence and magnitude of the hypothetical active dissolved inorganic nitrogen (DIN) flux by diel migrant biota. It was postulated that excretion of DIN by diel migrant zooplankton below the photic zone by day is a significant downward flux relative to the vertical export of particulate organic nitrogen as captured by sediment traps. A single station in the northern Sargasso Sea was occupied for 10 days during which daily estimates of in situ primary production were obtained and estimates of sedimentation rates were calculated from a free-drifting sediment trap array deployed at the beginning of the experiment and recovered at the end of the experiment. This report presents the raw data and some fitted parameters from measurements taken from September 7-21, 1988.

# Priority substances list assessment report no. 1 : polychlorinated dibenzodioxins and polychlorinated dibenzofurans

Ottawa : Environment Canada ; Health and Welfare Canada, 1990. ix, 55 p. Bibliogr. French ed. (Liste des substances...) : 90-04997/1 At head of title: Canadian Environmental Protection Act. ISBN 0-662-17644-8  
MICROLOG 90-04998 1 fiche

The new Canadian Environmental Protection Act requires the Ministers of the Environment and of National Health and Welfare to prepare and publish a priority substances list that identifies substances, including chemicals, groups of chemicals, effluents and wastes which may be harmful to the environment or constitute a danger to human health. The Act requires the

federal Minister of the Environment and the Minister of National Health and Welfare to assess these substances and determine whether they are toxic as defined in Section 11 of the Act. This report assesses the toxicity of the first substances to be evaluated: polychlorinated dibenzodioxins (dioxins) and polychlorinated dibenzofurans (furans), two related families of chemicals. This report is a general summary of the key finds of previous reviews of these two chemicals, using this information as a basis for the assessment of toxicity.

### Private-sector construction in Banff, Jasper and Waterton National Parks in Alberta : economic impacts

prepared for Socio-Economic Branch, Canadian Parks Service, Dept. of the Environment ; by Thompson Economic Consulting Services. Calgary, Alta. : Thompson Economic Consulting Services, 1989. iii, 27 p. MICROLOG 90-02391 1 fiche

Examines private-sector development within these parks over the last five fiscal years from 1984-85 to 1988-89. It determines the impacts of this spending on the Alberta economy in terms of the increases in provincial employments, gross domestic product, and labour income resulting from the construction of these private-sector projects. It describes the methodology and information sources used to assess the economic impacts of private-sector spending, and includes a number of important assumptions about which types of spending are applicable. Finally, it presents the extent and impacts of the private-sector construction in each of the parks, and summarizes the overall findings of the analysis.

### Procedure for water analysis of hydraulic fluids using the Karl Fischer apparatus

by K.J. Mintz. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. iii, 12 p. : ill. Bibliogr. (Report ; MRL 89-78(TR)) MICROLOG 90-00172 1 fiche

Hydraulic fluids are used extensively in underground mine equipment, but because of the possibility of fire, such fluids are required to be fire-resistant, using an oil-in-water emulsion, rather than the usual mineral oil. It is therefore essential that there be an accurate means of measuring the water content. A Metrohm automatic Karl Fischer titrator was used successfully for 3 years for measuring the water content of fire-resistant hydraulic fluids. This report describes the method, apparatus and procedure to be followed, including also a detailed analysis of possible errors.

### Processing of selected New Brunswick gold resources

by R.D. Harris. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1990. iii, 34 p. : ill. Bibliogr. (Open

file report ; 90-3) ISSN 0712-4562  
MICROLOG 90-02659 1 fiche

Gold mineralization has been found in several areas of New Brunswick. This study assessed the processability of the Alcida deposit (held by Corona Corporation), the Cape Spencer deposits, and the Lake George gold occurrence (Durham Resources Inc.). These areas were selected on the basis of their accessibility as well as their potential as gold ore types. Leaching test work was conducted on the samples using sodium cyanide as the main leachant and brominated hydantoin (Bio-d) for specific samples; both rolls and column leaching techniques were used. Basic optical mineralogy and a suite of cursory gravity concentration tests were also completed for all samples from the 3 locations.

### Processing studies of bitumens/heavy oils produced by recovery methods of a diverse nature : final report

by D.W. Soveran and E.N. Ogu. Saskatoon, Sask. : Saskatchewan Research Council, 1989. vi, 36 p. : ill. (SRC publication ; no. P-110-120-E-89) CANMET contract: 59222-01-SQ.  
MICROLOG 90-05656 1 fiche

Project to develop a database of the processing characteristics and product qualities of bitumens and heavy oils produced by a variety of recovery methods. Five 343C resid fractions, derived from Murphy Eyehill fireflood enhanced oil recovery (EOR) and primary production heavy oils, Cold Lake bitumen extracted from core, and Marguerite Lake bitumen produced by a combination of steam and fireflood EOR methods were used for the experiments. Both the desalted and undesalted versions of the Eyehill primary crude were evaluated. Feedstocks from the same or a similar bitumen/heavy oil production locale were evaluated under identical process unit operating parameters. Hydroprocessing experiments were performed to determine the degree of removal of contaminants (sulphur, nitrogen and trace metals), liquid product and gas yield distribution structure, conversion of resid (525C) fraction and to assess the response of each feedstock to typical hydrocracking conditions.

### Processus d'approbation des demandes d'aménagement et d'exploitation : pour un système d'aménagement plus efficace

Comité de direction formé du gouvernement, de l'industrie et de l'AMO. Toronto : Ministère du logement ; Ministère des affaires municipales, 1989. 21, 20 p. *Bilingue (The Planning and development...)*. ISBN 0-7729-5711-8  
MICROLOG 90-01142 1 fiche

Le rapport porte sur les conclusions et les recommandations du Comité de direction formé du gouvernement, de l'industrie et de l'AMO dont le but est d'améliorer le processus d'approbation des demandes d'aménagement et d'exploitation. L'objet du rapport est de fournir des renseignements sur les activités et les recommandations du comité; d'examiner les recherches sur la réforme de la réglementation dans les secteurs de la construction et de l'exploitation; d'identifier les processus qui peuvent être modifiés aux échelons provincial et municipal afin d'accélérer le processus d'approbation des demandes d'aménagement et d'exploitation; recommander au gouvernement provincial et aux administrations municipales des changements pour réduire de 50 pour 100 le délai normal d'approbation; et déterminer les sujets connexes qui devront faire l'objet d'études approfondies. Ce document constitue le rapport final sur le sujet.

### Product and process development in the Canadian automotive sector

Ottawa : Industry Science and Technology Canada, Automotive Directorate, 1990. 49 p. : ill. Bibliogr.  
MICROLOG 90-05798 1 fiche

This paper attempts to establish a consensus concerning the state of product and process development in the automotive industry, focusing on problems and challenges faced. The paper was first circulated in July 1989 and this version incorporates comments made by industry and governments, and presents a generally accepted view of issues facing the Canadian automotive industry as it adapts to technological change. The report discusses innovation theory and activity; the general characteristics and level of R&D; the changing environment for the industry and its response; government programs, and international comparisons.

### The Product potential for Atlantic mackerel : an industrial survey

by W. Uebel. St. John's : Dept. of Fisheries and Oceans, Fisheries Research Branch, 1988. vi, 38 p. (Canadian technical report of fisheries and aquatic sciences ; no. 1708) ISSN 0706-6457  
MICROLOG 90-02241 1 fiche

A selected sample of the eastern Canadian fish processing industry and its trade organizations was surveyed to review the 1974/75 mackerel development program and to determine the current product potential for Atlantic mackerel. This report gives an overview of the survey and includes abstracts of the opinions expressed and comments made by processors on issues which are not necessarily directly related to the study objectives but which may have indirect bearing on the development of the mackerel resource.

## La Production du bleuët nain -- Rév.

par C.R. Blatt...et al. Ottawa : Agriculture Canada, 1989. 61 p. : ill. *L'éd. anglaise (Lowbush blueberry production)* : 90-02469/1. ISBN 0-662-95585-4 MICROLOG 90-02468 1 fiche

La production du bleuët nain au Canada est pratiquement limitée à l'est du pays, région dont le climat tempéré convient parfaitement à cette plante indigène. La majorité des bleuëtières ont été établies sur des terres agricoles abandonnées ou épuisées, en particulier en Nouvelle-Ecosse et au Nouveau-Brunswick. Au Québec, un grand nombre de bleuëtières ont pris la place d'anciens peuplements de pins gris. Le document examine particulièrement la production et la gestion, les mauvaises herbes; les maladies et les dommages, la récolte et l'entreposage.

by T. Tanaka, A. Sato and K. Kawamura. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 4 p. (Canadian translation of fisheries and aquatic sciences ; no. 5294) *Originally published in Japanese.* ISSN 0704-3716 MICROLOG 90-02121 1 fiche

In the past, the adults used for egg collection were mainly sown in Kawauchi. As their recent state of maturation became unsatisfactory, scallops which had been produced in the Funka Bay of Hokkaido, were also used. This was done to carry out artificial seed collection after the spawning season among the adults produced in the Mutsu Bay had ended. The method adopted for rearing was almost the same as that used in the past. This paper describes these experiments.

## Profil de l'industrie : aliments pour animaux

Ottawa : Industrie, sciences et technologie Canada, 1988. 7, 7 p. *Bilingue (Industry profile : animal...)*. CSI 21149.257. MICROLOG 90-00900 1 fiche

L'industrie des aliments pour animaux regroupe les établissements dont les activités principales sont la fabrication d'aliments complets, de

prémélanges (composés de vitamines, de minéraux et parfois de médicaments) et de suppléments alimentaires (composé de prémélanges et de concentrés protéiniques). L'industrie des aliments pour animaux dessert le marché intérieur local. Les exportations d'aliments en vrac sont presque entièrement limitées à des expéditions frontalières dans les États américains voisins. Elles proviennent surtout de l'Ontario et du Québec et représentaient 36 millions de dollars en 1986. Le document donne le profil de l'industrie des aliments pour animaux et en fournit la structure et le rendement, les forces et les faiblesses, l'évolution de l'environnement et l'évaluation de la compétitivité.

Ce document porte sur l'industrie de l'imprimerie commerciale qui regroupe les établissements spécialisés dans la production d'une grande variété d'articles imprimés destinés à tous les secteurs de l'économie, tels le matériel publicitaire et les formulaires commerciaux. En 1986, le nombre estimatif d'entreprises canadiennes dans ce secteur était de 2 900, avec quelque 3 125 installations et 57 000 emplois. La valeur des expéditions se chiffrait à environ 4,8 milliards de dollars. Cette industrie est surtout axée sur le marché intérieur. En 1986, les exportations s'élevaient à 180 millions de dollars, et les importations à 393 millions. Le commerce extérieur se fait surtout avec les États-Unis qui, en 1986, achetaient 89,1 p. 100 des exportations canadiennes et comblaient 79,7 p. 100 de nos besoins d'importation.

### Profil de l'industrie : ingénieurs-conseils

Ottawa : Industrie, sciences et technologie Canada, 1988. 9, 9 p. *Bilingue (Industry profile : consulting...)*. CSI 21149.265.  
MICROLOG 90-00907 1 fiche

Ce document porte sur l'industrie canadienne des services d'ingénieurs-conseils. Cette industrie, en majeure partie sous contrôle canadien, regroupe des cabinets-conseils s'occupant surtout de fournir les services de génie liés à la conception et à l'exécution de projets d'immobilisations. En 1986, l'industrie des ingénieurs-conseils regroupait 3 500 sociétés employant 52 000 personnes. Elle a réalisé un chiffre d'affaires d'environ 3,42 milliards de dollars, dont quelque 450 millions, soit 13 p. 100, provenaient de projets exécutés à l'étranger. Les entreprises de ce secteur comptent en moyenne 15 employés, les plus petites en comptant un seul, les plus grandes, plus de 4 000. L'emploi se répartit comme suit : entreprises de 200 employés et plus, 40 p. 100, entreprises de 50 à 200 employés, 30 p. 100, entreprises de moins de 50 employés - les plus nombreuses - 30 p. 100 également.

### Profil de l'industrie : publicitaires

Ottawa : Industrie, sciences et technologie  
Canada, 1988. 6, 6 p. *Bilingue (Industry profile : advertising...)*. CSI 21149.255.  
MICROLOG 90-00897 1 fiche

La publicité est un moyen de communication dont la fonction première est de commercialiser, avec efficacité et persuasion, les produits et les services des producteurs aux consommateurs. Cette industrie canadienne peut se diviser en 4 sous-secteurs: les agences de publicité, les représentants des médias, les bureaux d'étalage et d'affichage publicitaires, et les autres services de publicité. Le chiffre d'affaires réalisé grâce à la vente de publicité par les médias donne certaines indications de l'importance du marché de la publicité; en 1987, il s'élevait à 7,7 milliards de dollars. La publicité dans les journaux compte pour 31 p. 100 de ce total; la radio et la télévision, 25 p. 100, la vente par catalogue et la publicité directe, 23 p. 100, les périodiques, 13 p. 100, les panneaux publicitaires et autres moyens, 8 p. 100. Le document donne le profil de l'industrie publicitaire et donne la structure et le rendement, les forces et les faiblesses, l'évolution de l'environnement, l'évaluation de la compétitivité.

MICROLOG 90-02685 1 fiche

Results of a study on the profitability of fish farming undertaken in 1982, based on questionnaires from 106 selected fishbreeding enterprises in Norway out of a total of 304. Financial and other data was collected from enterprises with a capacity of over 500 cubic metres, concentrating on the breeding of food fish. Data is given as national averages, regional averages, and earnings potential per man-year for individual enterprises.

**Profitability, employment and fleet adjustment**

by J.S. Johnsen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 137 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5260) *Originally published in Norwegian, by the Research Institute for Fisheries Technology at Tromsø.* ISSN 0704-3716  
MICROLOG 90-02731 2 fiche

The profitability of the Norwegian fisheries industry has decreased steadily since 1964 as illustrated by increasing annual subsidies. This report presents an analysis of a fish processing plant and the permanent onshore and offshore fleet that services it. The trawlers are owned by the industry, but the rest of the fleet is legally independent of the industry. A model was produced to achieve the highest possible marginal revenue for both fleet and processing industry as one unit. The production costs of the industry are considered fixed, while the fleet structure and the costs of fishing are considered variable elements. Employment intensity was calculated and compared for the inshore (seine and net) fleet and the offshore trawlers. Long-term storage

of pollock and re-freezing are used to achieve a balanced year-round production, the costs of which are calculated. Total financial results and employment figures were calculated for 5 different production strategies.

**Le Programme canadien d'immigration**

par M. Young. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. ii, 40 p. (Etude générale, BP-190F) *L'éd. anglaise (Canada's immigration program) sur la même fiche.* ISBN 0-660-92695-4  
MICROLOG 90-01914 1 fiche

Le programme d'immigration du Canada se fonde sur la 'Loi sur l'immigration' modifiée tout dernièrement par les projets de loi C-55 et C-84 relatifs aux réfugiés. Deuxièmement, il est régi par les règlements, la législation subordonnée promulguée par le gouverneur en conseil en vertu des pouvoirs prévus dans la Loi. Troisièmement, il est régi par les quatre composantes du Guide d'immigration, dont trois sont à la disposition du public. Ce guide porte sur la Loi sur l'immigration et contient des directives et des instructions très détaillées destinées aux responsables de l'administration du programme. On se penche particulièrement sur les points suivants: les catégories d'immigrants, le rôle des provinces; l'Accord du Lac Meech, et, les visas de visiteurs.

### Project results, 1989 : soil and crop improvement associations

Halifax : Dept. of Agriculture and Marketing, Soils and Crops, 1989. 122 p. : ill.  
MICROLOG 90-04981 2 fiche

Short overview of projects conducted for forage crops, cereal crops, corn crops, and various other crops in Nova Scotia. For each project, information is given on location, soil type, plot size, experimental design, establishment data, fertilizers used, objective, and results. Coverage includes seeding, harvesting, adaptability of various crops to various soils, use of herbicides and pesticides, and the evaluation of hybrids.

### Project to continuously monitor the performance of the laminar air flow super window, humidity controlled air inlet, baseboard heater ventilation and heating system : report

prepared by G.K. Yuill and Associates ; for Willmar Window Industries Ltd. Ottawa : Canada Mortgage and Housing Corporation, 1989. iii, 87 p. : ill.  
MICROLOG 90-06837 2 fiche

The Laminar system is a means of supplying preheated ventilation air to individual rooms in a house. The system consists of a triple glazed window which draws outdoor air into the house, a central exhaust fan and humidity controlled air inlets in each room; and baseboard heaters to supply the fluctuating heat demands of the rooms. This report summarizes the work on a project to demonstrate and monitor the performance of the system installed in a newly constructed house in Winnipeg, Manitoba. The project identified the benefits and deficiencies of using the system in new energy efficient housing by conducting one time/pre-occupancy measurements of airtightness and air infiltration and carrying out continuous monitoring under normal occupancy conditions of various temperatures, relative humidities and exhaust fan flow rates.

### The Proper place of man and machines, revisited

by E. Macklovitch. Laval, Que. : Dept. of Communications, Canadian Workplace Automation Research Centre, 1988. 3 p. In Circuit no. 19, 1987. French ed. (Rôles propres de l'homme...) on the same fiche. ISBN 0-662-16411-3  
MICROLOG 90-05460 1 fiche

In 1980, Martin Kay published an article entitled 'The proper place of man and machines in language translation'. In it, he advanced the controversial position that machine translation (MT) of the fully automatic variety has very little to offer in the way of practical solutions for the growing demands being placed on professional translators because what is not understood cannot be automated. As an alternative to fully automatic MT, Kay advocates machine-aided human translation in the form of a translator's workstation which includes a sophisticated dictionary function and word processing abilities. This report describes the progress of the CWARC in designing workstations, while at the same time critiquing some of Kay's statements.

**Property modification of a de-icing agent**

by K.F. O'Driscoll and K.G. Suddaby. Toronto : Ministry of Transportation, Research and Development Branch, 1988. ii, 50 p. : ill. Bibliogr. MICROLOG 90-02323 1 fiche

The Ministry recently began to use a new open graded friction road surface in certain areas. The new surface is porous, thereby preventing hydroplaning by allowing drainage through the road surface. However, the increased drainage rates also allow road salt to be drained off as a concentrated brine, therefore necessitating more frequent salt applications. This report provides an overview of a study which investigated the feasibility of using polymers to reduce the high cost of de-icing open graded friction courses. Possible methods are discussed, along with a series of tests designed to determine their effectiveness. The results of these tests are summarized and interpreted. ON PR SC TR

presentation to the Standing Committee on Finance and Economic Affairs. Toronto : Association of Municipalities of Ontario, 1989. 10 p. Bibliogr. (AMO report : report series 1989 ; 89-4) MICROLOG 90-01021 1 fiche (Available on fiche only)

This document discusses provincial priorities at municipal expense, the shifting of provincial government responsibilities to municipalities, and contradictory evidence concerning whether the province is facing economic hardship. CO MU ON PA

**A Proposal for a major research project on rockbursts**

by J.E. Udd. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1984. v, 18 p.

(Report ; MRL 84-84(TR)) MICROLOG 90-03953 1 fiche

Rockbursts, such as occur in the Canadian pre-Cambrian Shield, are attributed to stress redistributions which accompany mining in hard rock formations. Microseismic activity, which accompanies the stress increases preceding rockbursts, appears to locate in areas in which rockbursts may occur and may therefore provide a means of short-term prediction. Although microseismic systems have been used experimentally in mines for many years, marginal advances in methodology and equipment development have limited their use. This proposal includes 2 phases, the first of which involves studies at 2 Sudbury mines using extensive conventional state-of-the-art microseismic studies with an advanced prototype system permitting detailed seismic event analysis at an important Ontario mine, and local area mine monitoring trials at several other small mines with a basic microseismic system. The 2nd phase involves trials to determine the effects of bulk mining methods, with various forms of backfill support, on local and regional stability conditions. Costs and time are given for each phase. • CA CM NR ON PS SC

**A Proposal for a research program on ferrites in the Mineral Sciences Division of the Mines Branch**

by N.F.H. Bright, A.H. Webster and I.F. Wright. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1965. iii, 28 p. Bibliogr. (Report ; MS 65-98) MICROLOG 90-04683 1 fiche

Outline of a proposal for a program of research on the hexaferrite system BaO<sub>6</sub>Fe<sub>2</sub>O<sub>3</sub>-PbO. 6Fe<sub>2</sub>O<sub>3</sub>-SrO.6Fe<sub>2</sub>O<sub>3</sub>. The program would prepare ferrites of compositions throughout this system by co-precipitation, fabricate them into ferrite shapes by ceramic procedures and then test their magnetic properties. Studies would also be made of the crystallographic properties of composition in this system. The work would later be extended to cover other possible compounds and compositions in the system BaO-SrO-PbO-Fe<sub>2</sub>O<sub>3</sub>. A study of the kinetics of ferrite formation may be made, as well as of the formation of oriented ferrites. The proposal describes in detail these areas of the program, its initiation, personnel and administrative considerations and future work. • CA CM NR PS SC

**A Proposal for environmental research and monitoring of organic pollution caused by salmonid mariculture in the Bay of Fundy**

by D.J. Wildish...et al. St. Andrews, N.B. : Dept. of Fisheries and Oceans, Marine Fish Division, Biological Sciences Branch, Biological Station, 1990. iii, 24 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1724) This is the two hundred and sixth technical report of the Biological Station, St. Andrews, N.B. ISSN 0706-6457 MICROLOG 90-03430 1 fiche

Within the Bay of Fundy, the growout of salmonids in seawater net-pens is a relatively recent and successful economic venture. In 1988, this industry was still expanding from existing sites and continued to expand in 1989 through new sites. This report presents a concept of the environmental problems likely to be encountered as the culture of salmonids in seawater net-pens becomes more intensive in the Bay of Fundy. Omitted from consideration are disease transmission and contaminant chemicals (such as therapeutants - inclusive of antibiotics, pesticides, hormones and antifoulants used in construction materials). Research and monitoring methods are suggested which should allow the environmental effects anticipated to be

temporally assessed as well as contributing ultimately to a predictive management model suitable for determining the holding capacity of salmonid culture areas. • AP CA CF EV FI SC

**Proposal for movement of solids**

by J.H. Walsh. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1963. 5 p. (Report ; FMP 63/78-SP) At head of title: Working party on movement of solids : report no. 8. MICROLOG 90-04532 1 fiche

Proposal for the movement of solids using the overall French concept for a mobile pipeline, but differing materially in the choice of propulsion and suspension methods. This paper describes the suspension and capacity, along with a suggestion for an experimental unit. • CA CM NR PS SC TR

**Proposals and discussions regarding standard specifications for classification of coal by rank ASTM D 388-38**

by L.H. King. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1962. 16 p. (Report ; FMP 62/38-RBS) MICROLOG 90-04535 1 fiche

Review of the current issues before Subcommittee XVII pertaining to classification of coals. These issues include classification of lignitic coals; differential of subbituminous A and high volatile C bituminous coals; considerations related to the use of the term 'rank' in conjunction with commercial coal preparation; discussion of errors in ash determination resulting from the retention of significant amounts of SO<sub>3</sub> in the ash of low rank coals; and consideration of classification systems other than D 388-38. Tentative proposals are presented for the first two and discussions were held on the other issues. • CA CM NR PS SC

**Proposed Alberta environmental protection and enhancement legislation : for public discussion and response**

Edmonton : Alberta Environment, 1990. 2 v. Contents: Vol 1 : A Guide -- vol. 2 : Appendix A, discussion draft. MICROLOG 90-05850 2 fiche

The proposed Act was developed in draft form to allow Albertans' input into this new legislation. This guide is designed to assist in the public consultation process by summarizing the key areas of the proposed legislation as well as by indicating which areas represent existing, enhanced, and new legislative provisions.

### The Proposed Alberta-Pacific Pulp Mill : report

Alberta-Pacific Environmental Impact Assessment Review Board. Edmonton : The Board, 1990. 114 p. : ill., maps. MICROLOG 90-07314 2 fiche

The Board was established jointly by the Alberta and federal governments to conduct an environmental review of the bleached kraft pulp mill proposed by Alberta-Pacific Forest Industries Inc. for the County of Athabasca no. 12. The Board reviewed the environmental impacts of the proposed mill and the effects of timber harvesting on Indian Reserve Lands, but did not review harvesting in general and the proposed Forest Management Agreement. Public hearings were held from November to mid-December. This report describes the proposed mill, the issues involved, the effects of the mill effluent on the Athabasca River, including chlorinated organic compounds, dissolved oxygen, and other pollutants; the effects of timber harvesting on Indian lands; effects on the area surrounding the site, and other effects such as navigable waters, recycling, global warming, endangered species, timber harvesting in Wood Buffalo National park, and ecological reserves. Recommendations are included.

### Proposed modification to lithium battery test specifications : a report presented to ICAO Oct., 1989

University of Ottawa. Electrochemical Science and Technology Centre. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1990. xiii, 61 p. MICROLOG 90-07209 1 fiche

Because of the proliferation of lithium battery usage, a need exists to review the rules governing the general carriage of such batteries. Particular concerns involve passengers unwittingly carrying on board aircraft equipment which contains lithium cells/batteries, and the desire of manufacturers to transport their products as quickly as possible to the marketplace. This study reviews battery design criteria and how it relates to safety and existing rules governing transportation of lithium cells/batteries, discusses existing rules and experiences with interested parties such as regulatory authorities, the manufacturing industry, carriers and users; and proposes test criteria which will immediately categorize cells/batteries into groups for appropriate shipment.

### Proposed research study for plumbing noise control in Canadian buildings : client report

for Canada Mortgage and Housing Corporation. Ottawa : Institute for Research in Construction, 1989. 25 p. : ill. Bibliogr. MICROLOG 90-03775 1 fiche

Recommendations made for control of plumbing noise in buildings contain almost no quantitative or practical information that relates directly to the North American style of lightweight building. This report determines, in a controlled environment, the effectiveness of commonly prescribed techniques for control of plumbing noise in buildings. The project deals primarily with lightweight wood and metal stud construction and includes a description of the research work, a summary of factors influencing the level of plumbing noise, test and rating procedures from Europe and the International Standards Organization, and recommended procedures for quiet plumbing installations.

### A Proposed strategic plan for Ontario fisheries

Toronto : Ministry of Natural Resources, 1989. 3 v. Bibliogr. Contents: Vol. 1 : Discussion paper -- vol. 2 : SPOF II : explanatory booklet -- vol. 3 : SPOF II : draft MICROLOG 90-01797 1 fiche

By the early 1970s there was increasing concern over the deterioration of fish stocks in Ontario and elsewhere in Canada due to overfishing, land development, the introduction of exotic species and pollution. A federal-provincial task force was appointed in 1974 to recommend broad courses of action to deal with these and other issues. This group produced a document in 1976 which has guided the development of the fisheries since then. In 1987 it was decided to review this strategic plan and either reaffirm or adjust it to meet the need of the 1990s and beyond. This discussion paper is the result of that review and covers the need for sustainable development; the issues affecting fisheries management, including declining aquasystem health and loss of fish habitat, loss of fish, shareholder conflicts, underlying causes, and consequences; and the objectives and guiding principles of a strategic plan for Ontario fisheries.

### Propositions pour le contrôle de l'enneigement des autoroutes canadiennes

par H.A. Baker et C.J. Williams. Montréal : Transports Canada, Groupe des politiques et de la coordination, Centre de développement des transports, 1990. xiii, 109 p. : ill. Bilingue (Guidelines for controlling...). MICROLOG 90-07198 2 fiche

Le but de ce guide est de fournir aux équipes d'entretien des lignes directrices à suivre lorsqu'elles tentent de résoudre des problèmes d'accumulation de neige sur les routes publiques. L'idée fondamentale de ce guide est de réduire le phénomène de poudrière à proximité des autoroutes à l'aide d'équipement placé face au vent tel que des clôtures à neige ou de modifications au paysage ou au terrain adjacent. Il est à remarquer que, en raison des hivers peu communs durant le cours de cette étude et du nombre limité de données en provenance de l'Est du Canada, les méthodes utilisées dans le calcul du mouvement de la neige ne sont qu'approximatives. Les buts ultimes poursuivis dans ce document consistent à améliorer les méthodes actuelles de contrôle d'accumulation de la neige et en développer de nouvelles dans l'intention de rendre les autoroutes plus sécuritaires et de réduire les coûts d'entretien associés à l'enlèvement de la neige.

**La Prostitution de rue : effets de la loi, Toronto**

par S. Moyer et P.J. Carrington. Ottawa : Ministère de la justice, 1989. xv, 257 p. Bibliogr. L'éd anglaise (Street prostitution Toronto) : 90-04182/3  
MICROLOG 90-05318 3 fiche

Il est généralement admis que la prostitution de rue est devenue un problème communautaire à Toronto à la fin des années 1970, suite à la fermeture des studios de massage de la rue Yonge. En 1977, on découvrit sur le toit d'un studio de massage le corps d'un jeune homme - Emmanuel Jacques, un cireur de chaussures qui travaillait dans les rues Yonge et Dundas toutes proches de là. Cet événement a déclenché une tempête de protestations qui ont amené l'adoption d'un règlement municipal autorisant la police à fermer les studios de massage qui bordaient la rue Yonge sur quelques blocs au nord de la rue Dundas. Ce document se penche sur la question de la prostitution à Toronto.

Ottawa : Transport Canada, Research and Development Centre, 1983. 3 v. : ill. Bibliogr. Contents: Vol. I : Assessment of protection schemes -- vol. II : Detail design of protection schemes -- vol. III : Test results, analysis, and discussion.  
MICROLOG 90-00365 6 fiche

Study to develop a method of protecting the propellers of Arctic class icebreaking vessels so that they do not come in contact with large fragments of ice. Vol. I reports on the investigation and evaluation of propeller protection schemes applicable to single and multi-screw ships. The major concepts identified and investigated are ducts (nozzles), ring propellers, deflecting fins, bilge keels, propeller cages, open (partial) tunnels, and in-hull propulsion systems. Various devices within each concept are developed and each device is critically reviewed. Having established the most promising protection schemes, the concepts are

developed in vol. II, using the hull forms of POLAR 7 (3-screw), PIERRE RADISSON (2-screw), and MV ARCTIC (1-screw) as a basis. Propeller design and means of manoeuvring are addressed for each case. Vol. III analyses the results obtained from a series of ship model tests.

This publication presents the proposed Capital Construction projects for 1990-91. It includes new highway projects to commence this fiscal year as well as unfinished contracts from previous years that will have significant expenditure this year. The projects provide for rehabilitation of existing highways and bridges as well as construction of new links, to relieve congestion and support economic development. Also included are projects to be undertaken by the Ministry for other authorities or agencies under cost sharing agreements. Information is given on both specific activities by type and by district, as well as a financial summary of Northern Ontario.

### Provincial highways : traffic volumes, 1988 : King's highways, secondary highways, tertiary roads

Toronto : Ministry of Transportation,  
Transportation Capital Branch, Highway  
Planning Office, 1989. v. 184 p. : ill.  
CSI 55120.006. ISSN 0822-6873  
MICROLOG 90-06070 3 fiche

Annual report for 1988 on traffic volume on the provincial highway network on the King's highways (Queen Elizabeth Way, highways 2-169 and the 400 series), secondary highways, tertiary roads and selected 7000 series highways. The report presents a series of overall system summaries on traffic volume and accidents, travel experience, highway distance by classification and number of lanes. Data are presented by highway. Includes: location

description, length of the section in kilometres, pattern of traffic type, annual average daily traffic, summer average daily traffic, summer annual weekday daily traffic, and winter average daily traffic.

### Provincial legislation affecting unaccompanied refugee minors : research abstract

Ottawa : Employment and Immigration Canada,  
Immigration, 1989. 5, 5 p. *Bilingual (Les Lois  
provinciales ayant...)* ISBN 0-662-56902-4  
MICROLOG 90-02968 1 fiche

The main focus of this study is the situations of young people who enter Canada to live in foster homes or group homes, and not with family members, or who have uncertain prospects for their care in Canada. It examines how provincial statute and case laws affect these unaccompanied refugee minors. It is concerned with guardianship and tutorship, access to education, adoption of unaccompanied refugee minors after their arrival in Canada, and application of child-protection statutes to unaccompanied refugee minors.

### Provincial tax reforms : options and opportunities

by D.W. Conklin and F. St-Hilaire. Halifax :  
Institute for Research on Public Policy, 1990.  
xi, 192 p. Bibliogr. CSI 99545.201. ISBN  
0-88645-111-6  
MICROLOG 90-06863 3 fiche

This publication is intended to provide for the non-specialist a fresh look at provincial tax reform options and opportunities. Part I begins with the basic principles of tax reform, considering alternative objectives and general options in tax design. Part II examines the current differences among provincial economic circumstances and the tax structures. Part III deals with the process and implications of federal tax reform, from the 1987 proposals to the GST draft legislation

### Provisional domestic substances list

Ottawa : Environment Canada, 1990. 2 v.  
*Bilingual (Liste intérieure provisoire...)*  
Contents. Vol 1 : Registry number index --  
vol 2 : Substance name index At head of  
title: Canadian Environmental Protection Act  
ISBN 0-662-57463-X  
MICROLOG 90-06843 10 fiche

The Canadian Environmental Protection Act was proclaimed on June 30, 1988. While most of the Act's provisions were implemented immediately, the new substances notification and assessment provisions cannot be initiated until the domestic and non-domestic substances lists, called for by Section 25 of the Act, are in place. Environment Canada is in the process of preparing the domestic substances list (DSL). This document contains two indices to the provisional DSL. Vol. 1 is a registry number index listing chemical abstracts (CA) service registry numbers in ascending numerical sequence followed by the associated CA index name and the molecular formula when the substance is well defined. Vol. 2 contains a substance name index alphabetically ordering the listing of substance names, including the CA index name, CAS synonyms for each substance on the provisional DSL and unambiguous substance names provided by submitters, in the language used for nomination.

Discusses public participation in a procedural review report and public inquiries and complaints. Other functions and responsibilities include general supervision of utilities, municipal supply contracts and special franchise agreements, milk prices, duties pursuant to the Electric Energy Marketing Act, municipally-owned utilities, rural gas utilities, complaints under the NOVA Corp. of Alberta Act, appeals of the Alberta cost of service, compensation fixing duties, the Energy Resources Conservation Board hearings, gas processing costs and inquiries. A list of applications to the Board is included, as well as an overview of responsibilities and administrative functions. AL PR PW SC ST

**Public Works Canada's dredging operations at the mouth of the Red River : environmental effects**

by D. Povoledo. Ottawa : Environmental Protection Service, Western and Northern Region, 1990. iii, 37 p. : maps. Bibliogr. (Report : CP(EP) WNR 89/90-9) MICROLOG 90-06744 1 fiche

Routine dredging operations are performed by Public Works Canada (PWC) downstream of the city of Winnipeg, to ensure navigability of the Red River and Lake Winnipeg and for recreational, fisheries and commercial activities. Twelve sites were selected in 1987, 3 of them in the Red River and 9 in the lake or at other tributary mouths. This report presents the results of a preliminary study on the level of inorganic and organic contaminants present in the dredged sediment at the mouth of the Red River to establish whether additional sampling is warranted and to assess the environmental acceptability of current PWC dredging practices. The study area is the mouth of the Red River where it enters Lake Winnipeg and sampling was done in June before and in August after 1987 dredging operations. • CA EV MS PA SC

**Pucerons infestant les crucifères au Canada**

Cette publication permet l'identification rapide et fiable, sur le terrain, des pucerons qui infestent les crucifères. Les tableaux d'identification sont utiles pour reconnaître les milliers de pucerons trouvés dans le monde. On y examine principalement les pucerons verts du pêcher, du chou et du navet. Finalement, la publication jette un regard sur les autres pucerons et sur le cycle biologique de ces derniers. AG CA SC

**The Pulp mill pollution problem in Neroutsos Inlet, B.C.**

by D.J. Stucchi. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean

Sciences, 1990. v. 48 p. : ill. (Canadian technical report of hydrography and ocean sciences ; no. 124) ISSN 0711-6774 MICROLOG 90-03933 1 fiche

Neroutsos Inlet is part of the Quatsino Sound group of inlets located on the northwest end of Vancouver Island. Port Alice, situated on the east side of the inlet 5 km from the head, is the location of a sulfate pulp mill built in 1917 and presently owned by Western Pulp Ltd. Partnership. The impact of effluent discharge from the pulp mill on water quality in Neroutsos Inlet has been a long-standing concern leading to a number of environmental studies and pollution abatement measures. Increased pollution abatement equipment has been added over the years, but there are still increasingly severe low dissolved oxygen (DO) levels. This report examines oceanographic and water quality data collected in the Inlet in 1986 and 1987 by the Institute of Ocean Sciences and the pulp mill staff. Water quality monitoring data consists of measurements of temperature, salinity, and concentrations of DO and spent sulfate liquor at discrete depths. Oceanographic data consists of moored instrument data and synoptic data collected during cruises.

#### **Pulpwood agreements and the wood-fibre-processing industry**

Victoria : Ministry of Forests, 1990. 6 p. MICROLOG 90-04759 1 fiche

The pulpwood agreement was devised in the early 1960s to superimpose a pulpwood industry over the existing sawmilling industry in the province's central interior. Under a pulpwood agreement, the agreement holder must buy all suitable fibre - typically chips and pulp logs - offered at a reasonable price, before being given the right to harvest timber. This fact sheet provides general information on pulpwood agreements, including their purpose, the designation of pulpwood areas, advertising requirements, evaluation, agreement conditions, and the major project review process in the case of expansion of facilities.

#### **Quality assurance in the diagnostic X-ray department -- 2d ed.**

by L.D. Brown. Regina : Saskatchewan Human Resources, Labour and Employment, Occupational Health and Safety Branch, 1987. 43 p. : ill. MICROLOG 90-03973 1 fiche

Review of X-ray quality assurance procedures which are commonly implemented in the diagnostic radiology departments of small and medium size hospitals in Saskatchewan. It explains the way in which responsibility for various aspects of quality assurance is divided between the radiologists, the hospital

administrators, the X-ray service company engineers, the Radiation Safety unit of the Dept. of Human Resources, Labour and Employment, the regional X-ray consultants and the technologists responsible for the hospital X-ray departments. It also provides guidance notes on the establishment of a comprehensive quality assurance program in a small or medium size hospital.

#### **Quality deterioration of fresh ocean perch exported from Troms to continental Europe**

by G. Fredriksen and T. Olsen. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 23 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5431) Originally published in Norwegian, by the Fisheries Directorate, at Tromsø, Norway. ISSN 0704-3716 MICROLOG 90-00621 1 fiche

To observe and control the deterioration in the quality of the ocean perch exported from Norway, handling procedures were followed from the time the fish was caught on the fishing grounds, through the processing and export, to markets in West Germany, Belgium, and France. The paper describes the condition of the fish at the various markets and lists the good and bad points noticed in each market.

#### **Quality evaluation of Saskatchewan lignite resources : physical and chemical analyses**

by T.E. Tibbitts. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1975. 21 p. : ill. Bibliogr. (Report ; ERP 75-10(PRJ)) Presented at the annual General Meeting of the Canadian Institute of Mining and Metallurgy. MICROLOG 90-04677 1 fiche

Since 1972, Canada and the Province of Saskatchewan have been cooperating in a jointly financed program to evaluate the lignite resources in the Ravenscrag Formation of southern Saskatchewan. In 1972 and 1973, a 2-phased drilling program was conducted in the 4 major coal areas, Estevan, Willow Bunch, Wood Mountain and Shaunavon. This paper outlines the procedures followed to evaluate the physical and chemical properties and to record for subsequent electronic processing the data resulting from the analyses of about 4,900 samples.

#### **The Quality of drinking water in Toronto : a review of tap water, bottled water and water treated by a point-of-use device : summary report**

by P.R.W. Kendall. Toronto : Dept. of Public Health, 1990. ii, 45 p. MICROLOG 90-07047 1 fiche

This study is the first stage of a larger research effort to identify and assess routes by which chemicals enter the body through water, air, food and soil. Water was chosen as the first area of investigation because of high public concern over sources of drinking water, as well as increasing scientific concern about the effects of consuming small quantities of toxic contaminants over a lifetime. The study reviewed the current data available on drinking water sources in Toronto, both tap water and alternatives, and the regulatory framework controlling quality, assessed public perceptions and the use of tap water and its alternatives such as bottled water and water treated in the home; measured and assessed the actual levels of chemical and bacteriological contamination of drinking water in municipally treated water and alternative sources, evaluated the exposures and risks associated with

chemicals and bacteria in drinking water from all major sources; and reviewed the various control options for reducing chemical and bacteriological exposures.

#### Quantification of hydrocarbon emissions from the Canadian gasoline marketing distribution system

Concord Scientific Corporation. Ottawa : Petroleum Association for Conservation of the Canadian Environment, 1986. 72 p. Bibliogr. (PACE report ; no. 86-3). MICROLOG 90-02794 1 fiche

This study identifies and quantifies the total hydrocarbon emissions in the gasoline marketing and distribution system on a province-by-province basis; estimates the benzene emission from the marketing and distribution system; and assesses the importance of these hydrocarbon emissions relative to the total national anthropogenic volatile organic compounds (VOC) emissions. Emissions resulting from storage and loading losses at marketing terminals and bulk plants, losses in transit, and delivery, storage, and vehicle refuelling losses at service stations are quantified for each province and territory for 1983. The overall uncertainty in the emissions data calculated in the study is estimated at 50%.

#### Quaternary stratigraphy and overburden geochemistry in the Phanerozoic terrane of southern Manitoba

by E. Nielsen. Winnipeg : Manitoba Energy and Mines, Geological Services, 1989. vi, 78 p. : ill., maps. Bibliogr. (Geological paper ; GP87-1). MICROLOG 90-05056 1 fiche

Report on a detailed overburden geochemistry and Quaternary stratigraphic analysis in an area where the galena erratic was found and in the up-ice direction in the Phanerozoic terrane of southern Manitoba. A total of 372 backhoe pits, ranging between 1 and 5 metres in depth, were dug in the Balmoral-Komarno area in the southern Interlake, the Moosehorn-Gypsumville area in the central Interlake and the Swan Lake-Dawson Bay area in the northern Westlake area. All the major lithosomes were sampled at least once in each area. Till was sampled in every hole but glaciolacustrine sediments were sampled in only a few places. In each area the glacier flow direction was determined from striations and the orientation of flutes. The surficial geology of each area was mapped from air photos or acquired from pre-existing maps. Each sample consisted of 25 kgs collected for heavy mineral separation, 8 kgs collected for textural analyses and pebble counts, and 0.5 kg collected for geochemistry.

#### Quaternary stratigraphy and surficial geology of the Sand River area 73L

by L.D. Andriashek and M.M. Fenton. Edmonton : Alberta Research Council, Natural Resources Division, Terrain Sciences Dept., 1989. vii, 154 p. : ill., maps. Bibliogr. (Bulletin ; no. 57). Fold. maps not filmed. MICROLOG 90-01184 2 fiche

The recent expansion of the heavy oil industry in east-central Alberta has placed demands for new and varied sources of geologic construction material, as well as an understanding of the geotechnical and hydrogeological properties of the overburden. In anticipation of this need for surface and subsurface information, a study was initiated in 1976 of the Pleistocene and Holocene deposits that overlie the heavy oil sand in the Sand River map area (NTS 73L). This report describes the Quaternary stratigraphy, surficial geology, and Quaternary history of the area.

**The Queen Anne revival style in Canadian architecture**

by L. Matland. Ottawa : Parks Canada, National Historic Parks and Sites Branch, 1990. 303 p. : ill. Bibliogr. (Studies in archaeology, architecture and history) *French ed. (Le Style néo-Queen Anne...)* : 90-06868/4. ISSN 0821-1027 ISBN 0-660-13599-X  
 MICROLOG 90-06867 4 fiche

Contains an overview of the origin of the style in Great Britain and its American interpretation. In examining the style in Canada, it begins with the efforts made by Canadian architects to adapt it to a new and often difficult habitat. The preponderant number of domestic examples reflects the popularity of the style for residential construction. It also examines its influence on institutions, resort buildings, apartments, and commercial constructions.

**A Questionnaire survey of Vancouver Island steelhead anglers' opinions and preferences on management issues**

by R.S. Hooton. Victoria : Ministry of Environment, 1985. ii, 30 p. : ill. Bibliogr. (Fisheries management report ; no. 84) ISSN 0705-5390 ISBN 0-7726-0408-8  
 MICROLOG 90-06971 1 fiche

On Vancouver Island, steelhead catches have declined in most popular streams in recent years, due to a number of causes. In 1976 the Salmonid Enhancement Program was initiated by an agreement between federal and provincial governments to double the mid-1970s commercial catch of salmon. This study examines the role of hatcheries relative to other steelhead management options and represented the first step in the formation of a regional steelhead management plan for Vancouver Island. A questionnaire was mailed to a systematic sample of every second Vancouver Island steelhead trout angler to

assess angler attitudes toward augmenting steelhead production by stocking hatchery fish, and to develop recommendations for incorporation into a steelhead management plan for Vancouver Island.

**Queuing theory approach to modelling the dynamics of the human-computer interface**

by J.M.E. Van de Vegte. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1989. 35 p. : ill. Bibliogr. (DCIEM research report ; no. 89-RR-45)  
MICROLOG 90-01674 1 fiche

Study of a model of the human-computer interface based on the idea of a message passing from one partner (the human) to the other (the computer) by means of an arbitrary number of layers which represent levels of abstraction of the message. The model uses a queuing theory formulation and assumes Poisson arrival and service characteristics to describe the movement of packets through the interface and to develop a criterion for network stability. Simulations are included to illustrate some of the theoretical results obtained.

**Radar data gathering on M.V. Arctic : final report**

prepared for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by Canarctic Shipping. Ottawa : The Company, 1990. xii, 34 p. : ill.  
MICROLOG 90-07194 1 fiche

The late fall MV Arctic voyage to the Canadian Arctic was chosen as an opportune time for dedicated radar data collection. In order to collect adequate marine radar data, high digitizing rates and high bandwidths were required of the data collection system. Nordco Ltd.'s newly developed data acquisition system was chosen for this purpose, and the system

was installed on the MV Arctic in early November 1989. Data collection began in the southern part of Baffin Bay, with a total of 13 high precision and high density sets of radar images collected, totalling approximately 4 Gbytes of data, recorded on 8mm video tape using an EXABYTE digital data storage drive. Most of the collected images can be correlated to SAR (Synthetic Aperture Radar) images of the same area, received via downlink on board the vessel at the time of data collection. This report describes the intent of the collected data sets and the full characteristics of each file.

**Radioactive release data from Canadian nuclear generating stations, 1972 to 1987**

Ottawa : Atomic Energy Control Board, 1989. 41 p. : ill. (Report ; INFO-0210(E)Rev-2)  
MICROLOG 90-01365 1 fiche

All nuclear generating stations emit small quantities of radioactive effluent both into the atmosphere and, in the form of liquid effluent, into the adjoining water body. This report gives the amount of these emissions for each nuclear generating station in Canada and indicates how these emissions compare with the relevant limitations imposed by the Atomic Energy Control Board as part of its regulatory and licensing program. This report incorporates histograms indicating the annual releases of tritium in air, noble gases, iodine-131, airborne particulate, tritium in water and waterborne gross beta activity for each station. In addition, for Pickering A, annual releases of Carbon-14 are given for 1986 and 1987. In

each case the emission data are compared to the derived emission limit to place the data in perspective.

**Radiofrequency radiation in the workplace**

by D. Charron. Hamilton, Ont. : Canadian Centre for Occupational Health and Safety, 1989. i, 15 p. Bibliogr. *French ed.*

(Rayonnements à fréquences...) : 90-04253/1.  
ISBN 0-660-13418-7  
MICROLOG 90-03619 1 fiche

Communications, industry and medicine are increasingly using radiofrequency electromagnetic fields, leading to a greater need to understand the known and possible health consequences of exposure to these fields. This publication briefly summarizes the current state of knowledge concerning health effects of exposure to radiofrequency electromagnetic fields. The publication includes definition of radiofrequency electromagnetic radiation, those at risk, the thermal and non-thermal health effects, the safety hazards, the exposure limits, and methods of control or limiting. Summaries of the existing and proposed guidelines are also included.

### Radiological hazards to uranium miners

Canada. Advisory Committee on Radiological Protection. Ottawa : Atomic Energy Control Board, 1990. ii, 48 p. : ill. Bibliogr. (Report ; INFO-0352)  
MICROLOG 90-07094 1 fiche

The 1977 recommendations of the International Commission on Radiological Protection state that the maximum permissible dose to atomic radiation workers should be 50 mSv per year and that the sum of the doses to all sources of radiation should not exceed this limit. Subsequent publications defined limits for inhalation of radon progeny by workers (1981) and other concepts to be used in the radiation protection of workers in uranium mines (1986). These recommendations are being incorporated into the new regulations, causing considerable discussion of their validity. This report reviews the available scientific information on the biological effects that might be anticipated in uranium miners in Canada under the new regulations, including the epidemiological data on risks of inhalation of radon and radon progeny by miners; the dosimetric and epidemiological data on the relative risks of exposure to other radiation sources; relevant data from animal experiments; and current exposures of uranium miners in Canada. It then compares the 'conventional' radiological risks to uranium miners with those to other workers in Canada.

### Radiometric survey of southeastern Manitoba

by D.M. Watson. Winnipeg : Manitoba Energy and Mines, Geological Services, 1985. 7 p. (Open file report ; OF85-1)  
MICROLOG 90-05242 1 fiche

This report covers an area of southeastern Manitoba bounded by the Ontario border, the Trans-Canada highway, Highway 59, and the Pine Falls-Bissett-Bird River road. This area is underlain by a variety of rock types that could contain concentrations of uranium- and thorium-bearing minerals. The roads within the study area were traversed to determine whether or not anomalous areas could be detected, and also whether areas of possible groundwater contamination could be delineated. The survey was conducted using a roof-mounted detector, and a continuous recorder. Anomalous readings were checked to determine whether or not there was an obvious (potential) source of radioactivity.

### Radium-226 in snowshoe hares near uranium mine tailings

by N.K. Dave. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. iii, 15 p. Bibliogr. (Report ; MRL 89-106(TR))  
MICROLOG 90-02552 1 fiche

The extensive inactive tailings deposits around the uranium mines near Elliot Lake, Ontario,

are of different ages and have received differing treatments after being decommissioned. These tailings are to be returned to nature after rehabilitation and eventually will be areas of wildlife management. This report presents the levels of Ra226 in bones (femur and tibia/fibula) and stomach contents of hares trapped near uranium tailings and on control sites, calculates the average internal skeletal radiation dose due to Ra226, and discusses the problems of calculating the transfer coefficient of the Ra226 from food to hare.

### Radon survey III : continuous monitoring in ten Saskatchewan homes

Regina : Saskatchewan Environment and Public Safety, Mines Pollution Control Branch, 1989. 17 p. : ill. Bibliogr.  
MICROLOG 90-00399 1 fiche

The level of radon in a home depends on many factors including the concentration of radium in the surrounding soil, construction of the house, type and condition of basement, the amount of ventilation, and the specific time. A number of surveys of homes were done in northern and southern Saskatchewan, beginning in 1975. This survey was conducted to obtain more reliable radon level data on selected homes included in the original south survey in 1981. Homes were selected to investigate variations seasonally and spatially within the dwellings, and to follow-up on the reliability of the original survey in southern Saskatchewan. The selected homes were those that had radon daughter levels above 0.10 WL in the 1981 survey.

### Rafferty-Alameda Dam Project : initial environmental evaluation, vol. I : technical report

Regina : Environment Canada, Conservation and Protection, 1989. xxxix, 331 p. : ill., maps. Bibliogr.  
MICROLOG 90-02854 4 fiche

The Rafferty-Alameda project is the most recent water management proposal to be considered for southeastern Saskatchewan. The project would dam the Souris River and a tributary, Moose Mountain Creek, creating 2 reservoirs and integrating the new works into the present water control system. Final provincial approval was granted in February 1988 and preliminary construction began in March. A federal license was received in June 1988, then quashed in April 1989, at which time the federal government was ordered to comply with its Environmental Assessment and Review Process guidelines. This document deals with the environmental implications that affect areas of federal responsibility, including transboundary water issues arising from Canada's obligations under Canada/U.S. treaties and related to the protection of North Dakota and Manitoba interests as downstream users, protection of migratory birds, fish and rare and endangered species; federal lands; and protection of navigable waters. Information is given on the nature, extent and significance of potential project impacts, proposed mitigation measures, residual impacts and information deficiencies.

to make recommendations for health care in the 21st Century. AL HE PR

**Rainbow trout farming polluting the Archipelagic Sea**

by J. Eklund. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 8 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5251) Originally published in Finnish. ISSN 0704-3716 MICROLOG 90-02721 1 fiche

Rainbow trout farming began in Finland in the 1960s in inland earth ponds but was restricted by a shortage of suitable farm locations and the rapid pollution of waters. The first marine farm began in Kustavi in the Archipelagic Sea at the beginning of the 1970s. The value of rainbow trout production corresponds to more than 40% of the value of the professional total catch, making it the most economically important fish in Finland. This paper evaluates the water pollution resulting from fish farming in the sea and its effect upon Baltic herring, which spawn in the same area as the fish farms. The paper also describes the use of a funnel to collect waste feed and the fish feces and recycle it. ● CA CF EV FI SC

**Raising sea otters in captivity**

by T.A. Mal'kovich. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 19 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5489) Originally published in Russian, by the Siberian Branch of the Academy of Sciences of the U.S.S.R. in the U.S.S.R. ISSN 0704-3716 MICROLOG 90-01685 1 fiche

After 1924, sea otters were strictly protected in the Komandorskie Islands, but although hunting was discontinued, the numbers grew very slowly, mainly through ignorance of the biology of the animal. In 1934-36, experiments were begun on keeping sea otters in captivity on Mednyi Island. This paper describes the methods of capture, the keeping of the otters in captivity, their behaviour, feeding, breeding, raising the young, the release of domesticated otters, and their acclimatization. ● CA CF FI SC

**Ralph Pickard Bell Library, Mount Allison University : Information Transfer Programme : final report**

by D.N. Buhay. Sackville, N.B. : Mount Allison University, Ralph Pickard Bell Library, Information Transfer Programme, 1989. 105 p. : ill. MICROLOG 90-05699 2 fiche

The major objective of the programme is the promotion of economic development in the region. To achieve this, the programme will strengthen the links between the resources of existing and emerging information networks the resources Mount Allison University makes available to the network, and the scientific and technological information needs of entrepreneurs, innovators, and researchers, whether local or served elsewhere in the network. This document discusses the implementation and promotion/marketing of the program. AP ED PR TE

**Range of variation in estimates of dry weight for planktonic Crustacea and Rotifera from temperate North American lakes**

by D.F. Malley, S.G. Lawrence and M.A. MacIver. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1989. 49 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1666) This is the 21st technical report from the Central and Arctic Region, Winnipeg.

ISSN 0706-6457

MICROLOG 90-02018 1 fiche

Dry weights of individual zooplankters are known to vary from lake to lake, with season, with variability in abundance of food, or from predation and competition. Furthermore, methodological differences in determining weights probably contribute to the variation. Dry weights calculated from measurements of 3 body dimensions are reported for crustaceans and rotifers from 4 Precambrian Shield lakes in the Experimental Lakes Area in northwestern Ontario, from Clay Lake near Dryden, Ontario and from a prairie pothole lake near Erickson, Manitoba. As well, directly-obtained dry weights are presented for planktonic crustaceans from 3 Laurentian Great Lakes. Length-weight regressions are presented for copepods and cladocerans. Some new data on the effects of season, lake depth, method of preservation, and on variability of application of this method among technicians are presented.

### Rapport annuel des statistiques municipales, 1989

Fredericton : Ministère des affaires municipales, 1989. 76 p. *Bilingue* (Annual report of municipal...). CSI 45112.002. ISSN 0319-4183

MICROLOG 90-03179 1 fiche

Ce rapport contient des statistiques sur les recettes et les dépenses relativement aux divers services dispensés par les municipalités et les districts de services locaux. Pour le calcul des subventions inconditionnelles, les municipalités ont été regroupées selon leurs ressemblances pour ce qui est de la population, des services dispensés, du budget net par habitant et des caractéristiques urbaines. Ces regroupements permettent de fonder les subventions inconditionnelles sur des comparaisons et de tenir compte des facteurs comme l'assiette fiscale, la densité démographique et l'effort fiscal.

### Rapport annuel national sur les drogues, 1988-89 et indicateurs de tendances d'ici 1991

Ottawa : GRC, Direction de la police des drogues, 1989. vii, 110, vii, 110 p. : ill., cartes géogr. *Bilingue* (National drug intelligence...). CSI 22279.002. ISSN 0820-6228

MICROLOG 90-06943 3 fiche

Ce rapport a pour objet de présenter une analyse détaillée de l'origine, de la quantité, des voies d'acheminement, des modes de transports et des méthodes de contrebande des drogues du marché illicite canadien, de même que des opérations financières associées à cette activité. Il vise principalement à coordonner le rassemblement, la collation, l'analyse et la diffusion des renseignements nationaux et étrangers sur les drogues pouvant intéresser les législateurs, ainsi que les organismes et les personnes chargés de la lutte anti-drogue. Le rapport débute par le sommaire des activités de 1988-89 et présente les tendances d'ici 1991. Il analyse ensuite chacun des grands groupes de drogues: l'héroïne, la cocaïne, les drogues chimiques et le cannabis. Finalement, le rapport fournit la liste des principales saisies de drogues au Canada ou en route vers le Canada en 1988.

#### Rapport d'enquête en vertu de l'article 229 de la Loi sur les chemins de fer : au sujet des facteurs et éléments susceptibles de provoquer ou de prévenir les accidents liés à la manutention et à l'intention des wagons-citernes non pressurisés servant au transport des marchandises dangereuses dans le corridor Sarnia-Montreal de la Compagnie des chemins de fer nationaux du Canada

Ottawa : Office national des transports du Canada, Direction des enquêtes sur les chemins de fer et les productoducs, 1990. 48, 53 p. : ill. *Bilingue (Report on an inquiry...)*.  
MICROLOG 90-04270 2 fiche

Les wagons marchandises des chemins de fer canadiens ont toujours été soumis à une forme ou une autre d'inspection. Généralement, les inspections ont lieu au moment de la formation des trains et, à nouveau, avant leur départ. De nos jours, ces pratiques ont été réduites à l'essentiel. Néanmoins, si les wagonniers et leurs superviseurs respectent les exigences établies dans les règlements gouvernementaux et celles des compagnies de chemin de fer, les risques d'incidents causés par des défaillances du matériel peuvent diminuer grandement. Le document se penche sur les points suivants: les événements à l'origine de l'enquête; les circonstances concernant le cas du wagon-citerne GATX 12073; l'enquête au triage de Sarnia, l'enquête au triage MacMillan de Toronto; l'enquête au triage Taschereau de Montréal; l'analyse des données recueillies à tous les triages; les conclusions et les recommandations.

#### Rapport d'étape sur le programme d'accès à l'égalité pour les femmes de la fonction publique du Québec

Québec : Gouvernement du Québec, Conseil du trésor, 1990. II, 18 p. ISBN 2-550-20971-0  
MICROLOG 90-07317 1 fiche

Ce document rappelle sommairement les principaux éléments du Programme d'accès à l'égalité pour les femmes de la fonction publique. La seconde présente le degré d'atteinte des résultats relatifs aux objectifs quantitatifs gouvernementaux, lesquels visent une amélioration de la représentation des femmes dans quatre catégories d'emploi. La priorité est accordée aux objectifs quantitatifs puisqu'ils sont les indicateurs majeurs de la performance du gouvernement, à titre d'employeur, en

matière d'accès à l'égalité. Cette partie traite également des mouvements de recrutement, de promotion et de départ pour l'ensemble de la fonction publique. Le rapport se termine en faisant état des progrès accomplis et en faisant mention des efforts requis des ministères et des organismes pour atteindre les objectifs gouvernementaux.

### Rapport préliminaire sur les changements climatiques

Toronto : Assemblée législative, Comité spécial sur l'énergie, 1990. 9, 8 p. *Bilingue* (Interim report on climate...). MICROLOG 90-06228 1 fiche

L'effet de serre, phénomène naturel créé par la présence de vapeur d'eau et de petites quantités de gaz carbonique dans l'atmosphère, maintient la température de la surface terrestre à une température capable de soutenir la vie. L'énergie solaire, qui réchauffe la Terre, les océans et l'atmosphère, est réfléchié jusqu'à un certain point sous forme de rayonnement infrarouge. L'activité humaine, essentiellement par la production et l'utilisation d'énergie, augmente les concentrations de ces gaz dans l'atmosphère; de ce fait, on s'inquiète qu'une plus grande quantité de cette énergie thermique ne puisse s'échapper et influence ainsi, dans des proportions importantes, le climat global tant pour la température que pour les précipitations. Ce document présente un rapport sur les changements climatiques.

### Rapport sur la revue en profondeur de régions économiques de l'assurance-chômage, 1989

Ottawa : Emploi et immigration Canada, 1989. 24, 23 p. : cartes géogr. Bilingue (*Report of the comprehensive review...*)  
MICROLOG 90-00761 1 fiche

Le document énonce les résultats de cette revue ainsi que les considérations sur lesquelles est fondée la décision de modifier la configuration actuelle des régions économiques de l'Assurance-chômage. La section I indique pour quelles raisons il faut différencier les régions, caractéristique importante du Régime d'assurance-chômage depuis 1971, et pourquoi ces régions doivent changer. Elle décrit aussi, brièvement, l'évolution du principe de la différenciation au fil des changements apportés successivement au Régime. La section II résume la méthode utilisée pour modifier la configuration des régions économiques. Enfin, la section III présente la politique découlant de l'étude poussée menée par Emploi et Immigration Canada. Finalement, l'annexe I met en parallèle l'ancienne et la nouvelle configuration, comparant le nombre de régions par province. L'annexe II présente les régions urbaines de la nouvelle série. L'annexe III contient les cartes des nouvelles régions.

### Rapport sur la tarification en assurance automobile, 1989

Québec (Province). Inspecteur général des institutions financières. Québec : l'Inspecteur, 1990. 139 p. : ill. CSI 66101.003. ISSN 0837-7006 ISBN 2-550-20561-8  
MICROLOG 90-05274 2 fiche

Ce rapport analyse les tarifs et les données statistiques d'expérience des assureurs automobile au Québec. On y traite de l'offre d'assurance, de la rentabilité financière prévue de l'assurance automobile en 1989, des critères de classification utilisés par les assureurs, des catégories de véhicules autres que les voitures de tourisme et des perspectives quant à l'évolution des coûts en regard des primes exigées.

### Rapport sur le projet-pilote de l'autocar accessible de roadcruiser réalisé à Terre-Neuve

par F. Kennedy. Ottawa : Transports Canada, 1988. vi, 125 p. L'éd. anglaise (*Report on the roadcruiser...*) : 90-04073/2  
MICROLOG 90-04074 2 fiche

Ce rapport fait une analyse détaillée ainsi que l'examen des résultats d'un projet pilote de démonstration entrepris par Transports Canada afin de mettre au point une technologie d'autocar qui permettrait d'offrir un service d'autocar accessible à Terre-Neuve. Le résultat, un prototype d'autocar accessible, est unique au monde: il est équipé d'un montre-charge intégré à la structure de l'autocar et contrôlé manuellement par un micro-ordinateur électronique. Le rapport traite de questions majeures telles que la fiabilité de la technologie, la répercussion auprès des usagers, le niveau de service offert et les effets de la mise en service d'un autocar accessible sur l'horaire régulier.

### Rapport sur les observations du public relativement au projet de règlement sur les incinérateurs des immeubles d'habitation

Toronto : Ministère de l'environnement, 1988. 23, 18 p. Bilingue (*Report on public response...*). ISBN 0-7729-3887-3  
MICROLOG 90-01246 1 fiche

Les plaintes du public et les analyses du Ministère ont permis d'établir qu'environ 1 200 incinérateurs d'immeubles d'habitation en Ontario sont inadmissibles sur le plan environnemental. Ainsi, le ministre de l'Environnement a proposé l'adoption d'un règlement interdisant leur usage. En septembre 1987, le Ministère a invité le public à lui faire parvenir ses observations sur le projet de règlement. Ce document présente donc les résultats de ces observations.

### Rapport sur les processus naturels et les activités humaines et leurs effets sur l'environnement du fleuve Saint-Laurent

Ottawa : Service canadien de la faune, Direction

de l'état de l'environnement, Stratégies et méthodes scientifiques, 1989. 35 p. Bibliogr. (Rapport technique ; no 13)  
MICROLOG 90-06281 1 fiche

L'objectif principal de ce rapport est de renseigner sur les problèmes environnementaux ingérents au fleuve et d'établir l'état des connaissances sur les interrelations entre les activités humaines et l'état de l'environnement. A partir d'une synthèse bibliographique, le rapport permet de mettre en relief les interrelations qui existent entre les processus naturels, les formes de développement, les activités humaines et les réponses connues du milieu fluvial aux différentes formes de stress auquel il est soumis. Ces interrelations sont illustrées au moyen d'exemples mettant en jeu différentes espèces du milieu aquatique.

### Rare-earth picolinate and picolinate-N-oxide complexes

by P.G. Manning. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1985. 7 p. Bibliogr. (Report ; MS 65-107)  
MICROLOG 90-04639 1 fiche

Stepwise stability constants for rare-earth picolinate and rare-earth picolinate-N-oxide complexes were reported in 2 recent publications. The n-dentate characters of the 2 ligands were discussed, but no unequivocal conclusions were drawn. It was shown in earlier publications that the magnitudes of ratios (P) of stepwise stability constants are useful in elucidating the structure of metal complexes. This paper analyses the P values for the picolinate and picolinate-N-oxide systems.

### Rate compatible punctured codes, their use in military satellite communication systems

by L.C. Wagner. Ottawa : Defence Research Establishment Ottawa, 1989. ix, 25 p. : ill. Bibliogr. (Technical note ; no. 89-19)  
MICROLOG 90-01634 1 fiche

Investigation into the problem of interfacing older military terminal equipments, which work exclusively from an internal timing source, into a communication system that requires all terminals to synchronise to the network clock. A scheme is proposed which would allow a clock discrepancy of up to 4% between the terminal clock and the network clock by adding control bits to the information stream between terminals. The paper describes the methodology used to select an optimal rate compatible punctured code and presents some examples. The probability of error for a selected code is compared with that of a convolutional code for an application typical of a satellite communication system.

### Rationale for including metabolites in chemical toxicity bioassay

by D. Liu...et al. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 17 p. : ill. (NWRI contribution ; 89-159)  
MICROLOG 90-02442 1 fiche

Dinitrotoluene (DNT) is an important industrial chemical, with over 600,000,000 pounds being used in 1980 for the production of polyurethane foams and elastomers. Interest in the toxicology of DNT has been increasing for the last decade, as this chemical has been identified as a potent hepatocarcinogen in rats. However, a discrepancy has been observed between the in vitro and in vivo toxicity results for 2,4-DNT. In this study, 2,4-DNT was used as a model toxicant to demonstrate that the inclusion of some known metabolites or biotransformation products in the short-term bioassay procedures may help toxicity data interpretation, thus extending the usefulness of these tests in impact assessment of contaminants on the environment.

### Rationale for the selection of technologies for treatment and disposal of special wastes in Ontario

status report to the Ontario Waste Management Corporation. Toronto Arthur D. Little, Inc., 1985. i, 29 p. Bibliogr.  
MICROLOG 90-01895 1 fiche

The Ontario Waste Management Corporation (OWMC) issued a status report on the conceptual engineering design of a system for treatment and disposal of liquid industrial waste and special waste in Ontario. The key

components currently under consideration are a rotary kiln incineration plant, a physical/chemical treatment plant, a solidification plant, and a secure engineered landfill. In August 1984, the OWMC began a process to identify and evaluate the full range of alternative treatment/disposal options available for each system concept. This report discusses those alternatives, the process used for evaluating alternatives, and the results of that evaluation. The alternatives selected for evaluation were derived from published literature, telephone interviews with users and vendors of technologies, and visits to operating special waste treatment and disposal facilities in the U.S. and abroad over the past decade. Experimental and unproven technologies were reviewed but disregarded in the process selection because OWMC has elected to use only demonstrated processes.

#### **RATP : a new formalism in the unification grammar family**

by M. Dymetman. Laval, Que. : Dept. of Communications, Canadian Workplace Automation Research Centre, 1987. 46 p. : ill. Bibliogr. French ed. (RATP : un nouveau formalisme...) : 90-04195/1.  
MICROLOG 90-04207 1 fiche

RATP is a grammar writing language which, within the class of unification grammars, resembles the PATR formalism, but introduces certain innovations (general predicates on structures). RATP grammar is made up of augmented context-free grammar rules and predicate definitions, in the form of a particular type of Horn clauses. This report identifies RATP and its place in the context of programming languages; describes RATP formalism, explaining the grammar, and differentiates between Directed Acyclic Graphs (DAGS) and terms and their implementation. The appendix presents a more complex RATP grammar.

#### **A Re-assessment of the elements of an economic strategy for the Province of Alberta, vol. II : the global economic and political environment and its impact on Alberta, 1980-95**

SRI International. Edmonton : The Province, 1980. v, 78 p.  
MICROLOG 90-03541 2 fiche

The purpose of this report is to describe the major aspects of the global political and economic environment that are expected to occur during the 1980s, with particular focus on those that will impact most significantly on Alberta. It identifies the continuing and emerging forces that are expected to shape economic and political events in the next 15 years, and evaluates and integrates these forces to produce a consistent world overview. Finally, it selects several elements of the world view that appeared to be both highly uncertain and of particular importance to the future of Alberta, and makes alternative assumptions concerning their outcomes so as to explore that range of uncertainty in the external environment to which Alberta will be exposed.

#### **Re-evaluation of the coal resources of western Cape Breton Island**

by P.A. Hacquebard, K.S. Gillis and D.S. Bromley. Halifax : Dept. of Mines and Energy, 1989. v, 47 p. : ill., maps. Bibliogr. (Paper ; 89-3)  
MICROLOG 90-01109 1 fiche

The submarine resources of the Inverness county coalfields have long been a matter of much speculation and it was not until the drilling and seismic work done in the mid and late 1970s that more abundant and reliable data became available. A further update was possible in 1986 when the results of the offshore seismic survey at Port Hood and Inverness were added. This report describes the results from the recent drilling and seismic surveys which were carried out as part of the coal inventory program. The new data complement earlier work in determining structural and coal resource evaluations of the individual coalfields (Port Hood, St. Rose-Chimney Corner, Mabou, Inverness).

#### The Reaction of asteroids *Asterias amurensis* and *Distolasterias nipon* to homogenates and chemical substances from Far Eastern starfishes

by A.V. Levin, E.V. Levina and V.S. Levin. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 12 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5153) Originally published in Russian, in the USSR. ISSN 0704-3716  
MICROLOG 90-00094 1 fiche

Chemical communication is one of the most important mechanisms regulating the intra- and interspecific relations of aquatic organisms, including the widely distributed and numerous asteroids. The interrelations of starfishes is of both scientific and great practical importance, since their study can lead to methods of controlling the behaviour of these predators which do considerable damage to plantations of cultivated molluscs. This paper explains how the two most economically important starfish species of the sublittoral of the Sea of Japan (*Asterias amurensis* and *Distolasterias nipon*) react to homogenates of tissues and chemical substances extracted from the same and some other numerous starfish species. The work was done at the aquarium of the Vityaz experimental base of the Pacific Oceanological Institute of the Far Eastern Scientific Centre of the USSR Academy of Sciences from May-August 1982.

#### Recent proposals to reform the Bankruptcy Act : an assessment

by B.-M. Papillon. Ottawa : Economic Council of Canada, 1990. vii, 76 p. Bibliogr. (Discussion paper ; no. 366) ISSN 0225-8013  
MICROLOG 90-03772 1 fiche (Available on fiche only)

This paper represents a critical analysis of recent proposals to reform the Bankruptcy Act. The Bankruptcy Act is identified as a policy for facilitating exchanges and as a framework for economic adjustment, this provides a basis for its initial interpretation. After reviewing the aspects of the Act most affected by recent reform proposals, the paper critically analyzes the aims of the Act and of the reforms, as stated by the legislators. With this purpose in mind, it presents a brief summary of the origins of the present legislation.

#### Recent re-measurement of the neutron and gamma-ray fields at large distances from a prompt critical facility

by T. Cousins...et al. Ottawa : Defence Research Establishment Ottawa, 1990. xiii, 34 p. : ill. Bibliogr. (Report ; no. 1031)  
MICROLOG 90-05918 1 fiche

Over the past few years the neutron (and to a lesser extent gamma-ray) energy spectra at the NATO standard reference point (400 m from the core) at the Aberdeen Pulsed Radiation Facility, Aberdeen Proving Ground, MD, U.S. has been the subject of experimental and theoretical controversy. This report describes the Canadian results of a joint NATO spectroscopic and dosimetric program carried out to end the controversy. Free-field and in-vehicle spectra are given, along with free-field and phantom dosimetric results. As a result of this work, several benchmark results were obtained, and specific recommendations for future research are given.

#### Le Réchauffement de l'atmosphère : les solutions possibles

par R. Milko. Ottawa Bibliothèque du Parlement, Service de recherche, 1989. 49 p. : ill. Bibliogr. (Etude générale ; BP-221F) L'éd. anglaise (Global warming...) : 90-05369/1. ISBN 0-660-92875-2  
MICROLOG 90-05370 1 fiche

La collectivité scientifique convient dans l'ensemble que la quantité phénoménale de substances polluantes libérées dans l'atmosphère depuis le début de la révolution industrielle amène la température de la Terre à se réchauffer à un rythme sans précédent. Ces changements mettent en danger le bien-être de l'humanité; d'ailleurs, ils ont déjà commencé à faire sentir leurs effets néfastes dans de nombreuses régions. Cette étude porte sur les politiques qui visent à améliorer ce que l'on désigne parfois sous le nom d'effet

de serre.

## Recherche et développement : la politique fiscale

par O. Madore. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 13 p. Bibliogr. (Bulletin d'actualité ; 89-F) *L'éd. anglaise (Research and development...)* sur la même fiche. ISBN 0-660-92935-X  
MICROLOG 90-05354 1 fiche

Outre les subventions et contrats qu'il accorde afin d'encourager la recherche-développement (R-D) industrielle, le gouvernement fédéral appuie également la R-D en entreprise par le biais de stimulants fiscaux. Ce document examine les fondements de l'intervention gouvernementale dans ce domaine et présente une perspective historique des stimulants fiscaux à la R-D industrielle. Ensuite, différents commentaires sont soulevés quant aux avantages et aux limites des mesures d'incitation fiscale à la recherche scientifique.

## La Recherche forestière au Canada en 1979-80 et 1985-86 -- Rév.

I.C.M. Place. Ottawa : Conseil consultatif de la recherche forestière du Canada, 1988. vii, 96 p. *L'éd. anglaise (Forest research in Canada...)* : 90-02754/2. ISBN 0-662-95593-5  
MICROLOG 90-02753 2 fiche

La forêt demeure l'aspect le plus frappant du relief canadien. Elle s'étend sur près de 5 000 km, de Terre-Neuve à l'île de Vancouver, et couvre une superficie de 4,4 millions de kilomètres carrés. Ce rapport présente les dépenses en matière de recherche par organisme (ministères, secteur privé, universités, etc.). Ensuite, il ventile les mêmes données par domaine de recherche. Les écarts minimes entre ces deux ensembles de données sont dus principalement à la façon dont les chiffres originaux ont été déclarés et à la difficulté de suivre la recherche contractuelle en raison de sa diversité. Finalement, le document résume l'ensemble des dépenses par organisme et par grand domaine.

## Recipient study in Nordbotn, Kvaløya, 1983-84 : hydrography and bottom fauna

by E. Oug and B. Holte. Ottawa : National

Research Council, Canada Institute for Scientific and Technical Information, 1986. 37 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5243) Originally published in Norwegian, by Tromsø University at Tromsø, Norway. ISSN 0704-3716  
MICROLOG 90-02856 1 fiche

Nordbotn, situated at Tromsø between Haakoya and Kvaløysletta, is a minor fjord area with a 55 m deep basin and a threshold at 17 m. The present pollution-causing discharges are small, but the area may receive sewage in connection with future development. This study evaluates Nordbotn for use as a recipient for municipal waste water. The study comprised hydrography (temperature, salt content, oxygen) and bottom fauna. Hydrographic measurements were carried out at a station approximately once a month from April 1983-December 1984. The bottom fauna was sampled with a bottom sampler at 3 stations (10 m, 35 m and 55 m) in March 1983.

#### Reclamation trials on sodic mine spoil at Bow City, Alberta

by S. Fullerton and H.F. Regier. Edmonton : Alberta Environment, Environmental Protection Services, 1987. xi, 69 p. Bibliogr.  
MICROLOG 90-00215 1 fiche

Reclamation trials were set up to assess the ability of various treatments in reducing the effects of high levels of sodium in the spoils, and to establish a permanent and useful vegetative cover. Two separate trials were begun as a split-plot experiment, with one irrigated and the other not. Each trial consisted of 3 replicates of 7 treatments. One half of each plot was fertilized with nitrogen and phosphorus in 1976 and 1978. After plot establishment in the fall of 1976, all plots were irrigated once to promote fall forage establishment. After 1976, the irrigated plots were periodically irrigated over 4 years. The plots were seeded to a forage mixture in 1976 and again in 1977. Three soil samples per plot were taken in 15 cm increments from 0-60 cm in 1978, 1981, and 1984 and were analyzed for pH, electrical conductivity, saturation percentage, calcium, magnesium, sodium, and chloride. Two vegetation samples per plot were taken for yield measurements in 1980, 1981 and 1983.

**Recommandations sur la nutrition**

Canada. Santé et bien-être social Canada. Comité de révision scientifique. Ottawa : Santé et bien-être social Canada, 1990. 223 p. Bibliogr. L'éd. anglaise (*Nutrition recommendations*) : 90-03925/3. ISBN 0-660-92814-0  
MICROLOG 90-03926 3 fiche

Les recommandations sur la nutrition pour les Canadiens sont le résultat d'une revue de la littérature sur les besoins en éléments nutritifs et les diverses associations entre la nutrition et la maladie. Ce document sert de guide dans le choix d'un régime alimentaire qui apporte les quantités recommandées de tous les éléments nutritifs essentiels tout en réduisant le risque de maladies chroniques. Bien que les recommandations soient présentées comme des entités individuelles, il est important de mentionner qu'elles ne sont complètement efficaces que lorsqu'elles sont utilisées dans leur ensemble. Il faut également considérer que les recommandations ne sont pas une ordonnance et qu'elles peuvent être satisfaites par plusieurs combinaisons d'aliments disponibles sans avoir recours de façon générale à des suppléments.  
CA HE

**Recommandations sur la nutrition : un appel à l'action**

rapport sommaire du Comité de révision scientifique et du Comité des communications et de la mise en application. Ottawa : les Comités, 1989. 17 p. L'éd. anglaise (*Nutrition recommendations...*) sur la même fiche. ISBN 0-662-95733-4  
MICROLOG 90-04344 1 fiche

Il est admis depuis longtemps que la nutrition joue un rôle clé dans la promotion de la santé et la prévention de la maladie. Ce document est un résumé de la dernière édition des lignes directrices nationales qui, depuis près de 50 ans, ont servi de pierre angulaire pour l'élaboration des politiques et des programmes touchant la nutrition au Canada. Le rapport indique en outre ce qui peut être entrepris dans différents secteurs pour aider les Canadiens à faire des choix d'aliments favorables à leur santé.

### Recommended practices for drilling geopressured wells on the Nova Scotian shelf

Calgary, Alta. : Canadian Petroleum Association, 1989. 101 p. : ill., fold. ill.  
MICROLOG 90-04409 2 fiche (Available on fiche only)

During the late 1970s and early 1980s several deep, highly pressured gas reservoirs were discovered during the drilling of exploration wells off the Nova Scotia shelf. Without exception, the drilling of these wells presented extreme technical challenges, both for well design and for equipment specifications. These guidelines represent a consensus of industry opinion on the most prudent approach to designing and drilling Scotian Shelf exploration wells. The guidelines cover offshore well testing, tubular design, well control equipment, well abandonment, geophysical pressure prediction methods, and geopressure detection.

### Reconstruction of the total return of sockeye salmon *Oncorhynchus nerka* to the Skeena River for brood years 1965 to 1982

by M.A. Henderson and R.E. Diewert. Vancouver, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, 1989. iii, 73 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences : no. 2038) ISSN 0706-6473  
MICROLOG 90-02301 1 fiche

It has long been known that sockeye salmon returning to the Skeena River as maturing adults are harvested in numerous fisheries both in B.C. and Alaska. Since 1982, several investigations have been carried out, designed to provide estimates of the proportion of the catch taken in major net fisheries in northern B.C. and southern southeast Alaska that was of Skeena River origin. This study used these estimates of stock composition to reconstruct the total size of the return of sockeye salmon to the Skeena River for brood years from 1965-82. Age structure information was used to apportion the catch and escapement to the appropriate brood year. The proportion of the catch in each of the major interception fisheries from 1982-87 was based on a series of studies using tagging, genetic, scale pattern and parasite markers. Three different procedures were used to estimate stock composition for the years prior to 1982 and for 1988. The total run size estimates from each of the 3 procedures are compared.

### The Recovery of spilled heavy oil with skimmers

prepared for Prairie Regional Oil Spill Containment and Recovery Advisory Committee ; by Esso Resources Canada ; by H.M. Brown. Calgary, Alta. : Canadian Petroleum Association, 1988. 11 p. : ill. Bibliogr.  
MICROLOG 90-04399 1 fiche (Available on fiche only)

Experiments were conducted in 1988 in the Esso Resources wave basin to test various suggested methods of containing and recovering spilled heavy oil from water. Oil from the Cold Lake plant was used in these tests. No spill containment and recovery equipment has been specifically designed to combat spills of this oil but equipment used on spills of Bunker C oil or heavily weathered oil may be applicable. One approach is to use nets as containment devices and to remove the oil from the water by some type of skimmer. The most heavily tested skimmer is one developed by British Petroleum, and this design was chosen for tests in the Esso wave basin at low water temperature. It was also suggested that a rope skimmer might work for these oils at low temperatures and this was also tested. This report describes the equipment used and evaluates the two types of skimmers.

### Recreation in remote Northern Manitoba communities : summary report

by R. Hart. Winnipeg : Manitoba Culture, Heritage and Recreation, 1989. 71 p. : ill., maps.  
MICROLOG 90-01458 1 fiche

Summarizes a conference held March 2 and 3, 1989 in Thompson. Participants were community leaders: chiefs, mayors, councillors, and recreation professionals and volunteers. The premise of the workshop was that there was a need to have community leaders identify the circumstances and recreational needs existing in their remote community. From this needs identification, strategies were developed to address any problem areas or to meet certain needs in a meaningful way.

### Recreational boating fatalities in Ontario, 1980-87

Toronto : Ministry of Natural Resources, Office of Recreational Boating, 1989. vi, 84, iv, 80 p. : ill. Bibliogr. *Bilingual (Accidents mortels de navigation...)*. ISBN 0-7729-5446-1  
MICROLOG 90-01861 2 fiche

Analysis of boating fatalities from 1980-87, including the circumstances surrounding the incidents and possible trends. Data were compiled from the files of the Office of the Chief Coroner for Ontario and include police reports, post mortem examinations, medical certificates of death and news clippings. Additional data was acquired from Statistics Canada, which provided information on other accidental deaths. Data was tabulated and examined to determine how, where, why and with whom the fatal boating accidents occurred. The cross tabulations provided a basis for comparing fatalities over time, by boat type and by location. These data were then compared to boating fatalities in other provinces and in various American states, as well as to other types of accidental death. Overall trends were examined and evaluated.

### Recreational fishing : a service industry profile

Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. iv, 31 p. Bibliogr. (Economic and commercial analysis report ; no. 35) ISSN 0843-5626 ISBN 0-662-17328-7 MICROLOG 90-00686 1 fiche

Recreational fishing is the most popular outdoor activity in Canada, with anglers generating substantial commercial activity in all regions of Canada. This study provides an understanding of the operational and economic characteristics of both the specialized (outfitters, lodges, etc.) and general (accommodation, sports stores, etc.) commercial services which support recreational fishing. The report deals briefly with the range of recreational fishing conducted across Canada and the geographic pattern of fishing effort and catch, presents information on trends in yields and angler spending per unit of catch; defines the outfitting industry and its activities, including general features, operations, and regional distribution; examines the financial performance and business conditions facing outfitters; and describes the organization pattern and economic structure of the service industries which conduct business with anglers, treating the two major components of the recreational fishing economy separately.

### Red River sport fish studies

Fish Futures Inc. S.I. : The Corporation, 1990. 4 p. *Public funding by Manitoba Dept. of Natural Resources* MICROLOG 90-06252 1 fiche

The Red River between Lockport and Lake Winnipeg is less than a one hour drive from the largest population centre in Manitoba, and supports about 9% of the total angling in the province. Fish Futures' first and continuing major project has been to access public and private funding to support studies on the biology and status of fish stocks and angling effort and catch from the lower Red River. This document describes the research being undertaken in fish biology on walleye and channel catfish and in angling, along with studies to be done in the future on the use of the Netley-Libau marshes by spawning channel catfish, walleye spawning in the lower Red River, a continuation of walleye and channel catfish tagging, and a study of factors affecting movement of fish from Lake Winnipeg into the Red River.

### The Red-throated Loon as an indicator of environmental quality in the Beaufort Sea region : an interim report

by D.L. Dickson. Edmonton : Environment Canada, Canadian Wildlife Service, 1989. xii, 121 p. : ill., maps. Bibliogr. MICROLOG 90-06368 2 fiche

In view of the vulnerability of birds to offshore oil and gas extraction in the Beaufort Sea, it was decided to monitor the environmental impact of development through observation of the red-throated loon, which occurs in high densities on both Tuktoyaktuk Peninsula and the coastal plain in northern Yukon. Aerial and foot surveys were conducted for abundance of breeding pairs and their breeding success. Study plots were established in 1984 at Atkinson Point and King Point where port development was proposed, at Nuvorak Point where future shoreline development was unlikely (control for impact of shoreline development), at Husky Lakes which would not be affected by oil spills in the Beaufort Sea (control for impact of oil and other pollutants in the Beaufort Sea), and at Toket Point which was relatively inexpensive to access from Tuktoyaktuk and therefore suitable for a more intensive study. This report covers the first 4 years of the predevelopment phase.

### The Reduction of city bus exhaust emissions by means of a regenerative power train

by A.S. Davies. Ottawa : Transport Canada, 1989. 9 p. : ill. Bibliogr. MICROLOG 90-04790 1 fiche

The Regenerative Power Train (RPT) used in this experiment provides vehicle retardation by use of an hydraulic pump, with energy storage taking place within conventional piston accumulators. The test vehicle was an Orion I, 35-ft transit bus equipped with 39 seats. Tests were conducted in the laboratory using a CBD type driving cycle. The facilities employed included a chassis dynamometer with selectable inertia wheels, and an exhaust analysis system comprising a single (total exhaust) dilution, CVS system, with particulate and gaseous emission measurement capability. Emissions were sampled over a 2-mile run and the cycle average fuel economy was determined by the carbon balance technique, using emission measurements of HC, CO and CO<sub>2</sub>. The bus was tested with the RPT operational, and as a standard vehicle.

### Reduction of frequency of sulphide ore dust explosions by improved blasting practices : research report

by J.P. Saindon...et al. Pointe-Claire, Que. : Centre de technologie Noranda, Environmental and Mining Laboratory, 1990. 92 p. : ill. Bibliogr. CANMET contract: 89227-01-SQ MICROLOG 90-07129 2 fiche

A field study was conducted to reduce the frequency of sulphide dust explosions by improved blasting techniques. The research was separated into 2 phases, with phase 1 consisting of a review of tunnel blasting and preparation of the instrumentation for the field and phase 2 consisting of the field work carried out at Brunswick No. 12 Mine over a 12-week period between August and November 1989. The second phase included monitoring the current blasting practice in particular and investigating the occurrences of misfires and incomplete detonations; evaluating short period delays for their ability to reliably provide full advance for development rounds and their potential in avoiding or minimizing sulphide dust ignitions, and providing an opportunity for testing of new cut design as well as a limited evaluation of alternative explosives

### Reed Lake water quality near Spruce Point Mine, 1983

by A.E. Beck. Winnipeg : Manitoba Environment

and Workplace Safety and Health, 1983. v. 76 p. : maps. Bibliogr. (Water Standards and Studies report ; no. 87-6)  
MICROLOG 90-00394 1 fiche

Hudson Bay Mining and Smelting Co. Ltd. completed development of the Spruce Point Mine in 1981. The mine is located on a point projecting from the south shore of Reed Lake, the largest waterbody in the Grass River Provincial Park and highly valued for its exceptional water quality. Development of the mine aroused concern that Reed Lake water quality might be jeopardized. The present study was conducted in August 1983 to develop a baseline of data which could be used to readily and speedily detect anthropogenic changes in water quality. The delineation of baseline included data on water physicochemistry, metal concentrations in sediments and metal residues in fish. Comparisons were made to other appropriate lakes to determine whether or not the data base derived was indicative of natural background.

**Reevaluation of the status of Peary caribou and muskox populations within the Bathurst Island complex, Northwest Territories, July 1988**

by F.L. Miller. Ottawa : Canadian Wildlife Service, Western and Northern Region, 1989. x, 86 p. Bibliogr. (Technical report series ; no. 78) ISSN 0831-6481 ISBN 0-662-17289-2  
MICROLOG 90-02373 2 fiche

The Peary caribou is now found regularly only in the Canadian High Arctic and is considered a threatened species. The muskox is the only other ungulate that occurs regularly in the Canadian High Arctic. Both these species are the major staples in the diet of the high Arctic wolf. Therefore, muskoxen are monitored along with Peary caribou whenever possible. A re-evaluation of the statuses of Peary caribou and muskoxen on the south-central Queen Elizabeth Islands was carried out in 1988. An aerial survey to determine numbers and distributions was flown between July 11 and 21, 1988 in an area which included the islands of Bathurst, Cornwallis, Vanier, Cameron, Alexander, Massey, Little Cornwallis, Helena and Marc, Northwest Territories, in the Canadian Archipelago. A systematic unbounded line transect survey was flown about 90 m above ground level using a Bell-2068 turbo-helicopter on floats. This report presents the methods and results of that survey.

Ontario Energy Board. Toronto : The Board, 1989. 158 p. ISBN 0-7729-6459-9  
MICROLOG 90-04274 2 fiche

Report of a public hearing into the application of ICG Utilities (Ontario) Ltd to the Ontario Energy Board for exemptions to undertakings given in June 1988 by ICG and for certain orders related to a proposed investment by ICG Ontario in a cogeneration project to be built at the pulp and paper mill of Boise Cascade Canada Ltd. in Fort Frances. The project is proposed to be owned by ICG Ontario and held as a division of the utility company. The hearings covered the structure of the investment, gas supply arrangements, project economics, shareholder considerations, risks to the utility and its ratepayers, and separation and accounting issues. Also included are an organization chart for ICG Ontario and its distribution network, a schematic for the cogeneration plant and contracts related to it, and the base case cost

of capital and return on assets.

### La Réforme des stimulants fiscaux à l'épargne-retraite

par R. Domingue. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 16 p. Bibliogr. (Bulletin d'actualité : 89-4F) *L'édition anglaise (Reforming retirement...)* sur la même fiche. ISBN 0-660-92724-1  
MICROLOG 90-01847 1 fiche

Le traitement fiscal accordé aux différents modes agréés d'épargne-retraite est d'une complexité telle que sa compréhension est difficile pour bien des Canadiens. L'hésitation des récents gouvernements à réformer le système fiscal pour le rendre plus simple et plus équitable n'a fait que compliquer les choses. En effet, à cause des nombreux revirements dans les positions gouvernementales, des signaux erronés ont créé des attentes et engendré de mauvaises décisions dans la gestion de l'épargne. Ce document définit les diverses formes d'épargne-retraite, révisé les propositions passées et examine plus en détail la dernière position gouvernementale concernant le traitement fiscal de l'épargne-retraite.

### Refuge utilization and nature of relationships among individuals in the eastern rockfish, *Sebastes taczanowskii*, *Scorpaeniformes*, *Sebastinae*

by V.E. Gomeliuk, V.P. Leunov and A.I. Markevitch. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 12 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences : no. 5476) *Originally published in Russian, by the USSR Academy of Sciences at Moscow, USSR.* ISSN 0704-3716  
MICROLOG 90-00594 1 fiche

The eastern rockfish is one of the numerous and widely distributed species of fish that inhabit the upper levels of the sublittoral of the Sea of Japan in Soviet Primor'e. As shelters, the fish make use of crevices in the rocks, spaces between boulders, and overhanging rocks. Preliminary data, obtained by observation of tagged fish, indicates that some of the fish remain in the same area for long periods of time, while others are attached to

no particular place. For a more detailed study of the peculiarities of the utilization of shelters in the daytime, an investigation was done in a trap which was placed near the natural habitat to study the degree of attachment of different fish to the refuges, as well as the interrelationships arising between the fish when using the same refuge. The work was done from August-September 1984 in Peter the Great Bay, Sea of Japan.

### Regard sur le Nord : engagement du Canada dans l'Arctique

Ottawa : Affaires indiennes et du Nord Canada, 1989. 95 p. : ill. *L'édition anglaise (Looking North...)* : 90-00960/2. ISBN 0-662-95558-7  
MICROLOG 90-00959 2 fiche

Le Canada est un pays nordique. Son littoral arctique est le plus long du monde, et sa superficie en fait le plus grand pays du globe après l'Union soviétique. Le Canada occupe une place de choix dans la région circumpolaire nordique. C'est le Nord du Canada qui, malgré la distance qui le sépare de la population qui se trouve concentrée dans la frange méridionale du pays, a contribué à forger notre identité nationale et internationale. Le document donne une certaine "vision" du Nord, et se penche sur les points suivants: les perspectives historiques, la maturité politique, la diversité sociale et culturelle du nord, la science comme instrument de connaissance, l'économie du Nord, la protection de l'environnement du Nord, la sécurité du nord, le transport des marchandises et des personnes, les communications dans le Nord, et la coopération circumpolaire.

MICROLOG 90-01619 1 fiche

La conduite automobile comporte des risques, des risques de décès, de blessures corporelles et de dommages matériels. En 1987, dernière année pour laquelle on dispose de statistiques, on a enregistré 203 000 accidents de la circulation qui ont causé des blessures à 121 000 personnes. Les coûts financiers sont tout aussi écrasants. Les demandes d'indemnisation des blessures corporelles ont atteint 1,8 milliard de dollars l'année dernière en Ontario. De plus, les blessures grèvent énormément les ressources financières du système de soins de santé. Ce document est un sommaire des différents aspects du régime de protection des automobilistes de l'Ontario.

**Régime de rentes du Québec :  
allocations d'aide aux familles du  
Québec : statistiques, 1988**

Québec : Direction de la planification et de la statistique, Régie des rentes du Québec, 1989. 62 p. CSI 67176.003. ISSN 0836-9275 ISBN 2-550-19535-3  
MICROLOG 90-00715 1 fiche

Ce régime de rentes a été créé dans le but

d'assurer aux travailleuses et aux travailleurs rémunérés du Québec et aux personnes à leur charge, une protection de base contre la perte de revenus pouvant résulter de la retraite, du décès ou de l'invalidité. Le programme québécois d'allocations d'aide aux familles comprend quatre volets distincts: l'allocation familiale, l'allocation pour jeune enfant, les allocations à la naissance et l'allocation pour enfant handicapé. Les tableaux ventilés en fonction de variable socio-économiques aident à situer les clientèles de la Régie en fonction de l'environnement social québécois. Finalement, les renseignements fournis dans ce document permettent de cerner les lignes de force que constituent certains champs de la sécurité du revenu.

**Le Régime fiscal des agriculteurs --  
Rév.**

par T.J. Thomas. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 16 p. Bibliogr. (Bulletin d'actualité : 88-12F) L'éd. anglaise (The Taxation of farmers) sur la même fiche. ISBN 0-660-92716-0  
MICROLOG 90-01839 1 fiche

Tout au long de l'histoire, on a toujours admis l'importance de l'agriculture et reconnu aux agriculteurs un statut spécial au sein de la société. Le Canada du vingtième siècle ne fait pas exception à cette règle, ainsi, la Chambre des communes et le Sénat ont tous deux des comités permanents voués à l'étude des questions agricoles. La réforme récente de la 'Loi de l'impôt sur le revenu' comportait plusieurs dispositions visant les agriculteurs mais ne reprenait pas intégralement celles qui avaient été recommandées dans le Livre blanc sur la réforme fiscale de juin 1987. Dans ce document, on examine ces recommandations et on montre comment elles ont été modifiées dans la motion des voies et moyens déposée un an plus tard et dans le projet de loi C-139. Loi modifiant la 'Loi de l'impôt sur le revenu' qui a reçu la sanction royale en septembre 1988.

#### Regional study of rock drains in surface coal mines in Canada, phase I

Piteau Engineering Ltd. Calgary, Alta. : The Corporation, 1989. 50 p. : ill., maps.  
Bibliogr. CANMET contract: 89188-01-SQ.  
MICROLOG 90-02537 1 fiche

In recent years, at an increasing number of mines in mountainous terrain, it has been concluded that placement of mine waste rock in valleys is the most economic and technically feasible means of waste disposal. The major drawback is the impact of the fill on the stream occupying the valley floor. This report is phase 1 of a 2-phase study reviewing the current approaches being followed by operating coal mines in the design and construction of rock drains, leading to a common coherent approach to the topic of rock drain design, construction, monitoring and abandonment. This first phase reviews the literature and presents

a summary of the analytical procedures. Design, construction and performance monitoring information was collected at 6 mine locations in Alberta, the Yukon Territories and British Columbia.

### The Regulation of industrial toxic and hazardous emissions in Ontario as compared with selected jurisdictions, vol. 1 : summary and conclusions

James F. Hickling Management Consultants Ltd. Toronto : Environment Ontario, Policy and Planning Branch, 1990. v, 92 p. Bibliogr. ISBN 0-7729-6116-6  
MICROLOG 90-04770 2 fiche

In pursuit of environmentally sound economic development in Ontario, the government recently developed a number of policy initiatives in environmental protection. Two major initiatives, resulting in the establishment of more stringent standards on effluents and emissions released into the environment, are the Municipal Industrial Strategy for Abatement (MISA) which aims to achieve the virtual elimination of toxic contaminants in municipal and industrial discharges into waterways, and proposed revisions to Regulation 308 of the Environmental Protection Act to impose direct emission limits on all air pollution sources of any appreciable size. This study determined if Ontario's proposed regulations constitute a competitive disadvantage for industries in the province. The study compared Quebec and Alberta to Ontario, as well as to a set of 12 U.S. states and, to a lesser degree, 6 OECD countries. Nine industry sectors were targeted as those most likely to bear the heaviest burden under the regulatory initiatives.

#### The Relation between sediment flux and fish feeding in coastal culture farms

by S. Kadowaki, et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 13 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5188) *Originally published in Japanese, in Japan* ISSN 0704-3716  
MICROLOG 90-00071 1 fiche

Sediment flux in coastal culture farms was observed to estimate an environmental load resulting from fish feeding. Observations were made 63 times between October 1977 and February 1980, in the farms located around the Fisheries Research Laboratory of Kagoshima University. The sediments were collected from a sea beam farm, a yellowtail farm, and a non-culture area, in depths from 8-16 m. Polyethylene columns were set on the sea bottom at each station, and renewed every 4 days during the culture season. The samples were filtered after collection, and dried at 60°C for 5 days. The food quantity and

quality were noted every day in each farm.

#### The Relationship between genetic stability and variability in populations of rock grenadier in the North Atlantic

by V.V. Dushchenko. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 7 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5407) *Originally published in Russian, in the U.S.S.R.* ISSN 0704-3716  
MICROLOG 90-01537 1 fiche

Despite many years of experience in fishing the North Atlantic rock grenadier and in researching this species, many important aspects of its biology remain unstudied. Attempts to utilize the polymorphic system of myogenic esterase to identify isolated groupings of grenadier failed to give the expected results due to the insignificant variability of gene and genotypic frequencies over the greater part of its geographic range. Variations in the concentrations of phenotypes of esterase depended on the sex and size of the fish, leading to a hypothesis on the selective nature of polymorphism at locus Est-1 and the natural effect of the migration of eggs and larvae on the formation of the gene pool of local populations. This study followed the variability of esterase using 5-cm size classes. Samples of 200-300 specimens were used for the analysis obtained from the chief fishing regions of the North Atlantic in 1979 and 1980. Classification of esterase isoenzymes was made and statistical treatment was constructed according to the method guidelines of TINRO.

#### Relationship between the density of larvae of *Pandalus kessleri* C. and that of *Zostera marina* L.

by T. Mizushima. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 21 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5222) *Originally published in Japanese, in Japan.* ISSN 0704-3716  
MICROLOG 90-02687 1 fiche

Clarifying the relationship between the distribution of *P. kessleri* C. larvae and *Z. marina* L. is important for the creation of fishing grounds for *P. kessleri* C. and also for

the establishment in the future of nurseries for juveniles. A survey was conducted on the relationship between the density of *Z. marina* L. and that of *P. kessleri* C. larvae in June 1982 and June 1984, shortly after the hatching of *P. kessleri* C. larvae, at 3 points in Notsuke Bay. At the same time, the water temperature in the surface layer and the bottom layer at each point was observed.

#### Relationships between aquatic birds and wetland characteristics in the Aspen Parkland, central British Columbia

by W.S. Boyd, J.-P.L. Savard and G.E.J. Smith. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1989. ix, 61 p. : ill. Bibliogr. (Technical report series ; no. 70) ISSN 0831-6481 ISBN 0-662-17035-0  
MICROLOG 90-02390 1 fiche

Riske Creek is the centre of one of the most important wetland complexes for breeding waterfowl in B.C. To protect and manage that complex and others for the benefit of aquatic bird populations, an understanding of the relationships between habitat and bird numbers is needed. This study identifies potentially important abiotic habitat components of Riske Creek wetlands and determines the amount of variation in adult and brood numbers of different aquatic bird species and species groups that could be accounted for by those components, as well as determining the significance of biotic habitat components.

#### The Relative effectiveness of fixed-wing aircraft and helicopters for surveying Trumpeter Swans

by L.J. Shandruk and K.J. McCormick. Ottawa : Canadian Wildlife Service, 1989. 3 p. Bibliogr. (Progress notes ; no. 182) *French ed. (Efficacité comparée de l'avion...)* : 90-02460/1.  
MICROLOG 90-01096 1 fiche

While fixed-wing aircraft have been used in wildlife management for over 40 years, their flight characteristics (relatively high cruising speed, minimum flight height, limited manoeuvrability) limit their effectiveness. This note presents the results of a comparison between fixed-wing aircraft and helicopters in surveying an area in the vicinity of Nahanni Butte in the southwest portion of the Mackenzie District, Northwest Territories for trumpeter swan.

#### Relative humidity measurement for fire danger rating in Canada

by M.D. Flannigan and P.J. Litwin. Chalk River, Ont. : Canadian Forestry Service, Petawawa National Forestry Institute, 1989. v, 10 p. : ill. Bibliogr. (Information report ; PI-X-93) ISSN 0706-1854 ISBN 0-662-17216-7  
MICROLOG 90-00226 1 fiche

Relative humidity (RH), along with temperature, wind speed, and 24-h precipitation, are the inputs for the Canadian Forest Fire Weather Index (FWI) System. The FWI is in use across Canada and, as a result, most provinces have established a network of meteorological stations to collect data. The instruments measuring these variables are not standardized across the country, particularly for RH. Traditionally, RH was calculated by measuring the wet- and dry-bulb temperatures inside a Stevenson screen. Some provincial fire control agencies use non-ventilated screens to calculate RH instead of ventilated screens. Initially, this investigation compared RHs calculated within ventilated and non-ventilated screens, but the study was eventually broadened to compare various instruments and procedures that are in common use for

measuring or calculating RH.

#### Relative status of furbearer species in Manitoba's registered trapline area determined through questionnaire analysis, 1988-89

by C.S. Johnson. Winnipeg : Manitoba Natural Resources, Wildlife, Biological Services, 1989. iii, 19 p. Bibliogr. (Manuscript report ; no. 89-17)  
MICROLOG 90-00434 1 fiche

A questionnaire was administered to registered trapline trappers in the 1987/8 trapping season to determine whether a large number of trappers or traplines could be surveyed and if the information returned was reliable and useful. It was concluded that it was and the project was conducted again in the 1988/9 trapping season to determine changes in the furbearing population levels as well as the effectiveness and reception of questionnaires on an annual basis. This report gives the results of the 2nd year questionnaire, based on responses from 15% of registered trappers representing 32% of lines and 66% of registered trapline sections.

#### Relever le défi : la réponse du gouvernement au Comité permanent sur le statut de la personne handicapée

Ottawa : Secrétaire d'Etat, Président du Conseil du trésor, 1987. 149 p. *L'éd anglaise* (Accepting the challenge : government's...) sur la même fiche.  
MICROLOG 90-05640 4 fiche

Le 10 décembre 1985, le Premier ministre a annoncé la participation du Canada à la Décennie des personnes handicapées organisée par l'Organisation des Nations Unies. Il a également annoncé une série de principes qui permettent aux Canadiens handicapés d'entretenir des rapports justes et équitables avec leur gouvernement national. Ces principes s'inspirent des efforts déployés par le Comité parlementaire spécial concernant les invalides et les handicapés. Ce rapport donne des renseignements sur les mesures prises par le gouvernement dans le cadre du programme d'équité en matière d'emploi pour ces personnes handicapées.

#### Relever le défi : stratégies de réussite pour les écoles du Manitoba

Winnipeg : Education et formation professionnelle Manitoba, 1990. 37, 35 p. *Bilingue* (Answering the challenge...).  
MICROLOG 90-07215 1 fiche

L'école secondaire a pour but de fournir aux élèves les connaissances, les aptitudes, le degré de confiance et les valeurs dont ils auront besoin pour réussir dans la vie et contribuer utilement à la progression de la société. Ce document sert à établir le plan d'avenir pour l'éducation secondaire y compris la mesure et l'évaluation des élèves et du processus éducationnel au cours de la prochaine décennie. Quelques-uns des concepts clés énoncés dans le présent document portent sur les changements pédagogiques, les objectifs généraux, les principes d'un programme de qualité pour les écoles secondaires et sur les stratégies proposées afin de bien effectuer les changements prévus. Les attentes de la société face au système scolaire y sont aussi adressées. Les lignes directrices, telles que proposées, sont le résultat d'un processus de revue approfondi et reflètent la participation de tous les intervenants au processus scolaire tels les parents, les éducatrices et éducateurs, les établissements postsecondaires, les entreprises ainsi que l'industrie.

#### Remeasurement of TH-230 in the porewater of Lacnor tailings

by W.J. Snodgrass and D.R. Hart. Ottawa : Atomic Energy Control Board, 1990. iv, 157 p. ill. Bibliogr. (Research report ; INFO-0353)  
MICROLOG 90-07093 2 fiche

A resampling of the Lacnor tailings management area was undertaken under a comprehensive quality assurance program to establish levels of thorium 230 in pore water. A quality assurance program was established for field sampling, sample handling and transport, and laboratory procedures and reporting. The external audit was used to evaluate analytical bias (on synthetic and field samples) and precision (by comparison of duplicate-duplicate results). Accuracy was assessed using synthetic samples. A qualitative interpretation of the controls on thorium 230 geochemistry is provided in terms of control by thorium 232 and thorium dioxide(c) solid phase. Generic dose estimates for consumption of water containing thorium 230 are made but require refinements to account for the actual pH of the drinking water and the degree of dilution of the pore water.

## Report and recommendations on the Nova Scotia Power Corporation Point Aconi Generating Station

by W.A. Coulter. Halifax : Dept. of the Environment, 1990. 18 p.  
MICROLOG 90-04599 1 fiche

The Nova Scotia Power Corporation registered its proposed 150 MW coal-fired, circulating fluidized bed generating station in 1989. The station was later increased to 165 MW capacity. The environmental assessment process was followed, with public meetings held for one day in January 1990. A technical review was coordinated with federal and provincial government agencies. This report provides a description of the project; a discussion of the issues of technology, air quality, the circulating water system, the fresh water supply, ash disposal, liquid wastes, beach access, transportation, impacts on bird populations, and archeological/paleontological impacts, and conclusions and recommendations for community consultation, monitoring, operational requirements and contingency plans.

## Report and recommendations regarding the Environmental Assessment Report for the proposed Point Aconi electrical generating station

Halifax : Environmental Control Council, 1990. x, 105 p. Bibliogr.  
MICROLOG 90-03279 2 fiche

The Nova Scotia Power Corp. (NSPC) announced plans to build a 165 MW generating station at Point Aconi, on Boularderie Island, Cape Breton, based on a requirement for new generating capacity. NSPC proposes to construct a unit using circulating fluidized bed (CFB) combustion technology. The unit will have turbine generators, coal and limestone storage and handling facilities, an ash management area, a well field to supply fresh water and a circulating water system. A review panel was authorized by the Council and held a hearing January 17, 1990. This report presents the review panel's recommendations, background information and the mandate of the Council, public consultation measures, and concerns expressed. These concerns included legislation, alternatives, fuel and sorbent management, liquid waste management, fresh water supply, circulating water system, air quality, general construction practices, community concerns, and the formation of a local monitoring committee. Also included are the terms of reference for the environmental assessment report, an executive summary, and a list of submissions.

**Report of the Advisory Council on Community-Based Programs for Women**

Advisory Council on Community-Based Programs for Women (B.C.). Victoria : The Council, 1990. i, 37 p.  
MICROLOG 90-07005 1 fiche

The goal of the Council is to create a reality based on respect for the rights of women; a reality which recognizes and supports the dual role played by many women as caregivers and paid workers; a reality in which women's social, economic and political contributions are encouraged and valued equally; and a reality in which women have an equal share in power and influence. This report examines the existing network of services in light of this vision and outlines the following steps to achieve a new reality for women: improving access, expanding services, filling gaps, more effectively coordinating existing services at the community level, and planning for future services.

#### Report of the Newfoundland heart health survey, 1988-89

St. John's : Dept. of Health ; Ottawa : Dept. of National Health and Welfare, 1990. 47 p.  
Summary (6 p.) laid in.  
MICROLOG 90-06025 1 fiche

Newfoundland experiences higher death rates from cardiovascular disease than the Canadian average. This study estimates the prevalence and distribution patterns of cardiovascular disease risk factors, including high blood pressure, elevated blood lipids, smoking and obesity in the province. It also determines how much the residents of the province knew about those factors in their relationship to heart disease and stroke. The survey which consisted of a home interview and clinic visit, was conducted by specially trained community health staff between November 1988 and March 1989.

#### Report of the PCB Working Group

Toronto : Dillon Consulting Engineers and Planners, 1989. 72 p. : ill.  
MICROLOG 90-02857 1 fiche

The Ontario Waste Management Corp. (OWMC)'s draft environmental assessment report was reviewed by Ontario Hydro, which was concerned that it did not address the management of PCB wastes in transformer carcasses, capacitors, transformer bushings, and other equipment such as electromagnets, regulators and switches. Since it is OWMC's intent to be able to manage all PCB wastes generated in the province, OWMC established a working group to incorporate Ontario Hydro comments in a more comprehensive PCB waste management program. The working group was to identify the quantities of PCB waste that are likely to be treated; and to assess any technologies or modifications to the proposed facility design that would be required to accommodate all PCB wastes. This report of the working group covers both these areas.

### A Report on a model for making projections of interprovincial migration flows in aggregate and by occupation

by B. Ahamad and R. Rowley. Ottawa : Employment and Immigration Canada, 1986. ii, 59 p. Bibliogr. (COPS : consultant report) French ed. (*Modèle de projection...*) on the same fiche. MICROLOG 90-00775 2 fiche

Describes a model for making projections of interprovincial migration flows in aggregate using both economic factors, such as employment and income, and demographic variables, such as age and sex, as determining factors or independent variables. It also describes a model for disaggregating the projections derived in the first model by occupation using 1981 census data and data from the Labour Force Survey Supplement of August 1982. CA SA

### A Report on a requirements definition, implementation plan and costs for a GIS pilot in the Department of Fisheries and Aquaculture

by F.J. Kolls. Fredericton : Fisheries and Aquaculture New Brunswick, 1990. 48 p. MICROLOG 90-05698 1 fiche

The Department undertook a requirements definition study on the potential use of geographic information systems (GIS) technology for its management needs. This report details this requirement study as well as a range of other associated issues, such as the need for a memorandum of understanding with the federal Department of Fisheries and Oceans (DFO), data sources for GIS other than DFO, the resources required by a GIS and an implementation schedule and estimated costs for Phase II of the pilot study. An appendix describes current coastal mapping initiatives in Canada and the U.S., as well as examples of basic data sources needed by the Department for Phase II of the plan. ● AP CA FI PS SC

### Report on a special investigation into air traffic control services in Canada

Ottawa : Canadian Aviation Safety Board, 1990. iv, 53 p. French ed. (*Rapport sur...les services de la circulation...*) : 90-04030/1. ISBN 0-662-17693-6 MICROLOG 90-03546 1 fiche

Following a series of losses of separation between aircraft at Lester B. Pearson International Airport in Toronto in late 1988, the Board decided to conduct a special investigation

of the safety aspects of the current air traffic control situation in Canada. A detailed file review was conducted on 217 occurrences investigated by either Transport Canada or the Canadian Aviation Safety Board. In addition, more than 80 interviews with representative controllers and users of the air traffic services system were conducted. This report presents the results of the review and includes 48 aviation safety recommendations to improve on the current levels of safety. The report covers equipment, staffing, workload, training, supervision, operating procedures, human performance factors, information transfer and management.

# **Report on design considerations for a heat pumped ice field**

Toronto : Engineering Interface Limited, 1989. 66 p. : ill. CANMET contract: 89155-01-SQ. MICROLOG 90-05678 1 fiche

This study involves using an all-electric heating and cooling plant for buildings. The heating of the building is provided for by the freezing of a saturated soil mass located under the parking lot. By the end of the heating season there will be enough ice generated to provide for summer cooling. Methanol is circulated between a 1/2" diameter plastic tubing system and an electric heat pump chiller located in the building. The study uses the new General Motors Oshawa Administration Office, a low energy building, as an example. This report describes the use of the system with this building, including a calculation and comparison of heating and cooling loads, the use of partial seasonal storage, an outline of storage schemes, and an energy summary. A summary of the initial cost and a sensitivity analysis of the economics if other conditions had applied are also included.

#### **Report on recovery of gold from Nova Scotia sulphide concentrates**

prepared by L.A. Adorjan, for the Dept. of Energy, Mines and Resources, CANMET, MSL Division. Halifax : Technical University of Nova Scotia, Minerals Engineering Centre, 1990. iv, 47 p. : ill. CANMET contract. 89166-01-SS.  
 MICROLOG 90-05674 1 fiche

Samples of sulphide concentrate accumulated as a byproduct contain 15-280 g/t gold, which thus makes it a valuable feed material for further processing. Although there are other elements present, these quantities are not economic for recovery. The test work was carried out to establish suitable methods for the recovery of gold. Cyanidation was used on samples as received and also on samples ground to various finenesses. Variables such as pH, pre-aeration, and introduction of oxygen by hydrogen peroxide were tested and optimized. Since the distribution of gold in these concentrates is relatively coarse, shaking tabling was also tested.

MICROLOG 90-02030 7 fiche

Comprehensive annual summary of the performance of all sewage treatment plants in Ontario, assessing biochemical oxygen demand (BOD), suspended solids (SS), and total phosphorus (TP) against sewage effluent quality guidelines. This 1988 report is the first to assess these parameters against the limits stipulated in the certificate of approvals (C of A) for some plants. The report presents a brief summary of the number of plants failing BOD, SS and/or TP with effluent guidelines and C of A, discusses a comparison of plants exceeding effluent guidelines between 1981 and 1988; and highlights plants that did not provide sufficient data for assessment and plants that exceeded effluent guidelines for 3 successive years. The report also lists all plants exceeding effluent guidelines and indicates if they have remedial actions; gives a summary of the plants that did not comply with their C of A, provides a plant by plant summary of monthly averages for flows concentrations and loadings of the parameters assessed, and provides a monthly summary of duration, volume and number of instances of primary bypass and secondary bypass data.

**Report on the 1988 industrial direct discharges in Ontario**

Ontario Water Resources Branch. Toronto : Ministry of the Environment, 1989. 445 p. CSI 55123.020. ISSN 0838-519X  
MICROLOG 90-02029 5 fiche

This annual update of the status of all industrial direct dischargers in Ontario includes monthly and yearly average loadings and effluent limits; actual monthly and yearly loadings vs. limits; fish toxicity test results where available; and trend analysis for petroleum refining, pulp and paper mills, and primary steel producers. Descriptions of the various effluents limits as requirements (by a legal document) or guidelines (a desirable objective), the company self-monitoring and the Ministry audit program, and the various sources and their effluent loadings are given. The report also includes a discussion on compliance, a table of new Ministry enforcement actions, tables of remedial actions for sources not meeting limits criteria, and a progress report on the Municipal

Industrial Strategy for Abatement - MISA Program.

**Report on the Commercial Tenancy Act**

Vancouver, B.C. : Ministry of Attorney General, Law Reform Commission of British Columbia, 1989. vi, 184 p. Bibliogr. (Report : LRC 108) ISSN 0843-8908 ISBN 0-7718-8908-9  
MICROLOG 90-03066 2 fiche

This report addresses the following questions concerning the Act: Are all its provisions relevant to the needs of the late 20th century? Are there anachronisms that should be eliminated? Of those provisions that remain relevant, which should be expressed in more modern and accessible language? Are there aspects of the law, on which the Act is silent, that seem to call for statutory intervention to clarify and modernize them? Should the provisions of other enactments that apply mainly to commercial tenancies be consolidated with the Act?

### Report on the English property (McKeen Quarry), Pictou County

by G.B. Dickie. Halifax : Dept. of Mines and Energy, 1987. 28 p. : maps. Bibliogr. (Open file report : 87-023)  
MICROLOG 90-02567 1 fiche

The English property is approximately 150 acres in the east end of the town of Pictou, Nova Scotia. An old building stone quarry, known as the Fogo or McKeen quarry, is located in the central part of the property. In 1986, holes were drilled to determine the remaining reserves of building stone. Additional testing was carried out more recently on the drill core and quarry samples to determine the suitability of the sandstone for rip rap, fill and coarse aggregate. This report presents the results of that work.

### Report on the estimated impacts of MISA : implementation on wastewater treatment residual production by selected industrial sectors in Ontario

Canviro Consultants Ltd. Toronto : VHB Research & Consulting Group, 1989. vi, 125 p. Bibliogr. Produced under contract for the Ontario Waste Management Corporation.  
MICROLOG 90-02877 2 fiche

Report to quantify the potential impact of the Municipal and Industrial Strategy for Abatement (MISA) implementation on subject waste generation in Ontario. The study was limited to direct and indirect discharges from iron and steel, metal finishing and metal casting, organic and inorganic chemical and metal finishing industries. Information on wastewater quality currently discharging by direct dischargers was obtained from the 1986 industrial monitoring and information systems database. A number of potential scenarios were assumed regarding the effluent standards likely to be imposed as a result of MISA implementation. Assumptions were made on the technologies likely to be used to achieve these effluent standards, and the dry solids produced by these technologies and the required effluent standards were calculated.

### A Report on the Green Plan consultations

Ottawa : Environment Canada, 1990. 137 p. ISBN 0-662-18079-8  
MICROLOG 90-06827 2 fiche

This document is a summary of what Canadians, who participated in the consultations, had to say about environmental issues and concerns, the solutions, roles and responsibilities, and priorities for action. It is based on detailed reports from 41 information sessions and 17 consultation workshops held across Canada. It is based on some 3,000 pages of comments and suggestions, an analysis of 4,500 question response forms, and written submissions from more than 1,000 individuals and organizations. The report is organized into two sections. The first section deals with such cross-cutting themes as science, education, enforcement, decision-making processes, and partnerships. The second section deals with specific environmental issues identified in the consultation document, such as global warming and toxic substances, and the publicly identified issues, including energy and land use.

### A Report on the International Fisheries Energy Optimization Workshop

by R. Buxton and D. Robertson. Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region, Fisheries Development Program, 1989. iii, 28 p. (General education series ; no. 10) ISSN 0835-7005 ISBN 0-662-17376-7  
MICROLOG 90-04864 1 fiche

This first meeting of the working group consisted of 47 delegates from 13 countries (including 29 from Canada). They reviewed energy optimisation programs in different countries; developments in harvesting technology with implications for energy optimisation; developments in vessel design and construction which would assist energy optimisation; how to transfer energy saving technology to those who might profit by it, particularly those in artisanal fisheries; more futuristic opportunities for energy optimisation; and how the IFEQ working group could work effectively to carry out its mission. Several samples of these were contained in papers distributed to delegates, and presented in summary form with discussion at plenary meetings of the working group. Smaller group sessions then discussed these and other opportunities for energy saving and their applicability in particular types of fisheries.

### Report on the ocean science and technology sector of the oceans industry of British Columbia

Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. vii, 34 p. Bibliogr. (Economic and commercial analysis report ; no. 25) ISSN 0843-5626  
MICROLOG 90-01439 1 fiche

Canada's offshore area supports the oceans industry, companies which use the ocean's renewable and non-renewable resources such as fishing, aquaculture, mining, recreation, and oil and gas exploration and development, and companies which supply ocean users with goods and services such as shipping, shipbuilding, and a diversified range of highly specialized science and advanced technology-based products. In 1987, the federal government announced an oceans policy for Canada, the main strategy of which involves the promotion of the Ocean Science and Technology (OS&T) sector. This report provides an overview of the OS&T sector of the oceans industry of B.C., positions the sector within the Department of Fisheries and Oceans' overall oceans mandate, speculates on the market outlook for OS&T products and services, and analyzes the factors which constrain the Sector's growth.

### Report on the preliminary assessment of the geology and mineral potential of the early proterozoic Hurwitz group, District of Keewatin

by J. Patterson. Yellowknife : Indian and Northern Affairs Canada, Geology Division, 1989. 31 p. ill., maps. Bibliogr.  
MICROLOG 90-01959 1 fiche

In the past decade and a half, portions of the western Churchill structural province, previously one of the most poorly understood portions of the Canadian Shield, have been the focus of stratigraphic, structural, metamorphic and tectonically-oriented geological studies. The dominantly siliciclastic Hurwitz assemblage was modelled as a sequence deposited on a metastable craton or a geosynclinal succession. The importance of understanding the Hurwitz group in the context of the evolving Churchill province lies in the light it can shed on the development of the western Churchill structural province and other such orogenic systems. This report provides the results of geologic investigations begun in the summer of 1988. Mapping and section measuring was done in 4 areas to provide a reconnaissance look at the Hurwitz group both along and across strike to determine areas suitable for more detailed studies.

**Reproduction and sex composition of the North Atlantic rock grenadier**

by P.I. Savvatimskii. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 31 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5389) *Originally published in Russian, by PINRO, at Murmansk, U.S.S.R.* ISSN 0704-3716 MICROLOG 90-01549 1 fiche

The study of the ecology of grenadiers of the North Atlantic is important to the further development and improvement of deep-sea fishing. To date, the mode of life of grenadiers has not been studied sufficiently because of their deep-sea habitat. Different and often contradictory information is given in the scientific literature on their distribution, migrations, fecundity and spawning seasons and duration; all of which are presented in this paper.

### Reproductive biology of Pacific cod and English sole from the cruise of the *FV Blue Waters* to Hecate Strait, January 30 to February 11, 1989

by R.P. Foucher...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. iv, 85 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2026) ISSN 0706-6473  
MICROLOG 90-01065 1 fiche

Results of the 4th cruise in a series in Hecate Strait to study the reproductive biology of Pacific cod and English sole. The study collected samples to determine gonosomatic index, sex ratio, size at 50% maturity, and ovary ripening stage for a description of the annual maturation cycle in both species. In addition, biological samples were taken to describe fecundity as a function of body weight and age for Pacific cod, and to preserve samples of the ovaries for histological preparation for microscopic examination of the progressing of oocyte development in English sole.

### Requirements of carp and rainbow trout for essential amino acids

by C. Ogino. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 10 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5437) Originally published in Japanese ISSN 0704-3716  
MICROLOG 90-00616 1 fiche

The essential amino acid requirements of fish are found by rearing fish on feed in which all or part of the feed proteins are replaced by amino acid mixtures, calculated through the relationship between the acids in the feed and the weight increase rates of the fish. This paper presents the results of an experiment in which the essential amino acid compositions of fish body proteins were used as a standard to find the essential amino acid requirements for carp and rainbow trout. The protein essential amino acid compositions were tested in conjunction with the volumes of proteins contained in the feed, the feeding rates, and the digestive absorption rates of proteins.

### Research and development opportunities for advancing highway freight transport technologies

by S. Vespa and P. Toogood. Montreal : Transportation Development Centre, 1989. xxxix, 121 p. Bibliogr. French ed. (*Créneau de recherche...*) : 90-04099/2  
MICROLOG 90-01736 2 fiche

Examination of current technological issues in highway freight transport and identification of research areas that cover technologies spanning vehicle, driver, infrastructure, operations, compliance with regulations, and collection of exposure and accident data. Technology assessment and diffusion are discussed in relation to the needs of government and industry and R&D in highway freight transport technologies is presented for federal government and Transport Canada objectives, priorities and responsibilities. From this perspective, objectives and sub-objectives for an R&D program to be conducted by the Transportation Development Centre are proposed that respond to the federal government mandate and to industry needs. Information was gathered from a literature survey and from interviews with, and written comments from, representatives of several federal government departments and 6 provincial governments, various manufacturers, operators and industry associations, and researchers in federal, provincial and university laboratories.

### Research and development in Manitoba mines, task 1A : vertical block mining (VBM) design guidelines : summary

prepared by Golder Associates Ltd. ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. x, 62 p. : ill. Bibliogr. CANMET contract: OSQ84-00403.  
MICROLOG 90-05679 1 fiche

A study into the application of vertical block mining (VBM) at Inco's Thompson Mine was undertaken to develop design guidelines to provide information that could be used by Thompson to increase efficiencies or by another mine to examine in detail the application of the method to steeply dipping orebodies. The study addresses cut-and-fill mining; data collection systems; VBM stage design; drilling and blasting; support requirements, and stoping procedures. This document provides a summary of each of these topics.

• CA CM MS NR PS SC

### Research and development in Manitoba mines, task 1A : vertical block mining (VBM) design guidelines, chapter 1 : cut and fill mining : final report

prepared by Steffen Robertson and Kirsten (B.C.) Inc. ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. ii, 62 p. : ill. Bibliogr. CANMET contract: OSQ84-00403.  
MICROLOG 90-05669 1 fiche

This chapter of the study describes cut-and-fill stoping as it is practiced in Manitoba and examines the potential for improvements, especially of the procedure used at Inco's Thompson Mine in those areas where vertical

block mine stoping is not appropriate. Cost and productivity applicable to Manitoba cut-and-fill operations are developed and compared with experience elsewhere. Cut-and-fill operations are described at the Thompson Mine and the Trout Lake Mine, representing the application of the method to narrow and wide orebodies respectively.

• CA CM MS NR PS SC

**Research and development in Manitoba mines, task 1A : vertical block mining (VBM) design guidelines, chapter 2 : data collection systems, vol. I report : final report**

by G. Greer, R. Platford, R. Proulx ; by Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. iv, 88 p. : ill. Bibliogr. *CANMET contract: OSQ84-00403.* MICROLOG 90-05668 2 fiche

The vertical block mining (VBM) design guidelines consists of 7 chapters, published separately, of which this is chapter 2, vol. I. At Thompson Mine, a data collection system was developed based on the case histories from the mining of 127 vertical crater retreat blocks. The database was separated into 2 sections. The geotechnical database included categorizations such as geology, structure, strength and rock mass quality, including the concept of stress and the effect of the redistribution of stresses through the use of visual monitoring and field instrumentation techniques. The mine operational database was separated into categories such as stope geometry, development, drilling, blasting and mucking. Mining efficiency, measured from the combination of parameters from these groupings, was subsequently derived from the mine operational database.

• CA CM MS NR PS SC

**Research and development in Manitoba mines, task 1A : vertical block mining (VBM) design guidelines, chapter 2 : data collection systems, vol. II, appendices A-F : final report**

by G. Greer, R. Platford, R. Proulx ; by Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. 380 p. : ill. *CANMET contract: OSQ84-00403.* MICROLOG 90-05670 4 fiche

The vertical block mining (VBM) guidelines consist of 7 chapters, published separately, of which this is chapter 2, vol. II. These appendices include a glossary of items collected in the project database, the stope data files, a case study of the development of a vertical crater retreat mine database at Inco's Thompson Mine; methods of line surveys; a case history for section sketching; and a case history for field instrumentation.

• CA CM MS NR PS SC

**Research and development in Manitoba mines, task 1A : vertical block mining (VBM) design guidelines, chapter 3 : VBM stope design : final report**

by G. Greer, R. Platford, R. Proulx ; by Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. iii, 160 p. : ill. Bibliogr. *CANMET contract: OSQ84-00403.* MICROLOG 90-05667 2 fiche

The vertical block mining (VBM) design guidelines consist of 7 chapters, published separately, of which this is the third. A philosophy of stope design was developed in which past experience is used to calibrate both empirical and numerical models. In turn, these models are used to assess applicable stope dimensions and to predict ground control events associated with different stoping sequences, through the use of ore value,

tonnage and prediction requirements.

• CA CM MS NR PS SC

**Research and development in Manitoba mines, task 1A : vertical block mining (VBM) design guidelines, chapter 4 : drilling and blasting : final report**

prepared by Golder Associates Ltd. ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1989. 78 p. : ill. Bibliogr. *CANMET contract: OSQ84-00403.* MICROLOG 90-05666 1 fiche

The vertical block mining (VBM) design guidelines consist of 7 chapters, published separately, of which this is the 4th. This chapter describes drilling and blasting as it relates to the VBM system of mining practised at Inco's Thompson Mine; compares these activities with like activities practised elsewhere, and assesses the potential for improvements in VBM design and operating practices.

• CA CM MS NR PS SC

**Research and development in Manitoba mines, task 1A : vertical block mining (VBM) design guidelines, chapter 5 : support requirements : final report**

prepared by Golder Associates Ltd. ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. iii, 151 p. : ill. Bibliogr. *CANMET contract: OSQ84-00403.* MICROLOG 90-05665 2 fiche

The vertical block mining (VBM) design guidelines consist of 7 chapters, published separately, of which this is the fifth. This chapter develops support guidelines, based on current industry practice, accepted design procedures and experience gained at Inco's Thompson Mine. The guidelines proposed provide a rational basis for selecting support type and density to ameliorate back failure, access loss or deterioration, and hangingwall slough. Though primarily oriented towards development excavation support, the guidelines also address the requirements for stope walls.

• CA CM MS NR PS SC

**Research and development in Manitoba mines, task 1A : vertical block mining (VBM) design guidelines, chapter 6 : VBM stoping procedures : final report**

prepared by Golder Associates Ltd. ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1989. 81 p. : ill. Bibliogr. *CANMET contract: OSQ84-00403.* MICROLOG 90-05664 1 fiche

The vertical block mining (VBM) design guidelines consist of 7 chapters, published separately, of which this is the sixth. This chapter describes stoping procedures for VBM as they are practiced at Inco's Thompson Mine. A description of stoping procedures at other similar operations is also provided to illustrate practical mining solutions which have evolved in somewhat different geologic environments.

**Research and development in Manitoba mines, task 2 : ground stability evaluation with particular reference to an en echelon lensed orebody, phase II : cable support trial at the Rutan operation, sill pillar**

by Hudson Bay Mining and Smelting Company, Limited ; in association with Pakalnis and Associates. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. v, 76 p. : ill. Bibliogr. (Report ; MRL 90-45) *CANMET contract: OSQ84-00330.* MICROLOG 90-07134 1 fiche

The Rutan Mine, a 6,000 tpd underground operation, is located in Northern Manitoba, 760 km north of Winnipeg and 20 km east of the town of Leaf Rapids. The Rutan copper-zinc orebody is a multi-lensed, steeply dipping en echelon deposit. This study summarizes a cable bolt program that was implemented at the Rutan operation under the joint sponsorship of Hudson Bay Mining and Smelting Inc., CANMET and the Manitoba Dept. of Mines under the Canada-Manitoba Development Agreement. The overall objective was to study the effectiveness of employing cables to support the back of an individual stope. This report summarizes the cable bolt trial implemented on the 550-20Jn sill with respect to the overall effectiveness of this form of support. This was determined visually as well as through instrumentation.

• CA CM MS NR PS SC

**Research and development in Manitoba mines, task 4 : geotechnical database for ground control : geomechanical model, data retrieval system : final report**

by J.A.C. (Tony) Diering and A. (Allan) Moss ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. iii, 89 p. : ill. *CANMET contract: OSQ84-00404.* MICROLOG 90-05660 2 fiche

A user friendly geotechnical database retrieval was set up to aid in the evaluation of mine stability and design. This system provides storage for pertinent mine data and allows the

use of software grid manipulation or contour overlays to determine structural trends to aid in predicting potential ground problems. Contour plots of the mining geometry, and selected geological plots are constructed to determine if any relationships exist between wall slough or poor ground conditions and different geological parameters.

- CA CM MS NR PS SC

**Research and development in Manitoba mines, task 4 : geotechnical database for ground control : geomechanical modelling : final report**

by Allan Moss ; Steffen Robertson and Kirsten (Mining), Inc. ; under sub-contract to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1989. 2 v. : ill. Bibliogr. *Contents: Vol. I : Report -- vol. II : Appendices. CANMET contract: OSQ84-00403. MICROLOG 90-05681 3 fiche*

Examination of methods of data collection for rock masses, leading to the modelling of such masses in deep rock mines. Initially, standard data collection methods developed for open pit studies were used, but these were found to be untenable in the underground environment, largely due to time requirements. Ultimately, it was found that a simplified version of scan line surveys provided the most appropriate method of data collection. This report describes the data collection procedures, the rock mass characterization, general mining conditions and stresses around underground openings, and data collection and reduction at Inco's Thompson Mine in Manitoba.

- CA CM MS NR PS SC

**Research and development in Manitoba mines, task 4 : geotechnical database for ground control : numerical model, QUAD user manual : final report**

by Steffen Robertson and Kirsten (B.C.) Inc. ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. iv, 186 p. : ill. *CANMET contract: OSQ84-00404. MICROLOG 90-05662 3 fiche*

QUAD is a 2-dimensional finite element analysis program for plain stress and plain strain analysis, using linear, triangular or quadrilateral elements for modelling. Axisymmetric 3-dimensional structures can also be analyzed. Structural systems which can be analyzed include slopes and embankments, mining excavations, and tunnels and underground caverns. This user's manual explains how to install and run QUAD: the hardware requirements and system limitations; model preparation and input data; the keyword system, and the menu system. Examples are included.

- CA CM MS NR PS SC

**Research and development in Manitoba mines, task 4 : geotechnical database for ground control : numerical modelling : final report**

by J.A.C. (Tony) Diering ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. 105 p. : ill. Bibliogr. *CANMET contract: OSQ84-00404. MICROLOG 90-05661 2 fiche*

Description of the development and testing of 4 computer programs for numerical stress analysis of underground excavations. The programs are QUAD, a 2-dimensional finite element analysis package and BEAP, BEAP-DD and BEAP-M, which are 3-dimensional boundary element analysis packages. The programs represent further developments of the earlier programs QUAD and MBEM. The study took place over 5 years and was intended to improve the usability and capability of existing

software, in particular to enable multi-step analyses, improved modelling of open-pit/underground interactions and non-linear behaviour to be performed.

- CA CM MS NR PS SC

**Research and development in Manitoba mines, task 4 : geotechnical database for ground control : numerical modelling, BEAP user manual : final report**

by J.A.C. (Tony) Diering ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. 71 p. : ill. Bibliogr. *CANMET contract: OSQ84-00404. MICROLOG 90-05659 1 fiche*

BEAP facilitates fully 3-dimensional stress analysis of underground excavations. Excavation surfaces, the earth's surface and geological interfaces are all modelled with boundary elements, using a non-conforming quadratic variation element which provides numerous advantages for the stress modelling of mining excavations. This user's manual gives an overview of the system, including application areas, features, limitations, non-conforming elements, and geometric and function nodes; and describes installation and preparation of user input files, modules within BEAP, and running BEAP. Sample data files are included.

- CA CM MS NR PS SC

**Research and development in Manitoba mines, task 4 : geotechnical database for ground control : numerical modelling, BEAP-DD user documentation : final report**

by J.A.C. (Tony) Diering ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. 68 p. : ill. Bibliogr. *CANMET contract: OSQ84-00404. MICROLOG 90-05658 1 fiche*

BEAP-DD facilitates 3-dimensional stress analysis of underground excavations which are tabular in nature. Excavation surfaces and sometimes the earth's surface are modelled with displacement discontinuity elements, using a square displacement discontinuity element with constant variation of closures and tractions across each element. This user manual gives an overview of the system, including its application areas, features, limitations, and geometric nodes, lumps and elements; its installation, including starting, database files, test data files and program files; the preparation of user input files; a description of program modules; and 3 examples of running BEAP. Sample data files are also included.

- CA CM MS NR PS SC

**Research and development in Manitoba mines, task 4 : geotechnical database for ground control : numerical modelling, BEAP-M user documentation : final report**

by J.A.C. (Tony) Diering ; sub-contracting to Inco Limited, Thompson Division. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. 36 p. : ill. Bibliogr. *CANMET contract: OSQ84-00404. MICROLOG 90-05657 1 fiche*

BEAP-M facilitates 3-dimensional stress analysis of underground excavations which are tabular or massive in nature. Excavation surfaces and the earth's surface are modelled with boundary elements or displacement discontinuity elements, using square displacement discontinuity elements with constant variation of closures and tractions across each element and non-conforming quadratic boundary elements. This manual gives an overview of the system, including its application areas, features, limitations and geometric nodes, lumps and elements; gives instruction on installation, including getting

started, the database files, the program files and the test data files; describes preparation of user input files and program modules within BEAP-M; and describes running BEAP. Example data files are included.

**Research and development in Manitoba mines, task 5 : optimization of blast design for blasthole mining, final report**

by Brian C. Maynard ; under sub-contract to Steffen Robertson and Kirsten (B.C.) Inc. S.I. : Canada-Manitoba Mineral Development Agreement, 1990. v, 166 p. : ill. Bibliogr. *CANMET contract: 59251-01-SQ. MICROLOG 90-07133 2 fiche*

Optimization of blast designs can be a rigorous exercise which involve numerous calculations using parameters that change from workplace to workplace. In addition, the results of any particular blast will have large effects on the production rates, mining cost, and dilution of the blasted ore. This project was initiated to provide a rational blast design tool for underground mines and their blasting personnel. The primary objective was to develop a user-friendly software package giving a good first estimate of a suitable blast design and capable of meeting day-to-day production requirements. The result was the BOULDER (blast optimization using locally determined engineering results) blast design optimization software. This report describes the data collection, design methods, and calibration, as well as the features of the software.

**Research and program evaluation inventory for 1988-89**

Toronto : Ministry of Community and Social Services, Research and Program Evaluation Unit, 1989. iii, 137 p. : ill. *CSI 55104.004. ISSN 0838-0546. MICROLOG 90-00148 2 fiche*

This annual inventory is a compilation of research and program evaluation studies conducted within the Ministry of Community and Social Services and within various social service agencies. Studies were included in the inventory if they were funded internally, conducted by a social service agency funded by MCSS or funded by means of a transfer payment grant; they were in progress during the 1988/89 fiscal year; a final report was produced or expected; and they could be categorized as research and program evaluation and used one or more of client case records, program/agency records, psychometric tests, laboratory tests, structured observation, video recordings, literature review, community forums/focus groups, questionnaires or interviews. Not included were operational reviews, strategic plans, policy papers, and annual reports of Ministry and agency programs. The inventory is categorized by children's services, elderly services, services for disabled persons, income maintenance, child care, family support, and ministry-wide issues.

### Research concerning Myxosporidia parasitic in the nervous tissue of yamame and amago, II : distribution and time of appearance of fish parasitized by spores in Hiroshima Prefecture

by Y. Murakami. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 4 p. (Canadian translation of fisheries and aquatic sciences ; no. 5161) *Originally published in Japanese, in Japan.* ISSN 0704-3716  
MICROLOG 90-00105 1 fiche

Myxosporidia parasitic on nervous tissue were discovered in fish suffering from yamame and amago sleeping sickness at 2 salmon farms in Hiroshima Prefecture, and are suspected of being the cause of the sleeping sickness. The occurrence of spores at the infected fish farms was examined, classified by time of occurrence, and compared to other fish caught at salmon farms and in rivers in the prefecture where the sleeping sickness had not been observed.

### Research materials on the biology of the harp seal on drift ice in the White Sea in 1966 and 1967

by N.Y. Yakovenko and Y.I. Nazarenko.

Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 24 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5206) *Originally published in Russian, at Murmansk, USSR.* ISSN 0704-3716  
MICROLOG 90-02703 1 fiche

The expanding trade in marine mammals has led to a considerable reduction in the stocks of those species that are most commercially valuable. There is now an urgent need to document these species and to seek out more sensible ways of exploiting them commercially and of preserving their stocks. This is certainly the case with the White Sea population of the harp seal, which has been intensively exploited by Russian and Norwegian hunters for a long period of time. Field investigations were conducted in 1966 and 1967 and included the determination of the periods of whelping; observations on the growth and development of pups, the behaviour of females on the whelping patches during lactation, and on the course of moulting; study of harp seal estrus; tagging; and a study of the natural mortality of the pups. Aerial reconnaissance was also used for observation.

### Research of acoustic emissions in natural gas vehicle storage cylinders

CNG Fuel Systems Ltd. Ottawa : Transport Canada, Research & Development Directorate, 1987. 49 p. : ill. Bibliogr.  
MICROLOG 90-04488 1 fiche

The use of natural gas (NGV) as an auto fuel involves the on-board storage of NGV at 3000 psig in thick walled high strength steel cylinders. Should such a cylinder rupture, the energy unleashed from the NGV could propel cylinder fragments in a bomb-like fashion. Accordingly, regulations require the periodic requalification of in-use NGV cylinders to minimize user risk. Acoustic emission testing (AET) has been proposed as an alternative to the currently used hydro testing. The report gives the details of a project to validate AET as a means of detecting active cracking. The report includes the procedures followed, the results obtained, and the final conclusions.

This report outlines the results of the sound transmission loss and impact insulation tests. CA PL PS SC

### Research study of highway snowdrifting

by H.A. Baker and C.J. Williams. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1990. xi, 234 p. : ill. Bibliogr. MICROLOG 90-07206 3 fiche

Report on a study to improve existing and develop new methods of controlling drifting snow across highways, to improve highway safety and to reduce maintenance costs associated with snow removal. A literature search was conducted to determine methods currently used, a questionnaire was mailed to 162 highway departments throughout Ontario, Quebec, New Brunswick, the Yukon and the Northwest Territories, and 35 sites were chosen and studied over 3 years. Weather data was obtained from 15 weather stations and analysed for mean snowfall, wind direction with wind speed greater than 15 km/h, blowing snow wind direction, and winds greater than 15 km/h accompanying snowfall. Problem conditions observed during the 1986-87 winter were reviewed along with local meteorological data to develop solutions during the summer of 1987. These solutions were installed at each site prior to the winter of 1987-88 and 1988-89. The data collected were analyzed to produce guidelines. CA SC TR

### Residential magnetic fields : accounting for external sources and residential grounding circuits

by D.A. Barrow. Toronto : Ontario Hydro, Research Division, 1989. 35 p. : ill., maps. Bibliogr. (Report ; no. 89-152-K) MICROLOG 90-01175 1 fiche

A project to characterize the sources of magnetic fields in residential locations was established as part of Ontario Hydro's program to assess the risks, if any, posed by fields due to the electric power system. In this report, a simple model for the strength of the magnetic field at 60 Hz found inside houses is developed to account for the house wiring, and for sources external to the house. In the model the house wiring is reduced to a single circuit carrying the net current on the service drop to the house and the service grounding current. All sources external to the house are combined and represented as a single ambient field assumed to be spatially uniform throughout the volume of the house. This model and a measurement procedure were tested on 5 houses in locations inside the houses remote from appliances, which were not included in the model. EN ON PR PS SC

### Residential renovation data

Clayton Research Associates. Ottawa : Canada Mortgage and Housing Corporation, 1989. ii, 46 p. MICROLOG 90-01275 1 fiche

This document reviews the existing data series on residential renovation in Canada and identifies areas where additional data would be useful. The types of renovation data are grouped into the following 6 areas: overall renovation activity; types of renovation work; characteristics of renovated dwellings and occupants; state of repair of the dwelling stock; requirements and effects of renovation; and renovation industry characteristics. CA SA

### Residential renovation overview : program evaluation report

Ottawa : Canada Housing and Mortgage Corporation, Program Evaluation Division, 1988. viii, 197 p. Bibliogr. MICROLOG 90-01863 3 fiche

The purpose of this study is to provide new information on residential renovation in Canada as a basis for assessing the current and future role of CMHC in this area. The report provides a comprehensive review of residential rehabilitation activity in Canada. It examines the physical condition of the low-rise housing stock and the characteristic and behaviour of firms and property owners participating in the renovation market. Primarily, the report focuses on evidence of market problems in order to isolate areas where government action may be appropriate. It also examines the suitability of current and recent federal programs in the context of the market

problems identified.

### Resource management plan : Wellington County Agreement Forest, 1987 to 1992

Toronto : Ministry of Natural Resources, Cambridge District Office, 1988. vi, 58 p. : maps. ISBN 0-7729-4959-X  
MICROLOG 90-01103 1 fiche

Agreement Forests are parcels of public land being managed for 'forestry purposes' on behalf of the landowner (townships, counties, regional municipalities or conservation authorities) by the Ontario Ministry of Natural Resources (MNR). 'Forestry purposes' includes the production of wood and wood products, provision of proper environmental conditions for wildlife, protection against floods and erosion, recreation, and protection and production of water supplies. Planning the management of the forest is the responsibility of MNR and is done through a 5-year management plan outlining work to take place and an annual report. This annual report gives a physical and administrative description, reports on past operations, describes the resources (timber, fish and wildlife, areas of natural and scientific interest, environmentally sensitive areas), and presents objectives and strategies and proposed management activities.

**Response to recommendation no. 80, Beaufort Sea Environmental Assessment and Review Panel : final report, 1984-89**

Environmental Advisory Committee on Newfoundland and Labrador Marine Transportation ; published by Environment Canada...et al. Ottawa : Environment Canada, 1989. 68 p. Bibliogr.  
MICROLOG 90-03115 1 fiche

In 1980, the Dept. of Indian Affairs and Northern Development initiated a formal public review of a proposed oil development project in Canada's Arctic under the federal Environmental Assessment and Review Process. The project included production of oil from the Beaufort Sea and transport of the oil to southern markets by pipeline, tanker or both. The Beaufort Sea Environmental Assessment Panel was appointed in 1981 to review the activities involved, to identify potential impacts of the project and to recommend mitigative measures. The review included activities north of 60N latitude. In October 1984 the Environmental Advisory Committee on Newfoundland and Labrador Marine Transportation was established to review marine shipping in its area and to recommend preventative measures and guidelines. This report presents its findings on the socio-economic and environmental aspects of tanker traffic, reviews marine shipping activities and their potential impacts, and gives control measures.

**Response to the review of the Post-Secondary Student Assistance Program**

Ottawa : Indian and Northern Affairs Canada, 1989. 8, 8 p. Bilingual (Réponse aux recommandations...). ISBN 0-662-57029-4  
MICROLOG 90-04217 1 fiche

Since the early 1970's the Government of Canada has placed a high priority on providing support to Indians and Inuit wishing to obtain post-secondary education. The motivation for this support, was to assist aboriginal people to achieve individual success in society and to become leaders in their communities. Recognizing that the principles of consultation and consensus are critical to the continuing success of the post-secondary student support policy, a series of consultative and consensus building processes were initiated with Indian leaders this past summer. Through these discussions recommendations for short-term changes have been presented and nine specific policy changes were announced on September 12, 1989. Specific response to each recommendation is provided.

**The Responsible public servant**

by K. Kernaghan and J.W. Langford. Halifax : by K. Kernaghan and J.W. Langford. Halifax : Institute for Research on Public Policy, 1990. xx, 220 p. Bibliogr. ISBN 0-88645-099-3  
MICROLOG 90-04264 3 fiche

This paper examines why there is so much uncertainty as to what constitutes responsible bureaucratic behaviour and how this uncertainty came about. It discusses the concept of public interest, and examines the duty of the public servant to adhere to the constitutional convention of political neutrality. It also addresses the two interrelated issues of confidentiality and privacy, and analyses the public servant's duty of service to the public. In addition, it looks at the issues of interpretation in the examination of conflict of interest, the public servant's duty to be accountable for her or his decisions and recommendations, and what institutional means and techniques can be used to strengthen and encourage responsible public service.

**Ressources pétrolières de la plate-forme néo-écossaise**

par J.A. Wade...et al. Ottawa : Énergie, mines et ressources Canada, Commission géologique du Canada, 1989. iii, 28, iii, 26 p. : ill., cartes géogr. Bibliogr. (Étude ; 88-19) Bilingue (Petroleum resources...). ISSN 0068-7650 ISBN 0-660-55066-0  
MICROLOG 90-01146 1 fiche

Depuis le début de l'exploration pétrolière en 1959 jusqu'à la fin de 1983, 62 forages de reconnaissance ont été creusés sur la plate-forme Néo-Écossaise. Ils ont conduit à 13 découvertes importantes dont les ressources totalisent de nombreux mètres carrés de gaz et d'hydrocarbures liquides. Le présent article retrace l'histoire de l'exploration du gaz et du pétrole sur la plate-forme et donne des détails sur les découvertes. Il présente la géologie régionale et la géologie pétrolière et décrit les variables utilisées pour évaluer les ressources d'hydrocarbures récupérables de la région. Il présente les ressources estimées en fonction d'une série de gisements susceptibles, s'ils étaient découverts, de faire l'objet d'une exploitation marine rentable.

#### Résultats de coupes par bandes dans trois cantons de l'ouest Québécois après quinze ans

par J.-L. Boivin. Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, Direction de la recherche et du développement, 1986. 22 p. Bibliogr. (Note de recherche forestière ; no 33)  
MICROLOG 90-05924 1 fiche

Depuis un certain nombre d'années, des expériences sont faites pour améliorer la représentation du bouleau jaune dans les peuplements de seconde venue. Le bouleau jaune, cette essence intermédiaire quant à la tolérance à l'ombre, demande, pour se régénérer, certaines pratiques sylvicoles particulières telles que la scarification et le dosage adéquat de la lumière par un système de coupe approprié. Ainsi, des coupes expérimentales par bandes ont été essayées en 1969 dans des peuplements feuillus de l'Ouest québécois. L'expérience visait à déterminer l'influence de la coupe de bandes de différentes largeurs (20, 40 et 60 m) sur la régénération du bouleau jaune. Elle a été réalisée dans trois secteurs situés dans les cantons de Horan, Malakoff et Maine. Ce travail décrit les résultats obtenus 15 ans après coupe.

#### The Results of a study of the horizontal and vertical distribution of herring larvae in the North Sea

by V.F. Dubravin, B.I. Dubrovin and E.M. Karaseva. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 15 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5410) Originally published in Russian, at Kalingrad, U.S.S.R. ISSN 0704-3716  
MICROLOG 90-01534 1 fiche

One of the major tasks of fisheries science is to study the reproductive environment of fish and their survival in the early stages of the life cycle. The results of estimating egg and larvae numbers (based on stock surveys) depends to a great degree on the specific characteristics of their horizontal and vertical distribution. An attempt was made in 1971 to solve some of the methodological problems involved in estimating the numbers of fish larvae, while carrying out a survey of the larvae of autumn-spawning herring in the North Sea. Samples were collected with a KHAI high-

speed plankton collector modified with a Gulf-3 device and equipped with a counter for measuring the volume of water filtered. The plankton collector remained at each assigned level for 20 minutes, with a total haul of the bottom to surface layer made at the conclusion of each series.

### Results of the R-2000 homeowner survey

prepared for the R-2000 Home Program ; a project of the Energy Conservation Branch, Energy, Mines and Resources Canada ; by Buchan, Lawton, Parent Ltd. Ottawa : R-2000 Home Program ; Energy Mines and Resources Canada, Energy Conservation Branch, 1988. 25 p. : ill. (Technical report ; 031-PE)  
MICROLOG 90-04601 1 fiche

Extensive monitoring, including a homeowner survey and follow-up survey, was done on the R-2000 homes. These surveys determined the effectiveness of the R-2000 technical specifications, demonstrated energy savings, provided information on indoor air quality and heat recovery ventilator performance, identified areas requiring improvement, assessed occupant satisfaction, and obtained marketing information on the occupants. The homeowners survey initially examined the original 300 demonstration homes and represented the home builder's first attempt at working with the new R-2000 standard. Surveys of these homes were taken mainly from 1983-84. The second homeowner survey included R-2000 homes built under revised technical criteria. These surveys were carried out from 1985-87. This report provides highlights of the surveys, the data analysis procedure, survey results, and overall occupant satisfaction with the home.

## **Le Retraite : analyse des données du Régime de rentes du Québec**

par L. Motard et M. Millette. Québec : Régie des rentes du Québec, 1989. 37 p. : ill. CSI 67176.201. ISSN 0840-4909 ISBN 2-550-19851-4  
MICROLOG 90-02772 1 fiche

Cette brochure sur la retraite présente une analyse des conditions d'attribution de la rente et les montants versés depuis que les premières rentes de retraite sont devenues payables en 1967. Elle étudie l'évolution du nombre de nouveaux bénéficiaires selon l'âge et le sexe de la progression du montant de la rente de retraite. Il en ressort que la proportion des femmes parmi les nouveaux bénéficiaires augmente de façon presque continue, mais que l'écart entre la rente moyenne touchée par les femmes et celle qui est versée aux hommes s'accroît au fil des ans. Enfin, des taux de retraite ont été calculés à partir des statistiques du Régime de rentes à l'égard de la période allant du 1er janvier 1984 (date à partir de laquelle la rente de retraite peut être payable à 60 ans) au 31 décembre 1987.

## **Review of 12-hour shifts at nuclear generating stations : final report**

by A. Smiley and N.P. Moray. Ottawa : Atomic Energy Control Board, 1989. 58 p. Bibliogr. (Research report ; INFO-0318)  
MICROLOG 90-01713 1 fiche

This document reviews the practice of 12-hour shift work schedules at nuclear power plants, and its relationship to safety. It examines the current literature for information on accidents, fatigue and personal preferences. Interviews with operators and maintainers showed that these groups had attitude and preference differences related to both 12-hour shift schedules and overtime work opportunities. It identifies several factors related to 12-hour schedules which could affect safety, but which have not been adequately considered.

**A Review of the activities of the Mineral Sciences Laboratories in plasma technology in the period 1983-89**

by S.A. Mikhail. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1990. 15 p. (Report ; MSL 90-59(LS))  
MICROLOG 90-07118 1 fiche

In the last few years it has become evident that plasma technology, in many instances, has the potential for the efficient substitution of electrical energy for fossil fuel utilization as well as for completely new applications. The availability of an excess supply of relatively inexpensive electric power in some Canadian provinces puts Canada in a favourable position to develop and use plasma technology, although Canadian industries are hesitant to adopt it and Canada lags behind in its development and applications. This report summarizes the research activities of MSL in the field, including a brief account of the nature of the involvement of MSL before 1983, of the inhouse research work and of the contract work sponsored by MSL and funded by the Panel on Energy Research and Development from 1983-89.

**A Review of the Nass River test fishery biological program for 1987 and 1988**

by D.R. Southgate, V.L. Craig and A.L. Jantz. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1989. iv, 88 p. (Canadian data report of fisheries and aquatic sciences ; no. 738) ISSN 0706-6465  
MICROLOG 90-04334 1 fiche

The Nass River test fishery has been operated annually since 1963, with little change. The test fishery occurs on the lower Nass River near Monkley Creek, approximately 16 km from the commercial fishing boundary near Kincolith. The test fishery program provides a daily estimate of the sockeye escapement into the Nass River and the data obtained from this operation is combined with estimates of the commercial catch in Area 3 to provide an indication of how the sockeye run is developing. Although daily escapement estimates are not calculated for the other species of salmon, the relative abundance and timing of chinook is determined by comparing calculated indices. This report documents the information collected during the 1987 and 1988 test fishery programs.

#### A Review of the Nass River test fishery biological program for 1989

by D.R. Southgate, B. Spilsted and L. Jantz. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, 1990. iii, 73 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences, no. 805) ISSN 0706-6465 MICROLOG 90-06630 1 fiche

The Nass River test fishery has been operating annually since 1963, with little change from the original program. The test fishery occurs on the lower Nass River near Monkley Creek, approximately 16 km from the commercial fishing boundary near Kincolith. This report presents information for 1989 on the daily catch of all salmon species and steelhead trout, giving age, sex and length for sockeye and length, sex and flesh colour for chinook salmon. Set times and duration, position in the tide cycle, weather and water conditions and water temperature are given as well. Daily index calculations are tabulated for sockeye and chinook along with escapement estimates for sockeye. In addition, the historical relationships between the annual test fishery index for sockeye and the actual escapement count from the spawning grounds is presented.

**Riparian rights and public foreshore use in the administration of aquatic crown land -- Rev.**

Victoria : Ministry of Crown Lands, Land Policy Branch, 1990. 25 p. Bibliogr. (Occasional paper ; no. 5) ISSN 0827-7354 ISBN 0-7726-1094-0  
MICROLOG 90-07184 1 fiche

In B.C., the Ministry of Crown Lands administers aquatic Crown lands. This paper reviews the riparian rights of property owners and provides guidelines on how to protect these rights and the privilege of public access, while making such land available for other uses. The paper demonstrates the ways in which riparian rights affect and, in turn, are affected by the administration of Crown land. The guidelines provided explain how the Ministry can protect riparian rights in carrying out its administrative function and how it can assert the Crown's right to eroded land. The paper also describes the mechanisms by which the Crown can retain or acquire riparian rights.

**Risk, pooling, contract structure and organizational form of insurance firms**

by N.A. Doherty and G. Dionne. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 31 p. Bibliogr. (Publication ; no. 661) (Cahier ; 8935)  
MICROLOG 90-01427 1 fiche

Previous explanations of the contract choice and organizational form of insurance firms do not explain, by themselves, the recent proliferation of mutuals and new contract designs. This study presents risk bearing arguments to address these phenomena. It presents 2 forms of insurance. The first is a conventional transfer of risk whereas the second decomposes risk between idiosyncratic and non-idiosyncratic. It shows that the latter leads to more active trade in insurance markets with correlated exposures.

**Risque d'érosion éolienne : Manitoba**

par D.R. Coote, R.G. Eilers et M.N. Langman. Ottawa : Agriculture Canada, Direction générale de la recherche, Centre de recherches sur les terres, 1989. 16 p. : carte géogr. Bibliogr. (Centre de recherches sur les terres contribution ; no 87-10) *Bilingue (Wind erosion risk...)*. Carte géogr. pliante non filmée. ISBN 0-662-56330-1  
MICROLOG 90-03442 1 fiche

La dégradation des sols est devenue une préoccupation majeure au Canada. L'un des processus de cette dégradation, l'érosion des sols, est une source d'inquiétude. La carte inclue dans ce document a été dressée dans le but de fournir des informations sur les risques d'érosion du sol par le vent. Les renseignements qu'il contient servent à : évaluer les risques d'érosion éolienne imputables aux caractéristiques naturelles; évaluer les probabilités d'exposition du sol au vent en raison des pratiques culturales et évaluer la protection apportée par les cultures ou leurs résidus; identifier les régions d'une province où des mesures de conservation des sols doivent

être prises; mettre les résultats des recherches, qui ont fait leurs preuves dans une région, en pratique dans d'autres régions possédant les mêmes caractéristiques; établir un lien entre les informations sur le sol et le terrain; et mettre ces connaissances à la disposition des étudiants postsecondaires.

#### The Road ahead for health promotion and disease prevention

by M. Terris. S.I. : Canadian Intergovernmental Conference Secretariat, 1989. 16, 23 p.  
Bibliogr. *Bilingual (La Voie de la promotion de la santé...)*. Presented to the National Symposium on Health Promotion and Disease Prevention.  
MICROLOG 90-00134 1 fiche

This paper identifies the most serious defect of current public health policy in both Canada and all other countries of the world as the assumption that creating a national medical care system is equivalent to establishing a national health program. Examples of differences in mortality rates in areas of Britain since the establishment of the National Health Service are given, as well as in Canada. The determinants of health are identified as the standard of living, prevention, and medical care and of these three, medical care is the least important element. These 3 factors are discussed both generally and in relation to the Canadian delivery of health care.

#### Road and structure protection through weight control : economic and engineering issues

by S.C.J. Radbone, W.A. Phang and R.A. Bibliogr. Toronto : Ministry of Transportation and Communications, 1986. iii, 22 p. : ill.  
MICROLOG 90-01608 1 fiche

To ensure that vehicles and roads are compatible with each other and to attempt to keep the overall private and public expenditures on the total system to a minimum, it is necessary to establish design and maintenance standards for roads and limits on the weights and dimensions of trucks. A balance must be achieved between the limits that truckers may desire and the resultant highway costs that can be afforded. Since pavement damage increases rapidly with increasing axle loading, heavy trucks tend to cause the most pavement damage. Therefore, heavy trucks should bear more of the cost of providing the highway system than other users. This paper considers vehicle operating costs and road construction and maintenance costs, then suggests such user-pay methods as tonne-kilometre taxes, weight-distance tax, and flat rate and fuel taxes.

#### Rocket immunoelectrophoresis to assay type D staphylococcal enterotoxin

by R.B. Naubet'yarov, M.L. Beilbayeva and Y.V. Yezepchuk. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 5 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5486) Originally published in Russian. ISSN 0704-3716  
MICROLOG 90-01682 1 fiche

The problem of quick and reliable interpretation of food poisoning caused by enterotoxigenic strains of staphylococci is still a pressing one. Since the nature of the disease in many cases depends not so much on the pathogenic type contributing to the infectious process as on the type of toxin produced by it, present-day diagnosis of infectious diseases should be based on identification of not only the causative agent, but also the type of toxin produced. Immunoserological methods based on the antigen-antibody reaction are being used extensively to solve these problems. This study obtained type D monospecific staphylococcal antienterotoxin serum and used it to detect D enterotoxin by means of rocket immunoelectrophoresis.

**Role of ice properties in wave-ice interaction during LIMEX, 1987**

by W.D. Winsor...et al. St. John's : Centre for Cold Oceans Resources Engineering, 1989. 5 p. : ill. Bibliogr. Presented at the 12th Canadian Symposium on Remote Sensing, IGARSS '89. MICROLOG 90-00376 1 fiche (Available on fiche only)

The Labrador ice margin experiment (LIMEX) was initiated as a pilot program in March 1987. An interdisciplinary group of research organizations gathered data from the marginal ice zone (MIZ) and in the open water adjacent to the ice edge. This paper presents results of the 1987 pilot program. The ocean data gathering program spectral ocean wave model was used to hindcast wind and wave fields for

the duration of the experiment. In addition, the C-CORE/MUN ice motion package (6 degrees of freedom) was placed on several ice floes to measure the wave induced ice motion at different locations along the MIZ. Analysis of the motion package records furnished time series plots of wave parameters as well as wave spectra within the ice cover. Interpretation of the aerial photographs provided measurements for floe size distribution, floe density and ice concentration.

### Roots versus shoots in nutrient uptake by aquatic macrophytes in flowing waters

by P.A. Chambers...et al. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1989. 7 p. Bibliogr. (NHRI contribution ; no. 89023) *In Canadian Journal of Fisheries and Aquatic Sciences: vol. 46, no. 3, 1989.* ISSN 0838-1992  
MICROLOG 90-06481 1 fiche

The role of sediments vs. open water in supplying nutrients to aquatic macrophytes has long been debated, particularly in the management of aquatic weeds and the control of lake eutrophication. This study determined the role of roots vs. shoots in nutrient uptake by aquatic angiosperms in flowing waters. A transplant experiment was conducted in the South Saskatchewan River. *Potamogeton crispus* L. was grown in pails containing natural sediments with different levels of nitrogen and phosphorus, at two sites with very different concentrations of nitrogen and phosphorus in the open water. The effects of variations in sediment to water phosphorus and

nitrogen ratios were examined in relation to plant growth and nutrient uptake.

### The Ross site (DIPd-3) 1980 research

by J. Roderick Vickers ; with appendices by Lynda Gullason and Jonathan C. Driver. Edmonton : Alberta Culture and Multiculturalism, 1989. xviii, 158 p. : ill. Bibliogr. (Manuscript series ; no. 14)  
MICROLOG 90-02284 2 fiche

The Ross site is a multicomponent, buried campsite located within a low terrace on the south side of the Oldman River, about 15 km northeast of Coaldale in southern Alberta. Cultural material is revealed intermittently along 205 m of the outbank and indicates that as many as 6 occupations are present, all of which are assigned to the Old Women's Phase of the Late Prehistoric Period. Erosion of the site terrace edge has been extensive. In order to determine if sufficient cultural deposits remained intact to warrant site designation as a provincial historical resource, a test excavation program was undertaken in 1980. This report presents the results of that investigation.

### The Rosssburn Planning District : background study

Dauphin, Man. : Municipal Planning Branch, 1990. v, 91 p. : ill., maps. *Fold. maps not filmed.*  
MICROLOG 90-05057 2 fiche

The local citizens and the councils of the Village of Rosssburn and the Rural Municipality of Rosssburn made the decision to accept responsibility for their local land resources, and joined to form the Rosssburn Planning District. A district planning board initiated preparation of a development plan, the first stage of which is this background study. This report is a compilation of background data, indicating the district's assets, liabilities, problems and trends. The study briefly outlines the local history of the Village of Rosssburn and the rural municipality; relates population characteristics and identifies socio-economic factors; examines the economic conditions of the District, including trading areas and consumer patterns and habits; delineates and assesses the existing land uses; and provides a financial profile of the Rosssburn Planning District, revealing its current debts and commitments.

### Rout and seal cracks in flexible pavement : a cost-effective preventive maintenance procedure

by G.J. Chong. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1989. iii, 26 p. : ill. Bibliogr.  
MICROLOG 90-00128 1 fiche

A comprehensive study on the feasibility of a rout and seal treatment of cracks in flexible pavement as a preventative maintenance measure was instituted in 1986. The study established the cost-effectiveness of this procedure based on the successful treatment of the distress, the resultant extension of pavement service life, and the optimum timing for application of this treatment to achieve maximum cost benefit. Monitoring of the treatment performance and pavement condition was completed for a period covering 3 winters. This report presents the results of that monitoring.

#### Safety of fuel pump circuits in fuel tanks of road vehicles using unleaded gasoline or methanol

by E.E. Dainty and G. Lobay. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1989. 9 p. : ill. Bibliogr. (Report ; MRL 89-11(TR))  
MICROLOG 90-01329 1 fiche

Previous work was conducted to determine whether sparks from electrical devices could ignite vapours above the fuel in a tank. This report supplements tests conducted with various alternative fuels with information about unleaded gasoline and methanol. These two fuels were tested at a range of temperatures, using a fuel pump circuit and IEC breakflash apparatus for ignition. High current levels associated with the fuel pump test circuit extended the upper and lower ranges of flammability for the respective vapours, relative to the lower levels of test current used previously.

#### Un Salaire égal : les négociations collectives et la loi : document

Ottawa : Travail Canada, 1987. 50, 50 p. Bibliogr. *Rédigé en vue du colloque, Un Salaire égal : les négociations collectives et la loi. Bilingue (Equal Pay...paper)*  
MICROLOG 90-02833 2 fiche

Ce document a pour objet d'étudier le concept du salaire égal pour un travail d'égale valeur de même que les problèmes qu'il vise à résoudre. Il donne un aperçu des lois internationales, fédérales et provinciales en la matière, ainsi que des efforts actuels et passés qui ont été déployés au Canada en vue de mettre le principe en application par divers moyens, notamment le dépôt des plaintes et la négociation collective. Enfin, le document soulève certains points de discussion et certaines considérations liés à l'application future de ce principe.

#### Salinité des sols : Manitoba

par R.G. Eilers. Ottawa : Agriculture Canada, Direction générale de la recherche, Centre de recherches sur les terres, 1990. 9 p. : cartes géogr. (Centre de recherches sur les terres contribution ; no 87-15) *Cartes géogr. plantes non filmées. Bilingue (Soil salinity...)*. ISBN 0-662-57121-5  
MICROLOG 90-04937 1 fiche

La dégradation des sols est devenue une préoccupation majeure au Canada. L'un des processus de cette dégradation, la salinisation des sols, est une source d'inquiétude dans l'ouest du Canada. Elle est limitée presque entièrement aux régions agricoles du sud des trois provinces des Prairies. Ce document présente une carte préparée dans le but de donner un aperçu de l'étendue et de la gravité de la salinité du sol, abstraction faite de son origine et des changements de son étendue. Elle donne aussi des renseignements sur la qualité du sol de surface et du sous-sol quant à la présence de sels.

#### Salmon feed experiments

Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 4 p. (Canadian translation of fisheries and aquatic sciences ; no. 5411) *Originally published in Icelandic.* ISSN 0704-3716  
MICROLOG 90-01533 1 fiche

Research and development on Icelandic dry feed for salmonids has been under way for the last 2 1/2 years. This experiment developed salmon feed from Icelandic capelin produce and

established, by means of chemical analysis and feeding experiments on young fish, the quality limits that need to be set on capelin meal and capelin oil for them to be suitable for feed mixtures. Capelin meal and capelin oil are the main components of the fish feed used, and as farmed fish are very sensitive to the quality of feed, options must be carefully considered.

### Salmon pricing trends : a simulation model

Marvin Shaffer and Associates. Ottawa : Dept. of Fisheries and Oceans, Economic and Commercial Analysis Directorate, 1989. v, 38 p. Bibliogr. (Economic and commercial analysis report ; no. 53) ISSN 0843-5626 ISBN 0-662-17702-9 MICROLOG 90-04882 1 fiche

A simulation model to develop long term forecasts of salmon prices was developed, including specific forecasts and sensitivity results and price equations for different species, product forms and market destinations. The equations were derived by equating demand and supply, with demand specified as a function of per capita income, substitute prices, own prices, taste and population changes, and supply specified as a sum of exogenously-determined B.C. and rest of the world supply. Market linkages are developed through substitute salmon species-cross price elasticities of demand. The model is programmed in Lotus 1-2-3, with a parameter input block, a demand-determining variable input block, a supply input block and a price equation block.

### Salt spray injury study : efficacy of film-forming chemicals for protecting roadside trees

by C. Chong. Toronto : Ministry of Transportation and Communications, Research and Development Branch, 1990. vi, 26 p. MICROLOG 90-05479 1 fiche

The effectiveness of a number of film-forming chemicals was evaluated in 3 field experiments for protecting fruit and landscape trees against salt spray injury and in reducing sodium and chlorine ion buildup in the twigs. In separate experiments, Folicate, Joncryl 1938, RD1725, RD1726, and Siloconate 51T were evaluated on peach trees and red pine. Burlap was also used to cover the trees and the results were evaluated. In an additional study, Foliconate, RD1725, RD2033, RD2034, RD2035, and RD2036 were evaluated on whole peach trees that were sprayed 4 times during the winter of 1987 with 2% rock salt solution.

### Sampling and analysis of refinery effluents to assess variations in trace contaminant concentrations

prepared for the Petroleum Association for Conservation of the Canadian Environment ; in association with the Ontario Ministry of the Environment, Environment Canada, and the Ontario Petroleum Association, by Canviro Consultants. Ottawa : Petroleum Association for Conservation of the Canadian Environment, 1987. vi, 94 p. : ill. Bibliogr. (PACE report ; no. 87-2) MICROLOG 90-01935 2 fiche

This study was conducted in fulfillment of the prerogation monitoring requirements under Ontario's Municipal Industrial Strategy for Abatement program for the petroleum sector and was intended to define the capability of petroleum refinery biological treatment processes to effect trace contaminant removal and to assess the variability of effluent quality. A comprehensive sampling program was carried out at the Esso Petroleum Canada Refinery in Sarnia and the Petro-Canada Trafalgar Refinery in Oakville. Six-hour flow-proportioned composite samples of the influent and effluent from the biological treatment plants at each refinery were collected on 6 occasions over 2 weeks. During the sampling periods, biological treatment system operating conditions and key refinery operating conditions were documented. The analytical program focused on conventional contaminants, metals, selected volatile aromatic compounds and polynuclear aromatic hydrocarbons. A comprehensive quality assurance program was conducted in conjunction with the sampling and analytical components of the investigation.

### Sampling and analysis of snow cores in the Yellowknife area

Stanley Associates Engineering Ltd. Yellowknife : Dept. of Renewable Resources, 1986. 49 p. : maps. Bibliogr. MICROLOG 90-02657 1 fiche

The City of Yellowknife is located on the north shore of Great Slave Lake in the Northwest Territories. There are 2 gold producing companies located close to the city. Due to concern over arsenic poisoning, a task force was set up in 1977, one of whose recommendations concerned the concentrations of arsenic in snow. This report gives the results of a snow core sampling and analysis program which is then compared with a 1975 Environment Canada study. The comparison was then used to assess changes in deposition of arsenic in the Yellowknife area as a result of the introduction of emission abatement equipment at the Giant Yellowknife Mines Ltd. gold roasting operation. The study also determined the present concentrations of sulfates and pH values of snow core samples as an initial step in examining sulphur dioxide emissions in the area and analyzed a number

of samples, randomly selected, for sulfate. EV NO PR SC

### Sand and gravel resources in the Flin Flon-Cranberry Portage area

by H.D. Groom. Winnipeg : Manitoba Energy and Mines, Geological Services Branch, 1989. iv, 34 p. : ill., maps. Bibliogr. (Aggregate report ; AR88-13) Fold. maps not filmed. MICROLOG 90-06306 1 fiche

An aggregate resource inventory was carried out during the summer of 1986 in the Flin Flon-Cranberry Portage area to delineate the sand and gravel resources at a scale of 1:50,000 and to provide an estimate of the aggregate reserves in the area. Regional till sampling was also undertaken. The report describes the bedrock and surficial geology of the area, and the methodology of the inventory.

**Santé et inégalités sociales : un problème de distance culturelle**

par G. Paquet. Québec : Institut québécois de recherche sur la culture, 1989. 131 p.  
Bibliogr. (Documents de recherche ; no 21)  
ISSN 0823-0447 ISBN 2-89224-129-4  
MICROLOG 90-01967 2 fiche

Dans un premier chapitre, on dresse, à partir de diverses études, enquêtes et rapports, un bilan des constatations relatives aux disparités sociales dans le domaine de la santé. On propose également une courte synthèse de deux types de déterminants sociaux: les facteurs économiques et les facteurs culturels. Dans le deuxième chapitre, on traite de certaines particularités de la culture populaire dans le but de déduire les attitudes à l'égard de la santé et de la maladie et les représentations qui en découlent. Quant au dernier chapitre, il examine la distance culturelle qui sépare le système de santé du milieu populaire.

**Saskatchewan construction, upgrading and maintenance : 1989-90 Annual report**

by J.H. Chubak. Regina : Environment Canada, Water Resources Branch, Saskatchewan District, 1990. ii, 69 p. : ill. CSI 21147.005.  
MICROLOG 90-06953 1 fiche

The Saskatchewan District, Water Resources Branch has a continuing program to maintain its network of about 330 hydrometric gauging stations. The program is carried out by in-house personnel except for specialized tasks, such as, earthwork, and supplying rocks, gravel and concrete, which are contracted out. The 1989-90 construction program consisted of 66 projects (8 upgrading and 58 maintenance). The original construction program was modified, 12 projects deleted and 14 projects added, during the year to maintain safety and operational standards. This report also contains cost summaries, definitions, a history of expenditures from 1982-83 to 1989-90. A brief description and cost breakdown for projects completed in 1989-90, a description of construction practices, materials and equipment, photographs, and a location map are included in appendices.

#### Savoir enseignant et idéologie réformiste : la formation des maîtres, 1930-64

par M. Mellouki. Québec : Institut québécois de recherche sur la culture, 1989 392 p. : ill. Bibliogr. (Documents de recherche, no 20)  
ISSN 0823-0447 ISBN 2-89224-118-9  
MICROLOG 90-01981 5 fiche

Ce document donne tout d'abord une description de l'évolution des effectifs scolaires, de la morphologie du corps enseignant et du développement des institutions de formation des maîtres. Ensuite, le chapitre deux met ensemble quelques éléments dont le jeu donne lieu à l'émergence d'un savoir enseignant caractérisé par son ouverture. Le chapitre suivant est consacré à une étude détaillée de la réforme des programmes des écoles normales mise en vigueur à partir de septembre 1953. Par après, on présente quelques autres moments dans l'élaboration de l'idéologie réformiste et dans le resserrement de ses liens avec un savoir enseignant de plus en plus vendu à la psychologie; et, on termine sur ce qui semble constituer une mise en scène du rite de passage d'un ordre scolaire et social donné à un autre.

#### Scale model simulation of impact of a rail locomotive coupler on the irradiated fuel transportation cask

by R.M. Zane and J.D. Tulk. Toronto : Ontario Hydro, Research Division, 1989. 33 p. : ill. Bibliogr. (Report ; no. 89-197-K)  
MICROLOG 90-03515 1 fiche

Ontario Hydro has developed a transportation cask for large-scale shipments of irradiated fuel from CANDU reactors. This package was licensed for use on public highways by a series of 9-metre drop tests, in accordance with the Atomic Energy Control Board regulations for radioactive materials transport. The tests described here go beyond the regulatory requirements and were designed to simulate a collision between a freight locomotive travelling at 105 km/h (65 mph) and an irradiated fuel transport cask. The test was

carried out to resolve the question of whether or not a stiff, blunt 'projectile' - such as the coupler on a fast-moving train - could penetrate the wall of the cask. The test featured a 7th scale model of the cask striking a 7th scale model locomotive. To achieve the impact velocity, a small rocket motor was used to help accelerate the cask model.

#### Scallop *Pecten maximus* restocking program in France : goals, results and prospects

by J.C. Dao...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 21 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5343) Originally published in French. ISSN 0704-3716  
MICROLOG 90-01781 1 fiche

Since 1973, a great deal of research has been conducted into the natural resource management and extensive aquaculture of scallops. The findings over the first 10 years made it possible to develop and implement a 5-year program (1983-87) involving restocking demonstration activities in Brest harbour and new management techniques in St. Brieuc Bay. This paper presents the technical findings concerning resource management techniques and aquacultural operations, as well as the major economic, social and legal constraints involved.

#### Scenarios for end-use energy demand in Quebec, 1986-2006 : summary report

Québec (Province). Secteur énergie. Groupe de l'analyse quantitative et de l'information statistique. Québec : Gouvernement du Québec, Ministère de l'énergie et des ressources, 1987. iii, 72 p. : ill. (Etudes et recherches) CSI 66110.203  
MICROLOG 90-04760 2 fiche

As part of studies on energy demand trends in Québec over the long term, energy consumption for 1986-2006 was analyzed using 3 different socio-economic scenarios, based on 2 economic growth assumptions (strong growth and slow growth) and 3 assumptions for increases in the price of international crude oil (major increase, moderate increase, limited increase). Scenario 1 combines strong growth with a substantial rise in oil prices, while scenario 2 is based on low growth and moderate price increases. Scenario 3 uses a combination of strong growth and a limited increase in oil prices. In addition to the 3 scenarios, 2 alternative simulations were performed, each of which varied certain financial ratios of Hydro-Québec. This report presents the results of this study as well as a preliminary analysis.

#### Scheduling tasks and vehicles in a flexible manufacturing system

by J. Blaciewicz...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 19 p. : ill. Bibliogr.

(Publication ; no. 694)  
MICROLOG 90-06638 1 fiche

Due to their increasing applicability in modern industry, flexible manufacturing systems (FMS), their control and their design have been studied extensively recently. One of the most important issues in this context is the scheduling problem. This paper is concerned with a new model of an FMS system, motivated by the practical application that takes into account both machine and vehicle scheduling. For the case of a given machine schedule, a simple polynomial time algorithm is presented that checks the feasibility of a vehicle schedule and constructs it whenever one exists. Then a dynamic programming approach is proposed constructing optimal machine and vehicle schedules. This technique results in a pseudopolynomial time algorithm for a fixed number of machines.

#### The Scotia-Fundy lobster fishery, phase one : issues and considerations

Canada. Dept. of Fisheries and Oceans. Scotia-Fundy Region. Program Coordination and Economics Branch. Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region, Communications Branch, 1989. x, 111 p. : ill., maps. Bibliogr. ISBN 0-662-17637-5  
MICROLOG 90-04339 2 fiche

In April 1988 a major in-depth study of the Scotia-Fundy lobster fishery was announced by the federal government to review all the major issues facing the industry and address the long-term social and economic viability of the fishery and of the communities which depend on it. The study would include the biological, licensing,

management, marketing, and enforcements aspects. This study contains a comprehensive overview of the fishery, emphasizing recent developments. It examines the community base in which the fishery takes place and analyzes the resource according to current scientific understanding. It examines the harvesting, processing and marketing components and describes the DFO management regime and its related costs. On the basis of an extensive consultative process, with generally good participation by the industry, it presents the current views and concerns of fishermen on issues they consider of primary importance.

#### Sealing and insulating specific areas of bulk tobacco kilns : final report

by D.L. Van Hooren. Guelph, Ont. : Agricultural Energy Centre, 1989. 12 p. : ill. (Report ; no. 89-6508)  
MICROLOG 90-03936 1 fiche

The majority of bulk tobacco kilns manufactured prior to the 1980s were constructed with fibreboard in their roofs. After many cycles of curing and conditioning tobacco, the fibreboard deteriorated so badly that it is separating from

the metal roof and rafters. In addition, many of the kilns constructed with fibreboard in the roofs only have insulation in the walls of the curing compartment. In 1987, a project began to determine the effects of removing fibreboard from kiln roofs and applying polyurethane foam in its place, as well as retrofitting uninsulated areas with the same material. This report describes the methods used and evaluates the results.

**Seals and nematodes : a paper concerned with the granting of a bounty by the Icelandic Nematode Committee**

by S. Helgadóttir, A. Petersen and S. Bergmann. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1986. 166 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5207) Originally published in Icelandic, by Landvernd (the Icelandic Society for Nature Conservation), in Iceland. ISSN 0704-3716  
MICROLOG 90-02702 2 fiche

The Nematode Committee was appointed by the Icelandic government in the early 1980s to deal with grey and harbour seals on the coast of Iceland. These seals were considered to be infecting the fish populations of the area with nematodes, a type of roundworm which are parasitic in fish as larvae, thereby reducing the catch. The Committee offered a bounty for the killing of the seals. When this came to the public's attention, much concern was expressed. This report gives an overview of the biology of the seals, the history of seal hunting and its effects on the seal population around Iceland, a discussion of nematode infection of fish, and an examination of the Nematode Committee's operations. Sources include both Icelandic and non-Icelandic publications and research reports.

**Seasonal influence on plantation survival and growth on mainland Nova Scotia**

Truro, N.S. : Dept. of Lands and Forests, 1989. 12 p. : ill. Bibliogr. (Forest research report ; no. 17)  
MICROLOG 90-02230 1 fiche

Many of Nova Scotia's forest stands are inadequately stocked with natural softwood regeneration after harvesting. In some regions of Canada, survival and height were found to vary according to planting data, whereas other studies indicated that planting can take place from spring throughout the summer months and into the fall without adversely affecting growth or survival. A study undertaken on the Cape Breton Highlands of Nova Scotia showed that white and black spruce multipots can be planted throughout the growing season without adversely affecting survival or growth. To determine whether the same is true for mainland Nova Scotia, where moisture deficiencies are more common, a trial involving 7 species was established at Delaney Settlement, Colchester County.

MICROLOG 90-01846 1 fiche

De mémoire d'homme, la sécheresse de 1988 dans les provinces de l'Ouest a été la pire jamais vue, mais la mémoire repose sur des critères d'évaluation que la science ne reconnaît pas toujours. Au cours de leur histoire, les Prairies ont connu divers types de sécheresse, allant du phénomène isolé d'un an jusqu'à des périodes de dix années consécutives de précipitations sous les normales. Cette analyse repose principalement sur l'historique des sécheresses.

**Second growth Douglas-fir : its management and conversion for value : a report of the Douglas-Fir Task Force**

compiled and edited by Robert M. Kellogg. Vancouver, B.C. : Forintek Canada Corporation, 1989. ii, 173 p. : ill. Bibliogr. (Special publication ; no. SP-32) ISSN 0824-2119  
MICROLOG 90-03918 2 fiche

The forest industry in Canada will become increasingly dependent on managed second-growth timber for its wood supply. The transition to this resource may result in reductions in log size and changes in the characteristics of the raw material. The Douglas-Fir Task Force was established to estimate the physical, mechanical and chemical properties of the intensively managed coastal Douglas-fir resource of the future, to determine the value of this resource for conversion to dimension lumber and pulp, and to develop a computer model capable of evaluating the effects of silvicultural treatments in terms of

end-product value. Six 50-year-old stands were identified as being representative of the anticipated rotation age of future managed stands. This report presents the results of the Task Force effort, covering the characterization of the resource, conversion of the resource into solid wood and pulp, and managing the resource. Recommendations are included.

**Second report on the monitoring data for the petroleum refining sector**

Ontario. Water Resources Branch. Toronto : Environment Ontario, 1990. iii, 64 p. : ill. ISBN 0-7729-7331-8  
MICROLOG 90-06304 1 fiche

Monitoring data for the petroleum refining sector was collected beginning December 1, 1988 and ending November 3, 1989. The first report was published in December 1989. This 2nd report covers June 1-November 3, 1989 for process effluent streams. The data for effluent streams such as once-through cooling water, storm water, landfarm leachate and emergency overflow are provided for the 12 months of monitoring, since these data were not presented in the first report.

## Sécurité, limitation des armements et défense au Canada : les attitudes du public canadien : le sondage d'opinion de l'ICPSI, 1989

par M. Driedger et D. Munton. Ottawa : Institut canadien pour la paix et la sécurité internationales, 1989. 103 p. : ill. L'édition anglaise (Security, arms control...) : 90-01925/2. ISBN 0-662-95746-6  
MICROLOG 90-01926 2 fiche

Le document étudie particulièrement la mesure où la population canadienne craint une guerre nucléaire et un affrontement entre les superpuissances. Il aborde ensuite d'autres menaces possibles, comme les problèmes reliés à l'économie et à l'environnement, et il révèle une évolution assez surprenante des attitudes du public. Il aborde particulièrement les perceptions des menaces militaires, non militaires, et des superpuissances; le degré de confiance dans les grandes puissances et dans leurs dirigeants; les préférences au sujet des politiques canadiennes; et, le Canada et les superpuissances.

#### Sediment station analysis : South Saskatchewan River at Saskatoon, 05HG001

Hardy BBT Limited. Ottawa : Environment Canada, Conservation and Protection, Inland Waters Directorate, Western and Northern Region, Water Resources Branch, Saskatchewan District, 1989. x, 180 p. : ill. Bibliogr.  
MICROLOG 90-06265 3 fiche

In June 1961, a sediment sampling program was established on the South Saskatchewan River at Saskatoon as part of the network of Canadian sediment monitoring stations gathering data on sediment yield for water development projects. The Saskatoon site was established to determine the impacts of the Gardiner Dam (and its reservoir, Lake Diefenbaker) on the sediment regime of the South Saskatchewan River. This report presents a summary and assessment of the existing sediment data; evaluates the impacts of Gardiner Dam/Lake Diefenbaker on sediment loads; the relationship between sediment loads at Saskatoon and the morphology of the South Saskatchewan River; the role of the South Saskatchewan River in transporting sediment which may impact Codette Reservoir on the Saskatchewan River; and the adequacy of the existing sediment data base for possible engineering, environmental and water quality applications.

#### Selected interviews on the future of downtown Vancouver

Vancouver, B.C. : Vancouver Planning Dept. ; Vancouver City Planning Commission, 1989. ii, 112 p.  
MICROLOG 90-03100 2 fiche

The content of this report is based on interviews with academics, architects, business people, artists, and community activists. It is based on answers given by those interviewed to the following questions: In your view, how has Vancouver's downtown changed over the past fifteen years? In your interpretation of the current trends, what might happen in the next twenty years? In terms of values and aspirations, what should happen in the next twenty years? What can the community and what can the City do to ensure that what occurs in the next twenty years reflects our ideas of what should happen?

### Selected physical and chemical characteristics of Dauphin Lake, Manitoba, 1983-85

by J.A. Babaluk and M.K. Friesen. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1990. iv, 25 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 789) This is the 44th data report from the Central and Arctic Region, Winnipeg. ISSN 0706-6465 MICROLOG 90-05549 1 fiche

From 1982-85 surveys of selected physical and chemical characteristics of Dauphin Lake, Manitoba were conducted as part of a fisheries rehabilitation research program to develop and test new biological and hydrological techniques for the rehabilitation of fisheries in the freshwaters of Canada. Emphasis was on the rehabilitation of the walleye, one of the most economically important freshwater fish species in Canada. This report presents physical and chemical data collected from 1983-85, including analyses for elements and nutrients and data for mercury levels in muscle tissue of individual walleye.

### Selecting indicators for state of the environment reporting -- Draft

by R. Gélinas and J. Slaats. Ottawa : Canadian Wildlife Service, State of the Environment Reporting Branch, Strategies and Scientific Methods Division, 1989. 25 p. Bibliogr. (Technical report series ; no. 8) MICROLOG 90-06282 1 fiche

The federal government has recently established a national state of the environment (SOE) reporting program to provide a better understanding of environmental conditions and trends to Canadians. An important step in the program is to identify which indicators will be used to represent the state of the environment. This report defines the indicators and describes the role of SOE reporting and indicators; discusses the desirable characteristics of SOE indicators; and describes current and proposed indicator research.

### Selection and testing of payload monitors for hydraulic loading equipment

by V. Srajer. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1989. v, 12 p. : ill. Bibliogr. (Report ; CRL 89-53(TR)) MICROLOG 90-00167 1 fiche

Two payload monitoring systems were investigated by Westar's mine engineering staff for application at Greenhills mine in Elkford, B.C. The systems are the WT-4000, developed by Wray Technologies of Sydney, Australia, and Loadrite, developed by Teledyne Canada of Thornbury, Ontario. The WT-4000 system was installed on a Demag H-241 hydraulic shovel at the mine and was operated for 2 months in early 1989. This report describes both monitoring systems, and gives the advantages and disadvantages of the WT-4000 system during testing at the mine.

### The Selection of ultrasonic transducers for inspection of pipeline girth welds

by M.P. Fingerhut, R.I. Coote and D. Hodgkinson. Edmonton : NOVA, An Alberta Corporation, 1986. 4 v. : ill. Bibliogr. Contents: Pt. 1 / M.P. Fingerhut, R.I. Coote, D. Hodgkinson -- pt. 2 / M.P. Fingerhut, A.G. Glover, D.V. Dorling -- pt. 3 : Evaluation of the pitch-catch technique for examination of the body region / A.G. Glover, M.P. Fingerhut, D.V. Dorling -- pt. 4 : Evaluation of inspection criteria on full scale girth welds / A.G. Glover, M.P. Fingerhut, D.V. Dorling. CANMET contract: OSQ82-00244. MICROLOG 90-01202 4 fiche

Description of a program to develop an ultrasonic inspection design for the nondestructive evaluation of pipeline girth welds made by the mechanized gas metal arc welding process for onshore and offshore pipelines. Vol. 1 describes a design approach using specialized ultrasonic beams chosen to detect specific imperfections in the well-defined regions of the weld and evaluated on simulated and real weld imperfections. Vol. 2 investigates the feasibility of using creeping waves for examination of the cap region, resulting in the development and evaluation of specifications for an experimental creeping wave transducer. Vol. 3 studies the use of the pitch-catch technique to examine the body of the weld, carried out on simulated and real weld defects. Vol. 4 combines the technology developed in the 3 previous reports into the overall inspection of field girth welds using 2 full scale welds in 9.8 mm and 20.6 mm thick pipe.

### Selenium : an important nutrient for salmonids

by O. Ringdal and K. Julshamn. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 6 p. (Canadian translation of fisheries and aquatic sciences ; no. 5195) *Originally published in Norwegian.* ISSN 0704-3716 MICROLOG 90-00062 1 fiche

Need for minerals and trace elements among salmonid fishes was recently presented as a factor possibly connected with the Hitra disease. The need of fish for these nutrients is different from that of terrestrial animals, and therefore experiences gained with domestic animals cannot be transferred directly. Fish, therefore, must be studied independently. This article summarizes today's knowledge of selenium as a necessary trace element in the diet of fish, in view of what is known about selenium metabolism in mammals.

Presentations also cover the use of microcomputers and other office technology by senior managers and by the regional offices. CA EV PS SC

**Semitrailer liftable axles**

a cooperative project between Transportation Development Centre, Transport Canada, Ministère des transports du Québec [and] Ontario Ministry of Transportation. Montreal : Transport Canada, Transportation Development Centre ; Quebec : Ministère des transports ; Toronto : Ministry of Transportation, 1990. 17, 19 p. Bilingual (Essieux relevables...). MICROLOG 90-07203 1 fiche

The heavy vehicle fleet in Quebec and Ontario includes semitrailers fitted with multiple axle units to permit carriage of very heavy loads. Flexible axles are installed on these vehicles so that when lifted they reduce tire side forces during turning movements and minimize damage to suspension, tires, and vehicle frame and improve maneuverability. While Ontario, Quebec, some Maritime provinces and B.C. tolerate liftable axles, studies indicate that they have major shortcomings in stability, produce a modest increase in pavement damage, and when misused, produce heavy damage to the roadway. This project was conducted to develop, test and demonstrate improved liftable axles for highway heavy vehicles that incorporate lift and load control devices for maintenance of constant axle load to reduce road wear and maintain allowable lift axle payload while improving self-steering capabilities to enhance vehicle handling and stability through improved turning ability. **Senate reform**

by L. Massicotte and F. Coulombe. Ottawa : Library of Parliament, Research Branch, 1988. 42 p. Bibliogr. (Backgrounders ; BP-96E) French ed. (*La Réforme du Sénat*) on the same fiche. ISBN 0-660-13285-0 MICROLOG 90-01919 1 fiche

The commitment in the 1987 Constitutional Accord to put Senate reform on the agenda of yearly constitutional conferences, and the growing support in some quarters for an elected Senate, have rekindled the long-standing debate on the future of the upper chamber of the Canadian Parliament. The purpose of this paper is to take stock of this question. CA CI JU PA

**Sensibilité des lacs de l'Ontario aux dépôts acides, 1989**

Toronto : Environnement Ontario, 1990. 30 p. Bilingue (*Acid sensitivity of lakes...*). CSI 55133.002. ISSN 0833-546X MICROLOG 90-05750 1 fiche

Il existe plus de 250 000 lacs en Ontario. D'après une étude récente, au moins 19 000 d'entre eux sont atteints par les pluies acides, notamment dans la région de Muskoka-Haliburton, grande région de tourisme et de villégiature. La plupart des lacs ont la capacité de neutraliser une certaine quantité d'acide. Cette capacité se mesure au degré d'alcalinité découlant de la présence de bicarbonate dans l'eau. Si un lac a un degré élevé d'alcalinité, il peut résister aux arrivées d'acides, et donc ne pas changer de pH. Par contre, on peut observer des baisses de pH dans les lacs à faible degré d'alcalinité à l'époque de la fonte des neiges ou lors de pluies abondantes, qui provoquent des arrivées d'acides considérables dans les lacs. Ce document étudie la question des dépôts acides dans les lacs. EV ON PR SC

**Sensory analysis of fish protein concentrate**

by T. Gjelsen and K. Eikre. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988.

5 p. (Canadian translation of fisheries and aquatic sciences ; no. 5395) Originally published in Norwegian. ISSN 0704-3716 MICROLOG 90-01545 1 fiche

Experiences based on the use of Norwegian fish protein concentrate (FPC) for human consumption indicate that its properties (taste, odour, etc.) require modification and that a standardization of deliveries to each market must be carried out. Four fish species as well as press cake and whole meal were compared, as well as 2 samples of FPC from the same batch after 8 months storage in Norway and the Philippines. • CA CF FI SC

This document provides a brief summary of the papers presented during this seminar, and an overview of the discussion which took place following each of six panel presentations. AP JU PR

**Separation of Atlantic herring stocks in the southern Gulf of St. Lawrence using digitized otolith morphometrics and discriminant function analysis**

by S.N. Messieh, C. MacDougall and R.R. Claylor. Dartmouth, N.S. : Bedford Institute of Oceanography, 1989. iv, 22 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1647) ISSN 0706-6457 MICROLOG 90-02624 1 fiche

The identification of Atlantic herring stocks inhabiting both sides of the northern Atlantic has been the subject of numerous investigations for many years. In more recent years, the discreteness of the spring and autumn herring populations in the Gulf of St. Lawrence was established, a separation important for delineating proper fishery management units. Otolith characteristics, such as shape and first year's growth, were used in both the Gulf and Newfoundland regions, but the method used requires well-trained technicians and was criticized because of its subjectivity. A semi-automated microcomputer-based measuring system was developed for otolith measurements in the Gulf region to eliminate such subjectivity. The method uses a microscope with a drawing tube and a digitizer interfaced to a personal computer which analyzes the digitized otolith measurements using software packages. This report presents results using this system to separate herring spawning groups by otolith morphometrics. • AP CA CF FI LS SC

**Separation of sulphurous compounds in synthetic crude fraction -- Rev.**

Calgary, Alta. : Geotechnical Resources Ltd., 1990. 201 p. : ill. Bibliogr. CANMET contract: 59136-01-SQ MICROLOG 90-05644 3 fiche

Report on the selection of 10 organosulphur compounds representative of the sulphurous constituents of crude oil, the development of gas chromatographic methodology for the separation and quantitation of these compounds in a toluene matrix, and the evaluation of a variety of sorbents for their efficiency in removing the sulphurous constituents from a synthetic crude oil mixture. Sorbents which were evaluated include zeolites, activated

carbon, clay minerals, cation exchange resins, anion exchange resins and organoselective adsorption resins. Cation exchangers including zeolites, clays and resins were evaluated using a variety of metals as the exchangeable cation. Sorbents were also characterized for surface area and elemental composition where applicable.

### Sequential spatial equilibria under incomplete information

by M. Boyer...et al. Montréal : Université de Montréal, Centre de recherche sur les transports, 1990. 74 p. : ill. Bibliogr. (Publication ; no. 691) (Cahier ; 9011)

MICROLOG 90-06427 1 fiche

This paper studies a model of spatial duopoly competition with sequential entry on a segment in the choice of locations (stage 1 of the game) and then simultaneous Bertrand competition in delivered prices (stage 2). The second mover at stage one has incomplete information on the marginal cost (high or low) of the first mover. A classical model of signalling in which there exists natural constraints of the range of possible signals is obtained. The analysis is focused on the identification and characterization of perfect Bayesian equilibria robust to various refinement criteria (the intuitive criterion and D1) when the constraints on signalling are tight.

### Service centre study

by W.K.D. Davies. Edmonton : Alberta Municipal Affairs, 1979. 175 p. : maps. Bibliogr.

MICROLOG 90-04820 2 fiche

Study of Alberta towns to define the basic structure of the service centres in terms of economic character and retail-service trade

importance, and to measure the interaction between these centres. The information provides a critical background into the spatial variations of the economy of these towns, as a prelude to analyzing influences which will change the system of towns. This preliminary report concentrates upon the identification of data sources and available research techniques needed to analyze the character of Alberta today. Data sources and their limitations are discussed. The study is based upon the 1971 and 1976 censuses, as well as 1977 telephone call flows through the various areas. The results of the analysis show the spatial variation in economic character of the towns in 1971, the degree of specialization of towns in particular categories of employment, and the relationship between population size, change and economic character.

### Service industries in regional development

by William J. Coffey and James J. McRae ; with the collaboration of Martine M. Desbois and Mario Polèse. Halifax : Institute for Research on Public Policy, 1989. xxii, 166 p. Bibliogr. ISBN 0-88645-103-5

MICROLOG 90-04263 2 fiche

This document presents a broad empirical picture of the national, regional, and urban structure of the Canadian economy. It identifies the factors which may be causing the relative shift towards employment in service industries and occupations, and shows that the lack of actual data on interregional flows of service outputs effectively precludes the empirical testing of regional general equilibrium models involving service industries. It concludes by bringing forth the regional policy implications embedded in the conceptual and empirical work on service industries.

### Severn Sound remedial action plan, part I : environmental conditions and problem definition -- Rev.

Toronto : Environment Ontario ; Ministry of Natural Resources, Huronia District ; Ministry of Agriculture and Food ; Ottawa : Environment Canada, 1988. 125 p. : ill., maps. Bibliogr. ISBN 0-7729-4702-3  
MICROLOG 90-03945 2 fiche

The Severn Sound is a complex of shallow bays in the southeast part of Georgian Bay which presently supports a warmwater and a migratory coldwater fishery. Shoreline development includes the towns of Midland and Penetanguishene, as well as rural land and cottages. Excessive algal growth in Severn Sound, particularly in Penetang Bay, has been of public concern since the mid 1960s and has severely affected recreational enjoyment of the area. A remedial action plan was to be developed for the U.S./Canada International Joint Commission. This report forms the basis of the Stage I submission and the basic technical summary for the public involvement program initiated May 1988. The report includes a description of the water and land use of the area, the environmental conditions including contaminants and biomonitoring, the potential sources of contamination, specific concerns, and agency goals and objectives.

### The Sexual cycles of fish in a study of the structure of a species and the functional structure of the range

by Y.I. Alekseeva and F.Y. Alekseev. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 15 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5402) *Originally published in Russian, in the U.S.S.R.* ISSN 0704-3716  
MICROLOG 90-01541 1 fiche

Results of the individual aspects of the reproductive physiology of bigeye tuna and striped tuna of the eastern-tropical Atlantic, rock grenadier of the north Atlantic ridge, south-Atlantic grenadier of the Falkland-Patagonian region, red snapper of the Atlantic Ocean and black scabbard of the north Atlantic. The study used the sexual cycles as a criterion for assessing the degree of divergence in the reproductive cycles, with the sexual cycle taken to mean the changes in the state of the gonads of sexually mature individuals from the end of the previous spawning to the end of the next spawning. The sexual cycles were reconstructed on the basis of preliminary research on the distinctive features of the formation of expendable supply of oocytes, the nature of vitellogenesis and the type of spawning. The material was collected from 1970-82. Visual determinations of the state of the gonads were analyzed for more than 100,000 specimens, the ovaries of 600 individuals were analyzed histologically, and the size distributions of yellow oocytes were determined in the ovaries of 110 females.

### Shallow ice borehole logger and deployment system

by M.N. Demuth, G. Holdsworth and R. Brancker. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 21 p. : ill. Bibliogr. (NHRI contribution ; no. 88018) ISSN 0838-1992  
MICROLOG 90-02386 1 fiche

An improved shallow ice-borehole logging system was developed to complement the ice-core drilling activities associated with the Climate Change and Ice-Core Chemistry projects. The system is capable of logging dry boreholes up to 200 m deep and may be easily transported and assembled by its 2 operators. A number of geometric and physical parameters are measured for use in studies of glacier ice rheology and deformation. The significance of conducting glacier deformation measurements in conjunction with core retrieval is summarized with special reference to climate change research.

### Shortest path algorithms : a computational study with the C programming language

by J.-F. Mondou, T.G. Crainic and S. Nguyen. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 33 p. : ill. Bibliogr. (Publication ; no. 676)  
MICROLOG 90-03005 1 fiche

Shortest path algorithms play a central and capital role in network analysis, transportation planning, telecommunications, and computer science. A large number of problems may be formulated as shortest path models and the solution of an even larger set of problems requires that shortest path problems be solved repeatedly as subproblems. Speed is therefore very important. This paper analyzes the performance of algorithms for calculating the shortest paths from one node to all other nodes in a directed network, when they are correctly coded in C programming language. Computer implementations are suggested that take full advantage of the capabilities of this programming language, and are then compared to traditional implementations. Eight algorithms are selected as most efficient, including redistributive heap algorithm due to Ahuja et al. (1988).

### SIDA : un résumé des risques sur le plan professionnel -- 2e éd.

par R. Bertolini. Hamilton, Ont. : Centre

canadien d'hygiène et de sécurité au travail, 1989. i, 10 p. Bibliogr. ISBN 0-660-92755-1  
MICROLOG 90-02176 1 fiche

Le SIDA est une affection qui se caractérise par un affaiblissement du mécanisme de contrôle des infections de l'organisme à un point tel que celui-ci devient particulièrement vulnérable à une foule de maladies. Le SIDA se transmet à partir des liquides organiques d'un sujet infecté, comme le sang, le sperme ou d'autres sécrétions corporelles renfermant du sang. Ces liquides organiques peuvent, par conséquent, présenter un risque de transmission de l'affection aux individus qui y sont exposés de par la nature de leur travail. Ce document fait la lumière sur cette affection.

### Silt curtains to control sediment movement on construction sites

by N. Kouwen. Ottawa : Ministry of Transportation, Research and Development Branch, 1990. iii, 30 p. : ill. Bibliogr.  
MICROLOG 90-05945 1 fiche

Public awareness of the detrimental effects of adding many substances to the natural environment has increased dramatically during the last 2 decades. One form of contamination is the transport of sediments into lakes and rivers during underwater construction. This report deals with the use of silt curtains to contain such contamination. The report presents the results on the subject of silt curtains, a hydraulic analysis of their use, and recommendations for their design and for further research.

# **A Silvicultural guide for the white pine and red pine working groups in Ontario**

Ontario. Forest Resources Group. Toronto. Ministry of Natural Resources, 1989. x, 102 p. : ill. Bibliogr. (Science and technology series ; v. 6) ISSN 0228-5754 ISBN 0-7729-5979-X  
MICROLOG 90-04255 2 fiche

This silvicultural guide is one of several, each of which provides a description of the silvicultural characteristics of the working group species and describes silvicultural practices for the working group. The guide reflects relevant literature and research, and the knowledge and experience of forestry staff in the management of the working group in Ontario and elsewhere. The guide covers the range and commercial importance of white pine and red spruce, siting, and wildlife and environmental considerations. Management prescriptions include such silvicultural systems as shelterwood and clear cut systems, harvesting considerations, forest renewal, stand maintenance, conversion and management intensity. Data is also given on the age-class distribution, historical harvest, average roundwood receipts, and biological rotation ages.

# **A Simple model for calculating residential 60 Hz magnetic fields**

Toronto : Ontario Hydro, Research Division, 1990. 19 p. : ill. (Report ; no. 90-59-K)  
MICROLOG 90-06092 1 fiche

A hypothesis that 60 Hz magnetic fields may have health effects was raised by epidemiological studies which showed an association between the incidence of childhood leukemia and adult cancer and residence in proximity to electricity distribution wiring. This paper presents a simple model which permits calculation of the magnetic field at all points in a house from only a few measurements. The model was tested in 24 houses with a comparison of observed and predicted fields over a 24-hour period in each house. One house was investigated in greater detail with a comparison of observed and predicted fields in each room. In addition, data were collected for one week in this house to determine the time period over which measurements should be made to avoid temporal variability in the results. Finally, the model is applied to a theoretical study of field variations in this house.

# **A Simplified procedure for determination of metallothionein in animal tissues**

by S. Onosaka...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 11 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5344) Originally published in Japanese, by the Journal of Hygenic Chemistry, in Japan. ISSN 0704-3716  
MICROLOG 90-01478 1 fiche

As contamination of the environment by heavy metals such as cadmium and mercury is becoming an increasingly serious problem, there is concern over the behaviour of these metals inside the body, demonstrated to mainly combine with micromolecular proteins rich in SH groups such as metallothionein (MT). As the administration of these heavy metals induces the biosynthesis of MT and as the cadmium bound to MT does not decrease the enzymatic activity, it appears that this protein inhibits the toxic action caused by the heavy metals. It was also reported that cadmium administered in the form of MT causes more kidney disorder than when administered as free cadmium. This paper provides a detailed examination of these theories.

# **Site index curves for hardwoods in Nova Scotia**

Truro, N.S. : Dept. of Lands and Forests, 1987. 7 p. : ill. Bibliogr. (Forest research report ; no. 1)  
MICROLOG 90-02221 1 fiche

Hardwood stands and hardwood/softwood stands cover 55% of the total forested area in Nova Scotia and account for 38% of Nova Scotia's total growing stock. It is essential that information be available on site quality and its relationship to hardwood growth and yield. This report summarizes the site index curves used in Nova Scotia, derived from stem analysis data; a simple, sigmoid shaped model to represent the height/age relationship; a weighting procedure that utilized older stands in determining the height/age relationship; and a grouping procedure to give equal representation to as wide a range of sites as represented in the data. Stem analysis was performed on 10 dominant free growing trees taken from each of 94 different stands. Each tree was sectioned every 1.25 m and the growth rings counted in the field.

#### Site preparation affects white spruce seedling performance after 20 years

by W.J. Ball. Edmonton : Forestry Canada, Northwest Region, Northern Forestry Centre, 1990. 8 p. : ill. Bibliogr. (Forest management note ; no. 47) ISSN 0714-1181 ISBN 0-662-17510-7  
MICROLOG 90-05786 1 fiche

Planting in the rough without site preparation has been correlated with poor seedling performance in operational plantations in the prairie provinces. Before herbicides were registered for vegetation control in forest plantations, summer 'straight-blading' was often the prescribed site treatment for both research and operational planting. Earlier trials in 1952 in Manitoba's Riding Mountain National Park on moderately well drained orthic gray luvisols showed that early survival and growth of white spruce could be improved by blading to mineral soil and disking with an Athens plow. Further study was initiated in 1962 in the same general area with the establishment of 3 trials to examine the effects of blading and growth of white spruce transplants. This note discusses the results of the latest remeasurement 21-23 years after planting.

#### The Size, structure and economic impact of the converted wood products industry of Newfoundland, 1987

by J.E. Winsor. S.I. : Forest Resource Development Agreement, 1990. vii, 55 p. : ill. Bibliogr. (FRDA report ; 006) ISSN 0840-7673 ISBN 0-662-17710-X  
MICROLOG 90-04479 1 fiche

A census survey of the converted wood products industry of Newfoundland was conducted during the summer of 1988 to collect data to permit an analysis of the current size, structure and economic impact of the industry. The major indicators used include employment, income, value of shipments and value added. The industry was defined using the Standard Industrial Classification System, and a list of 78 firms was compiled using telephone directories and 2 government publications.

#### Skaha hatchery evaluation

by E.A. Parkinson. Victoria : Ministry of Environment and Parks, 1986. 17 p. : ill. Bibliogr. (Fisheries management report ; no. 87) ISSN 0705-5390 ISBN 0-7726-0534-3  
MICROLOG 90-00635 1 fiche

Comparison of growth and survival of hatchery reared kokanee released into Skaha Lake at different sizes and times. Studies in Odell Lake suggested that larger fish produce higher returns and that the optimal time of release is late June. This study tested these results in a more northern lake containing additional species of cyprinids, determined if a size difference between wild and hatchery fish, present at release, would be maintained in subsequent years; and obtained estimates of survival to assess the feasibility of hatchery production of kokanee in this type of lake.

#### Skeena River salmon test fishery, 1987

by L. Jantz, R. Kadowaki and B. Spilsted. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, 1990. iv, 151 p. : ill., maps. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 804) ISSN 0706-6465  
MICROLOG 90-06631 2 fiche

Gillnet test fishery operations have been conducted at Tye in the lower Skeena River since 1955 to evaluate the magnitude of Skeena River salmon and steelhead trout returns. This report presents information on the program for 1987 and a summary for 1955-76. Daily catch of all salmon species and steelhead trout are detailed by set along with age, sex, and length data. Fishing dates, set times, actual fishing times and tide cycle information are presented. Daily index (catch per hour) calculations are tabulated for all salmon species and steelhead trout. Daily, weekly and cumulative escapement estimates for sockeye and pink salmon are also provided.

#### Skeleton Lake area structure plan

Edmonton : Alberta Municipal Affairs, 1988. 15 p. : map  
MICROLOG 90-02527 1 fiche

In 1980, following the completion of a detailed lake water quality and lake management study for Skelton Lake, the County of Athabasca and the Summer Village of Mewatha Beach adopted the Skeleton Lake area structure plan to provide goals, objectives and policies which would ensure responsible future management of Skeleton Lake and the surrounding shoreland area. A review of the water quality was conducted in 1987, after which a review of the plan was begun, incorporating the results and

recommendations of the lake water quality study. This document represents the recommendations of the Skeleton Lake area structure plan review committee, outlining a proposed lake management strategy consisting of lake planning goals, objectives and policies. AL PL PR SC

#### Skills Program : Annual report 1988-89

Winnipeg : Manitoba Culture, Heritage and Recreation, 1989. 57 p. : ill. *CSI 41106.005*. MICROLOG 90-04951 1 fiche

The Skills Program was established as a result of a national and provincial study conducted with a variety of not-for-profit organizations in 1982 and 1983. During the course of these studies, organizations identified a need for training and resource materials directed at improving the skills of management volunteers. This document describes the program, the major client groups, programming available, trainer availability, the delivery system, trainer development, and program achievements. Appendices give information on workshop topics available, workshops by client groups for 5 years and by region, and training for trainers workshops available. CI MS PR SA

Coverage included the current status of North American R&D in small airplane crashworthiness and the future focus of Canadian R&D and regulatory activity. CA PS SC TR

#### Small business in British Columbia, 1979-89 : a decade of change

Victoria : Ministry of Regional and Economic Development, 1990. 32 p. : ill. *CSI 37110.205* ISBN 0-7726-1113-0 MICROLOG 90-07312 1 fiche

Small business in the province involves a wide range of industries from logging to the retail trade to the leading-edge field of high technology. The importance of small business is supported by statistics showing that small firms accounted for 85 per cent of the employment created in B.C. between 1979 and 1987. This overview outlines trends in the B.C. small business sector. It describes the characteristics of small businesses in B.C., and examines the growth and change that has taken place recently in this area. BC CO PR ST

#### Small scale chipping trials in Nova Scotia

Truro, N.S. : Dept. of Lands and Forests, 1988. 11 p. Bibliogr. (Forest research report ; no. 7) MICROLOG 90-02227 1 fiche

A cooperative trial between the province of Nova Scotia and the Government of Canada was established to evaluate small scale chip production from various biomass sources, to determine the feasibility of using a small roadside chipper in conjunction with conventional logging equipment for fuel chip production, to determine production volumes, rates and costs associated with various harvesting operations and sources of new material, and to identify phases of this system which require modification. Five sites were selected as trial locations. Prior to treatment a point sample cruise was done at each location to determine stand characteristics. No modifications were made to the extraction equipment for handling unmerchantable biomass. Production rates and costs for felling and extraction and chipper productivity and production costs are given for each location, along with trucking costs and volume production. AP EN PR SC

**Small-scale archaeological surveillance and other emergency work performed in 1988, Canadian Parks Service, Quebec Region**

The sites involved were at Penouille in Forillon National Park, at the Côteau-du-Lac National Historic Park, and at Fort Saint-Jean. CA CU QU

**Small-scale turbulence and the problems of studying the ecosystem of Lake Baikal**

by V.A. Verkhovina...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 14 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5420) *Originally published in Russian.* ISSN 0704-3716  
MICROLOG 90-01526 1 fiche

When describing, simulating or studying the stability of ecosystems, it is assumed that the mathematical structure of the equations is analogous to the structure of the equations of the chemical kinetics. However, such an assumption may turn out to be qualitatively inconsistent with the experiment if the spatial heterogeneities of the components of the ecosystem are of a smaller scale or comparable to its characteristic values. This paper shows, through measurement and analysis of the spatial heterogeneity in the distribution of chemoorganotrophic bacteria, that the above situation, which is generally a unique one for 'ordinary' lakes, is currently observed in Lake Baikal.

**Snow hydrology of the Waimakariri catchment, South Island, New Zealand**

by R.D. Moore and T.D. Prowse. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. 24 p. : ill. Bibliogr. (NHRI contribution ; no. 88002) *In Journal of Hydrology (N.Z.): vol. 27, no. 1, 1988.* ISSN 0838-1992  
MICROLOG 90-06465 1 fiche

The Waimakariri River drains eastward from the main divide of New Zealand's South Island. Most of the steamflow in the South Island derives from the mountains, where varying portions of precipitation fall as snow. This paper summarizes what is known about the snow hydrology of the Waimakariri catchment. The paper outlines the geographical setting, the streamflow regime and the available sources of data; reviews the published and unpublished work on processes governing snow accumulation, melt and runoff, as well as the monitoring and modelling of snow storage and snow melt; and quantifies the hydrological significance of snow in the Waimakariri catchment.

**Snow sampling survey in the vicinity of Minnova Inc., Schreiber, 1988**

by H.N. Pfeiffer, D.J. Rascette and H.D. Griffin. Toronto : Environment Ontario, Technical Support Section, Northwestern Region, 1989. 8 p. : ill. Bibliogr. ISBN 0-7729-4964-4  
MICROLOG 90-00760 1 fiche

Minnova Inc. developed a base metal mine and concentrator complex near Winston Lake, 20 km northwest of Schreiber, Ontario. Minnova is adjacent to the former Zenmac Metal Mines Ltd. In February 1987, a pre-operational snow sampling survey was conducted around Minnova. The study found that snow chemistry was typical of areas unaffected by environmental contamination. The mine started operations in August 1987 and the first concentrates were produced in January 1988. To document the effects of these activities on local air quality, snow sampling was carried out in February 1988. This report gives the results of sampling from 10 sites for arsenic, cadmium, copper, iron, lead, mercury, silver, zinc, solids (dissolved, suspended and total), conductivity and pH.

Au cours des dernières années, nous avons assisté à une diffusion croissante d'une quantité toujours plus grande de nouveaux produits et de services associés aux nouvelles technologies de l'information (NTI). L'informatique a pénétré dans la vie quotidienne d'abord à travers l'univers du travail. C'est pour pallier la faible productivité dans le secteur tertiaire et la croissance des coûts de main-d'oeuvre dans les bureaux que l'implantation des NTI s'est généralisée. Ce document fait la lumière sur l'évolution de la société de l'information.

**Soil climate classification and winter  
risk assessment for the Atlantic  
region based on estimated soil  
temperatures**

by A. Bootsma and L.M. Dwyer. Ottawa : Agriculture Canada, Research Branch, 1990. iii, 44 p. : maps. Bibliogr. (Technical bulletin ; 1990-1E) (LRRC contribution ; no. 89-48) ISBN 0-662-17491-7  
MICROLOG 90-04234 1 fiche

Soil temperatures are an important factor influencing crop growth and other physical, chemical and biological processes important to agriculture in the Atlantic region. Because soil temperature records have been kept for relatively few stations in the region, it is necessary to estimate temperature from more readily available climatic parameters. This bulletin presents results of analyses of monthly mean soil temperature estimates for 53

locations obtained from an empirical regression-based soil temperature model. Data are presented on average monthly temperatures, derived soil climate parameters and classes, and winter low temperature extremes.

**The Soil survey of Oxford County**

by R.E. Wicklund and N.R. Richards. Toronto : Ministry of Agriculture and Food ; Ottawa : Agriculture Canada, Research Branch, 1961. 56 p. : ill., maps. (Report ; no. 28) ISBN 0-7729-6467-X

MICROLOG 90-04772 1 fiche

The reconnaissance soil survey of Oxford County was conducted during 1953 and 1954. The report presents data on the geology, climate, soil parent materials and drainage, and shows their influence upon the kind of soil development that has taken place, indicating what effect these factors have on the types of farming which are being practiced. A description of each soil series is given together with a discussion of its use for agricultural purposes. A section is included on the rating and suitability of the various soils that occur in the county for agricultural use.

**Soil survey of the Plains Hydrology and Reclamation Project, Battle River project area**

by T.M. Macyk and A.H. Maclean. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1987. xii, 62 p. : ill., maps. Bibliogr. (Report ; RRTAC 87-10) *Fold. maps not filmed.*

MICROLOG 90-03311 1 fiche

The detailed-soil survey of the Battle River area comprises a portion of the soils-related research activities associated with the Plains Hydrology and Reclamation Project. The survey was conducted to provide detailed-soils information for lands adjacent to areas already mined and lands destined to be mined, as well as to characterize the 'reconstructed' soils in the reclaimed areas. This soil survey involves an area of 10,700 ha and includes lands adjacent to the existing operations and proposed mine areas of Luscar Ltd. and Manalta Coal Ltd. The survey also includes reconstructed soil areas within the Diplomat and Vesta Mine sites. The soils of the study area were mapped by examining the soils at 2200 sites and the soils were classified in accordance with the Canadian system of soil classification.

#### Soils of Cumberland County, Nova Scotia

by J.L. Nowland and J.I. MacDougall. Ottawa : Agriculture Canada ; Halifax : Dept. of Agriculture and Marketing, 1973. 148 p. : ill., maps. Bibliogr. (Report ; no. 17) *Fold, maps not filmed.* MICROLOG 90-05963 2 fiche

This report presents the findings of a soil survey of the county conducted from 1966-69. The report begins with a discussion of the geographical setting of the soils, climate, geology, landforms, vegetation, and a brief economic history of the area. There follows an explanation of how the soils were distinguished and mapped and an account of the characteristics of each of the 29 soils and land types on the map. Land use is described, including recent farming trends, farm and forest production, the rated capability of the various soils to support agriculture and forestry, and their limiting factors. A section on the engineering aspects of the soils is included. A detailed profile description representative of each soil is provided, followed by comments on the significance of the analytical data.

### Some protocols for cDNA library construction with conifer tissues

by J.A. Pitel and W.M. Cheliak. Chalk River, Ont. : Canadian Forestry Service, Petawawa National Forestry Institute, 1989. v, 66 p.  
Bibliogr. (Information report ; PI-X-95) ISSN 0706-1854 ISBN 0-662-17325-2  
MICROLOG 90-01237 1 fiche

This handbook presents protocols for constructing cDNA libraries using conifer or other plant tissue as a source. Included are methods for RNA extraction that vary in terms of buffer composition, length of time for extraction, the requirement for ultracentrifugation, the degree of purification, and others. Methods for separating messenger (m)RNA from ribosomal (r)RNA, electrophoresis of mRNA, and Northern blotting are described. For cDNA library construction, methods are presented for 1st and 2nd strand synthesis, isolation of high molecular weight cDNA, electrophoresis of cDNA, ligation reactions to the vectors, and extraction of insert cDNA from the vector. Also included is useful information for those starting to work in this field, such as addresses for suppliers of chemicals and equipment, recipes for stock solutions, references for more detailed information, and suggestions as to which method might be successful for different tissues and species.

### Sommaire du rapport de l'étude sur la santé cardiaque au Nouveau-Brunswick

par B.C. Balram. Fredericton : Ministère de la santé et des services communautaires ; Ottawa : Santé et bien-être social Canada, 1989. 8, 8 p. *Bilingue (Summary of the New Brunswick heart...)*.  
MICROLOG 90-03194 1 fiche

L'étude sur la santé cardiaque au Nouveau-Brunswick fut entreprise en 1988 par la Division de la Santé publique et des Services médicaux du Ministère de la Santé et des Services communautaires du Nouveau-Brunswick. La raison principale d'avoir entrepris cette étude était de connaître combien de Néo-Brunswickois sont à risque de crises cardiaques et d'accidents cérébro-vasculaires. De plus, on voulait recueillir de l'information pour savoir ce que les gens savent au sujet des facteurs responsables de la maladie cardiaque et des accidents cérébro-vasculaires, tels que l'hypertension artérielle, l'hypercholestérolémie et le tabagisme. Ce document se penche sur la question et en donne les points saillants.

**Special study on labour force groups**

by P.D. Rosenbaum and J. Bursten. Ottawa : Health and Welfare Canada, Health Promotion Directorate, 1988. vi, 52 p. Bibliogr.

(Technical report series) At head of title: Canada's Health Promotion Survey  
MICROLOG 90-05599 1 fiche

The survey was conducted in 1985 as a major step in the development of a national health promotion policy for Canadians. The survey provides information about the health attitudes, health related behaviours, beliefs and health practices of Canadians. This paper examines some of the survey results for working Canadians. Some implications of these findings for workplace health promotion programs are discussed.

**Spectral characteristics of low-angle radar ground clutter**

by H.C. Chan. Ottawa : Defence Research Establishment Ottawa, 1989. x, 46 p. : ill. Bibliogr. (Report ; no. 1020)  
MICROLOG 90-04046 1 fiche

The performance of ground-based radars is affected by the spectral characteristics of ground clutter. Most signal processing algorithms designed to enhance detection performance are Doppler-frequency-sensitive, such as the moving target indicator filter,

Doppler processor and coherent clutter map. This report gives the results of a comprehensive spectral analysis of low-angle ground clutter, using the MIT Lincoln Laboratory Phase I data and the DREO S-band clutter data. The report presents the spectral analysis of ground clutter for different bands of radar frequency; describes the data used in the spectral analysis, including both the conventional Fourier analysis and a super-resolution spectral analysis technique; gives a brief background on the maximum entropy spectral estimate; and describes the particular procedure designed to bring out the spectral characteristics of ground clutter from short time series.

**Spruce height and volume growth response to an aerial release treatment using 2,4-D on three plantations near Manitouwadge, Ont.**

by C.S. Krishna and W.D. Towill. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1989. v, 22 p. : ill. Bibliogr. (Technical report ; no. 08)  
MICROLOG 90-02969 1 fiche

Three spruce plantations in the Manitouwadge area of north central Ontario were released from hardwood competition in 1983 with 2,4-D. Three years after release, planted spruce were sampled in treated and untreated areas within each plantation to determine the extent of conifer benefit from the 2,4-D treatment. The relative dominance of the crop trees was determined for each site and stem analysis was used to measure volume increment and total volumes of selected individual spruce trees.

**Stability and control testing of two Ministry of Health ambulances**

by W. Mercer. Toronto : Ministry of Transportation, Transportation Technology and Energy Branch, 1989. vii, 77 p. : ill. MICROLOG 90-03946 1 fiche

The ambulance fleet in Ontario is made up of standard 8900 GVW Dodge van chassis modified to specific standards after purchase. The test program identified the stability and control characteristics of the ambulances by subjecting them to standard automotive tests and test track manoeuvres while instrumented with transducers for recording vehicle response data. The test consisted of driving the vehicle onto a prescribed course and conducting a single manoeuvre at progressive speeds or degrees of aggression until response trends showed characteristic behaviour patterns. The tests were conducted to a point as close to the limits of vehicle stability as was deemed safe by the test staff. Each vehicle was tested with 4 load conditions and 2 states of tire wear were examined. The data were analyzed and reduced to show trends in vehicle behaviour for both left and right manoeuvres at various speeds and used as a subjective guide to predict stability thresholds.

### Stability of unbound open-graded aggregate layers

by R.J. Bathurst and G.P. Raymond. Toronto : Ministry of Transportation, Research and Development Branch, 1990. vi, 39 p. : ill. Bibliogr.  
MICROLOG 90-05888 1 fiche

The report presents the results of a laboratory study carried out to investigate the stability of thin layers of coarse single-sized (open-graded) pavement aggregates under dynamic plate loading. The investigation considered a range of aggregates having variable quality as defined by the Aggregate Index Number, a quantitative measure of the combined durability of an aggregate based on its resistance to fracture and abrasion as measured in the Los Angeles abrasion and mill abrasion tests. Other variables between tests were gradation size and support compressibility. The results of a test carried out with a 1.5% asphalt cement binder and a test with an unbound aggregate sample that was partially flooded are also presented. Implications to selection criteria for aggregate used in unbound open-graded drainage layers below highway pavements are identified.

### A Statistical comparison of uplift design methods for augered footings in sand

by C.B.H. Cragg and R.H.K. Tsang. Toronto : Ontario Hydro, Research Division, 1989. 41 p. : ill. Bibliogr. (Report ; no. 89-261-K) MICROLOG 90-03525 1 fiche

Predicting the uplift capacity of augered footings in sand is complex because the failure surface changes shape with foundation geometry, soil shear strength and construction practice. A data base of 217 load tests in sand were assembled where the soil properties are measured by conventional testing. The relative accuracy and consistency of 8 design methods were assessed, based on their ability to accurately predict the data base results. This report provides a description of the statistical analysis procedure used to rank the design methods and identifies the most accurate methods. In addition, the merits of using a single predictive method for design work versus

using a combination of methods is discussed.

Ottawa : Marine Casualty Investigations, 1990. v. 27, v. 27 p. : ill. *Bilingual*. *CSI 21123.011*. MICROLOG 90-06349 1 fiche

Data on reported casualties, accidents aboard ships, dangerous occurrences and some foreign casualties of interest to Canadian authorities. The report covers specific data for 1988-89 and a general overview for 1985-89. Vessels covered include: all commercial vessels of Canadian flag; all foreign vessels that reported casualties, accidents aboard ship or dangerous occurrences while in Canadian waters; and foreign vessels involved in the more important casualties or accidents aboard ship outside Canadian waters, but reported through Canadian authorities. Pleasure craft accidents are not normally included unless they were involved in an accident with a commercial vehicle.

# **Statistiques 1988 : violence conjugale**

Québec : Gouvernement du Québec, Ministère de la sécurité publique, Direction générale de la sécurité et de la prévention, 1989. 20 p. CSI 66132.002. ISBN 2-550-18845-4  
MICROLOG 90-00656 1 fiche

Ce bulletin fait état des crimes de violence conjugale rapportés en 1988 par les Services de police municipaux, la Sûreté du Québec et la Police Amérindienne à la Direction générale de la sécurité et de la prévention. Les données figurant dans ce rapport sont fondées sur les incidents qui sont connus de la police et qu'elle a rapportés à la Direction générale de la sécurité et de la prévention. Les services de police des municipalités ont accru leur participation à ce programme le nombre de répondants passant de 87 en 1987 à 112 en 1988 soit une augmentation de 28,74%. C'est ainsi que la population desservie de 5 794 720 habitants qu'elle était en 1987 est passée à 6 174 359 habitants en 1988 soit une augmentation de 6,55%. La population officielle du Québec en 1988 était de 6 540 406 habitants. Finalement le document porte sur les infractions relatives à la violence conjugale; les infractions solutionnées; et la criminalité par région administrative.

#### Statistiques sur la recherche et le développement industriels au Québec, 1987

Québec : Bureau de la statistique du Québec, Statistiques économiques, 1989. 43 p. CSI 67131.030. ISBN 2-551-12180-9 MICROLOG 90-02042 1 fiche

Ce rapport statistique présente différents tableaux sur la recherche et le développement (R-D) industriels au Québec en 1987, ainsi que quelques tableaux comparatifs avec le Canada et les autres provinces. L'information est organisée selon la 'Classification type des industries de 1980'. L'information produite touche essentiellement les dépenses en R-D, le personnel affecté à la R-D et le financement de la R-D. CO PR QU SC ST

#### Statistiques sur les prises d'ours noirs au Nouveau-Brunswick, 1988

par K. Craig. Fredericton : Ministère des ressources naturelles et de l'énergie, Direction de la pêche sportive et de la chasse, 1988. 20 p. : ill. L'éd. anglaise (*Black bear harvest statistics...*) sur la même fiche. CSI 45124.005. MICROLOG 90-02263 1 fiche

La poussée d'intérêt envers la chasse à l'ours noir que l'on a connue au cours des années précédentes semble s'être quelque peu stabilisée en 1988. Les ventes de permis n'ont augmenté que de 1 % par rapport aux totaux de 1987. Le nombre d'ours enregistrés (1 062) a connu une hausse de 8 % par rapport à 1987. Les bêtes déclarées par les non-résidents représentent environ 75 % de tous les ours enregistrés, etc. On trouvera dans ce document le sommaire des statistiques sur les prises d'ours compilées d'après les données d'enregistrement. AP EV PR SC ST

#### Statistiques sur les prises d'ours noirs au Nouveau-Brunswick, 1989

par K. Craig. Fredericton : Ministère des ressources naturelles et de l'énergie, Direction de la pêche sportive et de la chasse, 1990. 20 p. : ill. L'éd. anglaise (*Black bear harvest statistics...*) sur la même fiche. CSI 45124.005. MICROLOG 90-07086 1 fiche

Les chasseurs à l'ours noir du Nouveau-Brunswick ont, en 1989, enregistré le plus haut taux de succès jamais vu. Les chasseurs non résidents ont connu plus de succès que les chasseurs résidents avec des taux de 31 % par rapport à 16 %. Le nombre total d'ours enregistrés a cependant décliné d'un pour cent par rapport au total de l'année précédente. La vente de permis a, quant à elle, subi une baisse de 31 %. L'augmentation du prix des permis en 1989 est vraisemblablement la source de cette importante baisse. Ce document se penche sur ces différentes questions en fournissant des statistiques sur les prises d'ours noirs au Nouveau-Brunswick pour l'année 1989. AP CU PR ST

#### Status and distribution of the loggerhead shrike in western Canada

by E.S. Telfer...et al. Ottawa : Canadian Wildlife Service, 1989. 4 p. : maps. Bibliogr. (Progress notes ; no. 184) French ed (*Situation et distribution...*) : 90-02461/1 MICROLOG 90-01704 1 fiche

During the 1987 nesting season, the status and distribution of Loggerhead Shrikes were surveyed in the southern parts of Manitoba, Saskatchewan, and Alberta. Roadside counts were conducted from automobiles on survey routes in areas of the provinces suspected of retaining shrike population. AL CA EV MS SC

#### Status and outlook for the major commercial fish species of Lake Huron, 1990

by F.I. McNeil, E.J. DeLaplante and D.N. Hughes. Owen Sound, Ont. : Ontario Ministry of Natural Resources, Lake Huron Fisheries Assessment Unit, 1990. ii, 202 p. : ill. (Report ; 1-90) (Report ; 2-90) Appendix (i, 106 p.) laid in. CSI 55116.201. ISSN 1180-226X MICROLOG 90-06602 4 fiche

Allocation of fish to the commercial fishing industry are reviewed and where necessary revised annually. This report presents available stock status information from commercial fishing reports and various assessment activities. Harvest and quotas are tabulated by management area and species to facilitate the reconciliation process. Values of fish landed and sold are offered on a similar basis to give an economic dimension to the fishery. Stock status information includes variability in recruitments and recruitment prospects for the upcoming fishing year and stock characteristics and stock performance under past fishing. Recruitment was assessed through independent index fishing and from analysis of age composition data obtained through onboard sampling of commercial catches. Results are presented on a management area basis and also by assessment area where more than one assessment area falls within a management area. FI ON PR SC ST

#### The Status of English statute law in Saskatchewan

Saskatoon, Sask. : Law Reform Commission of Saskatchewan, 1990. iii, 330 p. MICROLOG 90-03800 4 fiche

This report provides a map for the task of disposing of received statute law. The main body of the report discusses the problem of reception, and attempts to identify the living portion of English statute law in the province. An appendix makes proposals for re-enactment of some fifty English statutes, or parts of statutes, as Saskatchewan legislation. JU MS PR

#### Status of larid breeding sites between Frank Channel and Yellowknife Bay, and other observations of larids in the North Arm of Great Slave Lake, 1988

by J. Sirois and L. Seddon. Yellowknife : Canadian Wildlife Service, Western and Northern Region, 1990. vi, 39 p. : maps. Bibliogr. (Technical report series ; no. 90) ISSN 0831-6481 ISBN 0-662-17504-2 MICROLOG 90-06377 1 fiche

Larid (Caspian terns, Common terns, Arctic terns, Herring gulls, Ring-billed gulls and Mew gulls) breeding sites were surveyed in June 1988 in the North Arm of Great Slave Lake, between Frank Channel and Trout Lake, an area previously surveyed in 1986. Many nesting sites were revisited in August. The study recorded changes in abundance and distribution of all larids between Frank Channel and Trout Lake; identified larid breeding sites between Frank Channel and Whitebeach Point and around Waite Island; identified patterns of post-nesting distribution of larids between Frank Channel and Trout Lake; and searched for and recorded the presence of nesting waterfowl at all larid breeding sites surveyed.

#### Status report on the acid precipitation on common loon reproduction in Ontario : the Ontario Lakes Loon Survey

by M. Wayland and D. McNicol. Ottawa : Canadian Wildlife Service, Ontario Region, 1990. iii, 26 p. : ill., maps. Bibliogr. (Technical report series : no. 92) ISSN 0831-6481 ISBN 0-662-17533-6 MICROLOG 90-06416 1 fiche

As part of the Canadian Wildlife Service (CWS) long range transport of airborne pollutants biomonitoring program, a volunteer-based project known as the Ontario Lakes Loon

Survey (OLLS) was expanded in 1987 to study the effects of lake acidification on Common Loon reproduction in Ontario. Data were collected on 491 and 458 lakes in 1987 and 1988 respectively. After combining lakes surveyed in 1988 with those that were surveyed only in 1987, there were 387 lakes with reliable data on loon reproductive success. This paper reviews some of the major results from surveys done in 1987 and 1988, discusses the value of the OLLS as a tool for monitoring loon production in relation to acid rain in Ontario, and identifies areas which must be improved prior to incorporation into the overall CWS biomonitoring program.

#### The Statute of Frauds and related legislation

Edmonton : University of Alberta, Institute of Law Research and Reform, 1985. iv, 88 p. (Report : no. 44) ISSN 0317-1604 MICROLOG 90-01821 2 fiche

The Statute of Frauds, enacted in 1677 by the English Parliament, addresses the problem of false claims being accepted by the courts, by requiring writing for a number of kinds of contracts and for most dispositions of interests in property. Some of its provisions are still the law of Alberta. This report examines the provisions of the Statute of Fraud to see whether a requirement of writing in the cases to which it applies is still useful. It makes recommendations concerning where the requirement should be retained, and where it should be abolished.

#### Statutory grain freight rates from Alberta to Vancouver/Prince Rupert and Thunder Bay, 1989-90 crop year

Edmonton : Alberta Economic Development and Trade, Transportation Services ; Alberta Agriculture, Production Economics Branch, 1989. 21 p. CSI 34105.006. MICROLOG 90-01391 1 fiche

The Western Grain Transportation Act (WGTA) confers upon the National Transportation Agency the authority to prescribe the annual rate scale for the movement of western grain by rail on or before April 30th for the next crop year. This publication provides information on statutory grain freight rates from local delivery points to Vancouver, Prince

Rupert, and Thunder Bay. The publication lists the local shipping points alphabetically, the railway serving the point, the mileage to port upon which the freight rate is based, the base rate scale, the total 1989-90 rail freight rate, the amount of rail freight rate to be paid by the federal government, and the producer share prescribed under the WGTA.

#### Steelhead harvest analysis, 1984-85

by S.J. Billings. Victoria : Ministry of Environment, 1986. 43 p. : ill. (Fisheries technical circular ; no. 71) CSI 37105.006. ISSN 0319-9436 MICROLOG 90-06969 1 fiche

Since 1966, all anglers fishing for steelhead in the province have been required to purchase a steelhead licence and punchcard in addition to their basic angling licence, providing an opportunity for fisheries biologists to evaluate the steelhead trout sport fishery by conducting a mailout questionnaire survey of steelhead anglers. Those steelhead which escape the commercial fleet and Indian food fishery are available to the sport angler who is presently the only user group whose 'take home' catch can be easily regulated to ensure that enough steelhead survive to spawn. This report details the results of the 1984-85 Steelhead Harvest Questionnaire, as well as presents a comparative summary of previous years' data. Included is a review of the 1984 juvenile steelhead released from provincial and federal rearing facilities, as well as information from the questionnaires dealing with anglers and catch.

**Storability of prepared raw surimi**

by M. Matsumiya and S. Otake. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 12 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5139) *Originally published in Japanese.* ISSN 0704-3716  
MICROLOG 90-00116 1 fiche

Raw surimi when frozen deteriorates markedly in kamaboko (fish-cake) formability, therefore it is stored in the unfrozen state at -3C by adding sodium chloride and ethyl alcohol. Since there are technical difficulties in maintaining this temperature, it would be desirable to lower the freezing point even further. This paper reports on a number of additives grouped according to chemical structure, and the effect of type and added concentration of these test agents on lowering the freezing point. The effect on the storability of raw surimi of the additives selected from each group was examined for Ca<sup>2+</sup>-ATPase activity and protein solubility of actomyosin as well.

**Strait of Georgia creel survey : sport fishery statistics, 1983**

by T.F. Shardlow...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, 1989. vii, 53 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1872) ISSN 0706-6473  
MICROLOG 90-05220 1 fiche

During the 1970s, the Strait of Georgia tidal sport fishery grew to be the largest harvester of chinook and coho salmon. Deficiencies in traditional methods of estimating sport catch and the need for accurate catch statistics led to the initiation of the creel survey program in 1980. This report presents catch and effort data for the Strait of Georgia tidal sport fishery for each month of 1983 and for each statistical area. The statistics were derived by combining the data from over 26,000 interviews and 50 aerial surveys. Estimates were provided for the number of sport fishing boat trips and the catches of chinook, coho, and pink salmon along with rockfish, lingcod, dogfish and other finfish. Also given are numbers of marked (adipose fin-clipped) and unmarked chinook and coho examined during the creel survey, and the age composition of the chinook catches.

**Strategic planning of freight transportation : STAN, an interactive-graphic system**

by T.G. Crainic...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 46 p. : ill., maps. Bibliogr. (Publication ; no. 664)  
MICROLOG 90-01613 1 fiche

STAN is an interactive graphic system for national or regional strategic planning of multimode multiproduct transportation systems. The paper briefly describes the general concepts underlying the system, the data base structure, the assignment procedures and the results. Data and results from an actual application are used to illustrate these concepts.

**Strategic planning of freight transportation in Brazil : methodology and applications, part 1 : project summary**

edited by Michael Florian and Teodor G. Crainic. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. 46 p. : maps. (Publication ; no. 638)  
MICROLOG 90-01417 1 fiche

The main aim of this collaborative project was to develop the means and the methods for evaluating contemplated changes in the transportation infrastructure used for freight movements in Brazil (rail, highway, ports and navigation, overall demand), with a particular emphasis on energy consumption. The planning methods and the database that supports these methods were to be implemented in Brazil and provide the capability for carrying out strategic planning exercises on a continuing basis. Part I is a project summary stating the main objectives, reviewing the history, and summarizing the achievements made in the new methodological contributions, the development of the STAN system, the specification of data for use with the STAN system, the applications carried, and conclusions on the entire project.

**Strategic planning of freight transportation in Brazil : methodology and applications, part 2 : methodology : the new contributions**

edited by Michael Florian and Teodor G. Crainic. Montreal : Université de Montréal, Centre de recherche sur les transports, 1989. iv, 247 p. : ill. Bibliogr. (Publication ; no. 639)  
MICROLOG 90-01418 3 fiche

The main aim of the collaborative project was to develop the means and the methods for evaluating contemplated changes in the transportation infrastructure used for freight movements in Brazil (rail, highway, ports and navigation, overall demand), with a particular emphasis on energy consumption. The planning methods and the database that supports these methods were to be implemented in Brazil and provide the capability for carrying out strategic planning exercises on a continuing basis. Part II describes the new methodological developments motivated by the strategic freight transportation problems considered. It contains the general modeling framework developed, as well as the specific representation of various

transportation modes that result by using this modeling approach. The formulation and solution algorithms for the multimode multiproduct network assignment method is described in detail. An approach to computing maximal multimode multiproduct network flows is given as well.

#### Strategies for implementing microcomputers in schools : the Ontario case

by M.G. Fullan, M.B. Miles and S.E. Anderson. Toronto : Ministry of Education, Computers in Education Centre, 1988. ii, 174 p. Bibliogr. French ed. (Stratégies d'implantation des...) : 90-04963/3. ISBN 0-7729-4673-6  
MICROLOG 90-04962 2 fiche

The Ontario Ministry of Education has committed itself to full-scale, high-quality implementation of microcomputers in all Ontario schools by 1996. This report summarizes methods of implementing educational changes, applies it to the situation in Ontario, and creates an implementation policy and a recommended set of strategies which are designed to help the Ministry, local school systems, and other agencies in implementing ministry policy and approved hardware and software effectively. Data sources include interviews with key ministry, university and industry personnel, policy documents and reports, and several studies of the adoption and implementation of microcomputers in Ontario schools. Ten factors drawn from research on implementation provide the conceptual framework for analyzing and

contrasting the government's broad picture with local experience.

#### A Strategy for change : British Columbia shipbuilding and repair industry

Victoria : Shipbuilding Action Group, 1990. iii, 42 p. : ill. CSI 37170.204. ISBN 0-7726-1151-3  
MICROLOG 90-06821 1 fiche

On February 20, 1990, Canada's Minister of Finance announced the decision not to proceed with the Polar 8 icebreaker. The implications of this decision for British Columbia shipyards are serious and far-reaching. Construction of the icebreaker was to be the key factor in the restructuring necessary for the industry to compete in the shipbuilding and ship repair business in the 1990s. Without the Polar 8,

British Columbia shipyards will not be able to generate the essential high technology transfer, maintain the existing skills and expertise, or benefit from the vital spin-offs essential for the future health of the industry. In response B.C.'s Minister of Regional and Economic Development announced on February 23, 1990, the establishment of the Shipbuilding Action Group to examine ways to revitalize the west coast shipbuilding and ship repair industry. This report contains the Action Group's long term strategy for survival.

# **A Strategy for wildlife habitat mitigation for the Oldman River Dam Reservoir**

by J.E. Green and T.R. Eccles. Edmonton : Alberta Public Works, Supply and Services, Oldman River Dam Project Office, 1989. vi, 36 p. : ill. Bibliogr.  
MICROLOG 90-01159 1 fiche

In August 1984, the Government of Alberta announced that a dam would be constructed on the Oldman River, downstream of the confluence of the Castle, Crowsnest and Oldman rivers. A series of mitigation/opportunities plans were formulated and initiated in 1985, including an overview and general data collection, assessment and mitigation design, mitigation implementation, and monitoring. This report presents the steps taken in developing a wildlife habitat mitigation plan. The report includes general objectives and scope, major assumptions and constraints to planning, the amount of habitat lost to flooding, the subsequent habitat need of local wildlife after flooding, and the types of habitat improvement projects required. A mitigation strategy for wildlife and the approximate costs to implement this strategy are discussed. A monitoring program is recommended to assess the success of vegetation establishment, quantify changes in habitat suitability as a result of the mitigation program, and evaluate wildlife use of the specific mitigation projects.

# **Stratification and quality assessment of *Abies lasiocarpa* seeds**

by C.L. Leadem. S.I. Forest Resource Development Agreement, 1989. v, 18 p.

Bibliogr. (FRDA report ; 095) ISSN 0835-0752 ISBN 0-7726-1029-0  
MICROLOG 90-03067 1 fiche

In the past several years there has been increased interest in subalpine fir (*Abies lasiocarpa* (Hook.) Nutt.) for reforesting northern, wet-belt, and high elevation sites in B.C., particularly in the Bell-Irving River valley. Since Ministry and private nurseries were unable to meet the desired seedling quotas for the species because of infrequent cone crops, poor seed quality, low germination, slow initial growth and insufficient understanding of cultural requirements, a project was begun on the cultural requirements of this species, one part of which included problems associated with seed dormancy and vigour. This report presents the results of experiments on the effects of stratification and temperature on germination of *Abies lasiocarpa* seeds, with the aim of demonstrating that seed germination is enhanced under low temperatures if seeds receive appropriate stratification treatment. Seed source was also considered as a factor in the experimental design because individual seedlots may respond differently, independent of the treatment.

# **Stratigraphy and oil shale resource potential of the Middle Devonian Marcellus formation, southwestern Ontario**

by M.D. Johnson...et al. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1989. xv, 149 p. : ill., fold. maps. (Ontario Geological Survey open file report ; 5716)  
MICROLOG 90-00865 3 fiche

This report is one of the 4 final reports considering the oil shale resources of the province. The report describes the oil shale resource potential of the Middle Devonian Marcellus Formation - a largely black shale unit which underlies part of southwestern Ontario and north central Lake Erie. The study looks at both the stratigraphy and resource potential of the formation, based on a combination of drilling and organic chemical investigations made of the unit. Extensive use was made of down-hole geophysics which provided good correlation between drill holes and aided in the identification of organic rich zones.

by P.F. Matysek...et al. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey

Branch, 1990. 98 p. : maps. (Open file ; 1990-11) Fold. maps not filmed. ISSN 0835-3530  
MICROLOG 90-07372 3 fiche

The Purcell Wilderness Conservancy, located in the mountain range between Kootenay Lake and the Columbia Valley, was created in 1974 to preserve 1,320 sq km of the Purcell Mountains as a roadless tract of recreational wilderness area. Resource development, including mineral exploration and mining which is traditional in the area, was prohibited and any existing claims were frozen by a mineral reserve when the conservancy was established. In 1989 a mineral potential evaluation was initiated to provide the information to settle outstanding issues of mineral resource management. As an integral part of this evaluation, a detailed stream sediment geochemical survey was completed to expand on the geochemical data available from the 1977 regional geochemical survey. This report presents a compilation of new geochemical data and includes data from recent analyses of archived 1977 samples, and of infill sediment sampling in 1989 from the eastern half of the study area. Analytical results for gold and 28 other elements are presented.

**Stress corrosion crack growth rates in gas pipelines : progress report I**

by O. Vosikovskiy, F.A. MacLeod and D.R. Kiff. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1990. ii, 15 p. : ill. Bibliogr. (Report ; MTL 90-18(TR))  
MICROLOG 90-07115 1 fiche

This report describes a stress corrosion cracking (SCC) experiment on a full size line pipe, designed to determine SC crack growth rates applicable for field conditions. The 20-in. diameter pipe was pressurized by a pressure sequence simulating one year of operation of the pipeline. Ten environmental chambers, 4 with aqueous electrolytes simulating solutions found under disbonded coating, and 6 with soil and bacteria from pipeline sites where SCC was found were placed on the pipe. Fifty-six local environmental conditions were created in

the chambers by combining environment, cathodic protection potential, water table level in soil, and simulated disbonded coating. Surface cracks 1.5 mm and 2.3 mm deep were introduced for each condition and the growth of the cracks was measured by the DC potential drop technique. Relevant environmental variables and characteristics of bacteria were monitored.

**The Stress induced volatile emissions (SIVE) technique for measuring levels of stress in conifer seedlings**

compiled by D.R. Draketford ; edited by C.D.B. Hawkins. S.I. : Forest Resource Development Agreement, 1989. iv, 20 p. Bibliogr. (FRDA report ; 084) ISSN 0835-0752 ISBN 0-662-17124-1  
MICROLOG 90-04431 1 fiche

The stress induced volatile emissions technique uses gas chromatography to measure the levels of certain gases (such as acetaldehyde, ethane, ethanol, or ethylene) which are released in response to a given stress by plant tissue (needles and stems). This manual gives a short outline of the technique, providing instructions necessary to sample the tissue, to run the samples through the gas chromatograph ensuring safe operation at all times, to collect the data for analysis by computer and to pack the 2 analytical columns utilized in the procedure.

**A Structural and lithologic model for the formation gold bearing quartz breccias at Gordon Lake, N.W.T. : open file report**

by T. Stokes, M. Zentilli and N. Culshaw. Yellowknife : Indian and Northern Affairs Canada, Geology Division, 1989. 13 p. : ill., maps. Bibliogr.  
MICROLOG 90-01960 1 fiche

Continuation of the investigation into the occurrence of gold bearing quartz-breccia systems found at Knight Bay, South Gordon Lake, and further refinement and testing of the regionally predictive model suggested by Stokes et al. (1988). This report summarizes the field data collected in the summer of 1989 and specifically focuses on the stratabound style of quartz-breccia found at Kidney Pond and other localities within the southern Gordon Lake area.

**Structural assessment of the modified turbine blade root design**

by B. Teper. Toronto : Ontario Hydro, Research Division, 1990. ii, 18 p. : ill. (Report ; no. 90-74-K)  
MICROLOG 90-06104 1 fiche

Following the failure of a L-1 stage turbine blade on a Nanticoke 500 MW turbine in 1983, finite element analysis was carried out to calculate stresses in the existing turbine blade roots. The analysis was extended to include several modifications which could be implemented using existing disc steeples and new blades. Efforts to optimize the design of the blade's root and the disc's steeple continue. One such attempt was the new design of the root geometry proposed recently by NEI Parsons. This report presents the results of the finite element analysis of this design.

**Structural change and the adjustment process : perspectives on firm growth and worker turnover**

by J.R. Baldwin and P.K. Gorecki. Ottawa : Statistics Canada, Economic Council of Canada, 1990. xxi, 211 p. : ill. Bibliogr. French ed. (*Changement structurel et adaptation...*) : 90-06767/3. CSI 22215.217. ISBN 0-660-13568-X  
MICROLOG 90-06766 3 fiche

This study is aimed at estimating the pattern and magnitude of worker and job reallocation, in both the long and the short run, as part of the dynamics of the market economy. It addresses such questions as: Have there been shifts in the relative importance of different sectors and industries? What effects do the exit and entry rates of plants have on the release and hiring of labour? How extensive is the employment expansion and contraction of continuing firms? How important is firm size in the process of job gain and job loss? How significant are worker separations? What is the relationship between firm-related job turnover and worker separations? Do 'trade-sensitive' industries experience less or more employment change than other industries?

### Structural differences between the Vancouver, Victoria, and interior regional economies of B.C.

by H.C. Davis. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1989. 12 p. Bibliogr. (Comparative urban and regional studies ; no. 21) ISSN 0828-2412  
MICROLOG 90-05481 1 fiche (Available on fiche only)

Structurally, the provincial economy of B.C. is composed of three distinct regional economies: the metropolitan Vancouver region with its relative emphasis on producer services, the metropolitan Victoria region with its specialization in administrative services, and the provincial interior, which has a pronounced orientation toward the extractive activities. This paper examines the differences between the three regional economies in terms of labour force distribution, per capita income levels, unemployment rates, and employment growth. It notes the lack of research into the economic linkages between the three regions.

### The Structure of breeding marks in the dentine of Odontoceti

by G.A. Klevezal, L.I. Sukhovskaya and A.Y. Vilenkin. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 13 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5424) Originally published in Russian. ISSN 0704-3716  
MICROLOG 90-01522 1 fiche

For the past 25 years, the age of Odontoceti has been determined by counting the growth layers of dentine, which are alternating bands of varying optical density in sperm whales and dolphins of the genus *Stenella*. These strongly contrasting layers were regularly encountered in almost all adult females, in about 10% of male sperm whales and in 30% of male *Srenella*. This paper gives the results of an analysis of the structure of polished sections and of stained sections of teeth from 12 adult sperm whales which had been preserved dry for 20 years. These sections were compared to sections of decalcified canine teeth obtained from a State fur farm and freshly fixed in neutral formalin. The sections were analyzed with a MF-4 microphotometer and local X-ray spectral analysis for appearance and composition.

### Student retention and transition in Ontario high schools : policies, practices, and prospects

by S.B. Lawton...et al. Toronto : Ministry of Education, 1988. xiv, 128 p. Bibliogr. (Student retention and transition series) ISSN 0839-5039 ISBN 0-7729-4929-8  
MICROLOG 90-00141 2 fiche

The purpose of this study is to determine what Ontario high schools might do in order to reduce the dropout rate. Four approaches are taken to the issue: the first focuses on the social ecology of high schools, looking at how they relate to their environment; the second focuses on organizational characteristics that others have reported are associated with more effective schools; the third, an ethnographic approach, views the world through the eyes of students in the process of dropping out; and the fourth focuses on the transition from school to work viewed as a rite of passage.

**Studies on looseness of cod fillets**

Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 4 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5413) *Originally published in Icelandic.* ISSN 0704-3716 MICROLOG 90-01532 1 fiche

In Iceland, looseness and cracks are a very common problem in cod fillets, and sometimes in haddock fillets as well. This research studied the principle reasons for such looseness and whether quick chilling would reduce it. Samples of cod were taken from the southwest at 2-week intervals using dragnet boats or trawlers. Living and struggling cod were selected, to exclude the effect of the fishing on the fish as completely as possible. Part of the fish was immediately put in ice water and the rest was stored for 1 1/2 hours on deck before it was bled, eviscerated and put on ice in a box. The fish that was immediately placed in ice water was also bled and eviscerated after 1 1/2 hours and put on ice in a box.

# Studies on the artificial sex control in rainbow trout, *Salmo gairdneri*

by H. Okada. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 102 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5329) *Originally published in Japanese.* ISSN 0704-3716 MICROLOG 90-02098 2 fiche

Sex ratio control and the sterilization of broodstocks are useful for the cultivation of salmonids, especially that of rainbow trout. They are also effective in ensuring the release stock for propagation. Especially in the masu salmon propagation industry in which the release stocks are produced by pond breeding, the increase in the female ratio directly affects the increase in the stock production and the smolting ratio which in turn enables the effective management of the industry. This paper discusses sex chromosomes, reversal methods of sex differentiation by sex steroids, production of all females in the first generation or of all males in the second generation from the sex-reversed fish, and sterilization by all-female triploids of rainbow trout.

# Studies on the formation of the house in appendicularians *Oikopleura dioica* Fol

by W.F. Korner. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 90 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5132) *Originally published in German, by Springer-Verlag at Heidelberg.* ISSN 0704-3716 MICROLOG 90-00098 1 fiche

All Tunicata have a common character, namely, that they secrete a tunic. This formation of a tunic has been studied in some detail only in the ascidians and in salps. From the findings available, it can be assumed that the formation of the appendicularian house is homologous to the formation of the tunic in the ascidians and salps. This paper describes the differences in formation and appearance between these two, including a description of the material, the structure and function of the feeding apparatus, the oikoplastic epithelium, the intracellular secretion processes, the extracellular processes during formation, chemical composition of the house, and development of the exuvial bodies. The paper concludes with the affinities of the appendicularians with the other Tunicates, based on the present findings.

# Studies on the productivity of Pos'et Bay (Sea of Japan) in relation to the problems of recovery of stocks of yezo scallop

by Y.E. Bregman, I.F. Rassoshko and T.K. Tibilova. Ottawa : National Research Council,

Canada Institute for Scientific and Technical Information, 1989. 18 p. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5492) *Originally published in Russian, by the Soviet-Japan Symposium on Aquaculture, at Moscow, U.S.S.R.* ISSN 0704-3716 MICROLOG 90-01688 1 fiche

Irrational exploitation of natural stocks of commercial invertebrates in the coastal zone of the Sea of Japan led to a significant decrease in the numbers of many species. The prohibition of commercial exploitation was accompanied by an intensification of scientific studies in the reproduction of commercial species. In 1970 an experimental marine resource management unit was established at Pos'et Bay to initiate wide-ranging attempts to restore the weakened populations of bottom-dwelling invertebrates. The long-term program on the reproduction of the scallop required the solution of such problems as the suitability of different regions of Pos'et Bay for the cultivation of mollusks, an evaluation of the effects of the main environmental factors on the rate of growth of scallops (in particular the temperature at which growth occurs) and the determination of the optimal density of planting in suspended enclosures for the rearing of this year's brood. This paper deals with solution of those problems.

# Studies to determine whether the condition of fish from the lower Mackenzie River is related to hydrocarbon exposure

by W.L. Lockhart, et al. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1989. vii, 84 p. : ill., maps. Bibliogr. (Environmental studies ; no. 61) ISBN 0-662-16849-6 MICROLOG 90-00391 1 fiche

Investigation conducted in response to complaints from northern people, principally residents of Fort Good Hope, that the quality of fish from the Mackenzie River had deteriorated. Since the incidence of these complaints was coincident with operations to expand oil production at Norman Wells, the investigation focused on the question of whether pollution from Norman Wells (oil) could be responsible for the deterioration. Whitefish and burbot were collected in October 1985 from Arctic Red River, Fort Good Hope, Fort Simpson and Fort Franklin. Other collections of fish relevant to the study were made at Fort Good Hope in November 1983; March 1984; April 1985; and September 1986; at Great Slave Lake in April 1986; at Lake Winnipeg in February 1986; and at Fort McPherson in October 1986. A further collection of burbot was made at Fort Simpson in April 1986. Livers of the fish collected were analyzed in the laboratory and judged by inhabitants of the areas as edible or not. Samples of other body organs were also taken for analyses for parasites and diseases.

# A Study of a simplified theory of gravity concentration in coal jigs

by R.P. Charbonnier. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1958. ii, 10 p. Bibliogr. (Report, TM 115/58-PREP) *Notes on the theory (i, 10 p.) laid in. Presented at the Coal Division Session of the annual Meeting of the Canadian Institute of Mining and Metallurgy.* MICROLOG 90-04542 1 fiche

To obtain a proper understanding of the operation of jigs or other processes of mineral concentration using gravity separation, it is advisable to analyse the motions, in various media, of particles of different specific gravities and dimensions. This paper deals with the motion of coal or rock particles in water or media of similar density and viscosity under the conditions usually obtained in coal jigs. These conditions are characterized by low fluid velocities, intermediate temperatures and viscosities, and low proportions of very fine particles.

# A Study of aquatic conditions in Lake Echo during 1984

by P.R. Hinch and J.K. Underwood. Halifax : Dept. of the Environment, 1989. iv, 80 p. : ill. MICROLOG 90-04597 1 fiche

Beginning in 1984 and continuing to 1987, summer residents of Lake Echo expressed concern about the drinking and swimming water quality, increased vegetation, and fish kills. In response to this concern, a study was begun to delineate potential sources of nutrient input into the lake which could stimulate or accelerate lily growth; design a 4-month sampling program for the assessment of chemical and bacteriological water quality, and

measure the water flow above and below 2 bridges of Highway 107 which were built in 1987 and which were thought to have caused rising lake levels and flooding. This report presents the results of that study.

#### A Study of asphaltene flocculation in heavy oil and asphalt solutions

by B.J. Fuhr...et al. Calgary, Alta. : Chemex Labs, 1989. iv, 40 p. : ill. Bibliogr. CANMET contract: 79131-01-SQ. MICROLOG 90-03383 1 fiche

Two different experimental set-ups are described for determining the onset of asphaltene precipitation in heavy oil solutions. The first system, applicable to experiments under ambient conditions, employs a visible spectrophotometer with flow-through cell. The second, which must be used for experiments at pressures above atmospheric, employs a fiber optics probe which can operate in the visible and near infrared region. A number of heavy oil and asphalt systems were studied using these experimental techniques. This report compared the flocculation data of various heavy oils and residues from different sources, and correlated these results with known background of the samples, as well as determining the relative effects of dissolved CO<sub>2</sub> and propane on the flocculation of asphaltenes in a heavy oil.

#### A Study of Atlantic Canadian user reactions to inter-university electronic networks : summary report

by G. Gurd and J. Picot. Laval, Que. : Dept. of Communications, Canadian Workplace Automation Research Centre, Organizational Research Directorate, 1987. iv, 32 p. Bibliogr. ISBN 0-662-16186-6. MICROLOG 90-02337 1 fiche

Reports on an 8 month study which answered the following questions: What is the usefulness of distributed electronic mail networks to academic and administrative users in the post-secondary institutions of Atlantic Canada? What are the motivating factors and what are the barriers to network use? Will use of networks change the work habits for users in post-secondary institutions? Will use of networks alter the existing patterns of inter-organizational and intra-organizational communications between peers? What will be the cost implications of using networks in the future, on a longer-term, routine basis? And which network and electronic mail features should be recommended for post-secondary sector users in Atlantic Canada?

#### Study of fines migration in heavy oil reservoirs

by H.A. Nasr-El-Din, G. Coskuner and B.B. Maini. S.I. : Petroleum Recovery Institute, 1989. viii, 113 p. : ill. Bibliogr. CANMET contract: 89018-01-SQ. MICROLOG 90-03385 2 fiche

A review of the literature on fines migration in porous media was conducted and various factors which affect fines migration and their relative importance in heavy oil reservoirs were identified. A corrosion resistant linear core displacement apparatus for fines migration experiments was then built, capable of handling unconsolidated cores (approximately 4 cm x 15 cm), high pressures (up to 20 MPa), and high temperatures (up to 250°C). Representative core samples from 2 different heavy oil reservoirs in Alberta, selected from those with permeability damage problems, were analyzed to determine the type, amount, morphology and location of fines with respect to their pore systems. Various petrographic tests were conducted on each core sample, including XRD, and SEM analysis. A method for extraction of cores,

which minimizes the permeability damage in the extraction process, was developed. The effects of various parameters, including net confining pressure, velocity, permeability, wettability, viscosity and ionic strength of the injected fluid on permeability damage were examined.

#### Study of mining shock hazards

prepared for the Engineering and Inspection Branch ; by Bensted, Simpson and Associates Ltd. Vancouver, B.C. : The Corporation, 1989. ii, 128 p. : ill. Funded under the Canada-British Columbia Mineral Development Agreement. MICROLOG 90-00186 2 fiche

This study arose out of concern at present practices used at open pit mines which use electrically powered mobile equipment, powered through moveable step-down substations that are frequently relocated as the mining activities proceed. The use of larger equipment sizes has led to higher distribution voltages and concern with grounding faults and their effect upon the primary circuit of the moveable substation. To assess the extent of this problem, 4 mines were visited to conduct soil resistivity and ground impedance measurements; to obtain information on the electrical distribution systems to supply power to portable and mobile electrical equipment at these mines and the grounding methods used; to process the data gathered to determine the actual touch and step potential in the area of portable and mobile electrical equipment; to determine the appropriate soil resistivity models; and to review all field measurements and observations and the results of similar studies that are available in conjunction with available literature and codes including human tolerance of shocks.

#### A Study of Ontario Hydro's contribution to ozone levels in Ontario, phase I : literature review

by X. Lin. Toronto : Ontario Hydro, Research Division, 1989. 24 p. : maps. Bibliogr. (Report ; no. 89-235-K) MICROLOG 90-03518 1 fiche

A careful statistical analysis of long-term trends based on measurements indicates that mean levels of tropospheric ozone O<sub>3</sub>, an important oxidant, at mid-latitude in the northern hemisphere have increased by 20-100% over background values. Frequent occurrences of high O<sub>3</sub> concentration in rural areas in southeastern Canada have become of concern to the Canadian public. Ontario Hydro is an emitter of nitrogen oxides, a precursor of O<sub>3</sub>, and has initiated a study to address this problem. This report presents a general picture of the production of tropospheric O<sub>3</sub>; discusses the important nonlinear characteristics of O<sub>3</sub> production and their significance in regional O<sub>3</sub> budgets, along with Ontario Hydro's need for information on the issue; presents a critical review of the literature; and gives the advantages and disadvantages of the existing oxidant air quality models.

**A Study of the common mussel**

by L.B. Nysaether. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 75 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5384) *Originally published in Norwegian, by the Directorate of Fisheries at Bergen, Norway.* ISSN 0704-3716  
MICROLOG 90-01552 1 fiche

Common mussels from a commercial breeding facility were studied for one year to establish quality criteria, to determine changes in the quality of the mussels during the year, and to determine the storage life under various conditions. Seasonal variations were studied by determining the content of mantle waters; food content and chemical composition, content of total volatile nitrogen and pH, sensory quality (smell, appearance, consistency, taste and general impression); sensory freshness and survivability in dry storage; total number of live bacteria; number of coliform bacteria and number of fecal streptococci; and content of paralytic shellfish poison. The samples were taken once every 7 weeks. Qualitative changes for dry storage were studied by measurement of mortality; water loss and mantle water contents; content of total volatile nitrogen and ninhydrin reactive substance, pH; sensory quality; and total number of live bacteria. Storage temperatures were 3C and 10C for up to 19 days, with the mussels inspected every 3d or 4th day.

### A Study of the properties and sintering behaviour of certain nickel powders : progress report no. 4

by C.F. Dixon and H.M. Skelly. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1971. i, 21 p. : ill. Bibliogr. (Report ; PM-R 71-10)

MICROLOG 90-04514 1 fiche

Investigation of the sintering behaviour of 4 nickel powders and 2 series of blends of 3 of the powders. Compaction was carried out at 3 levels of pressure and sintering was done at 900C (1650F) for times of 1/2, 1 and 2 hours. The mechanical properties, density and porosity of the sintered compacts were determined and the microstructure of representative specimens was examined.

### A Study of the properties and sintering behaviour of certain nickel powders : progress report no. 5

by C.F. Dixon and H.M. Skelly. Ottawa : Canada Centre for Mineral and Energy Technology, Physical Metallurgy Research Laboratories, 1973. i, 17 p. : ill. Bibliogr. (Report ; PM-R 73-13)

MICROLOG 90-04664 1 fiche

Final report in a series describing the results of a study of the particle morphology and sintering behaviour of a variety of nickel powders and blends. Earlier reports dealt with the properties of the non-compacted powders and blends and their behaviour on compacting and sintering. This report investigates the sintering behaviour at 1100C (2012F) of 4 nickel powders and 2 series of blends using 3 levels of compacting pressure and 3 sintering times. Evaluation of the sintered compacts was carried out by transverse rupture and tensile testing, density and porosity determination, and microexamination.

### Study of the treatment of acidic seepages employing a combination of wetland ecology and microbiology

by M. Kalin. Toronto : Boojum Research Limited, 1989. iii, 59 p. : ill. Bibliogr. CANMET contract: 89264-01-SQ.

MICROLOG 90-02540 1 fiche

The promotion of wetlands is essential in providing a biological solution to the problem of acid mine drainage. Cattails constitute a great portion of these wetlands and contribute much to the accumulation of organic matter that is essential to the success of a biological polishing

system. The 1st part of this report examines the use of a foliar fertilizer to establish cattails. Two types of fertilizers were applied to a natural and a transplanted stand of cattails using 2 different dilutions. In the 2nd part of the report, the treatment of acid mine drainage (AMD) through the use of alkali generating microbes as an alternative to conventional lime treatment was examined. Organic matter, a source of fixed carbon for the alkali generating microbial ecosystem, was tested in 6 different types of AMD ranging in acidity from 2 mg/l to 900 mg/l (CaCO<sub>3</sub> equivalent), while sulphate concentrations ranged from 75-7300 mg/l. The 3d and 4th parts of the report discuss work in progress at Boojum Research Ltd. and at Dearborn Microbiology Laboratory.

### A Study of the unmet needs of off-reserve Indian and Metis elderly in Saskatchewan

researched by the Saskatchewan Senior Citizen's Provincial Council ; in consultation with off-reserve Indian and Metis elderly. Regina : The Council, 1988. x, 201 p. : ill., maps. Bibliogr.

MICROLOG 90-04336 3 fiche

Study to identify the unmet needs and concerns of Indian and Metis elderly in off-reserve settings in Saskatchewan; to understand how these needs differ from those of other seniors; and to promote an understanding of how the unique needs of the Indian and Metis elderly can be supported by culturally-appropriate policies, program design, and service delivery. 'Indian and Metis elderly' were defined as Status Indians, non-Status Indians, and Metis who are age 50 and older living in off-reserve locations. In southern Saskatchewan, the study focused on the urban native elderly in the centres of Regina, Saskatoon, Prince Albert, North Battleford, and Fort Qu'Appelle. In total, 412 interviews were obtained in these centres. A sample of 64 interviews was also obtained from 11 communities in the north. The study includes a profile of their educational, economic, and language skills and resources; their living arrangements; moving and migration histories and housing satisfaction; health; use of formal and informal care services; and transportation and activity patterns.

### Study on the mass-cultivation technique of feed

by S. Ito and S. Naoe. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1988. 22 p. : ill. (Canadian translation of fisheries and aquatic sciences ; no. 5359) *Originally published in Japanese, by the Aomori-Prefecture Fish Culture Centre, in Japan.* ISSN 0704-3716  
MICROLOG 90-01491 1 fiche

Since 1965, research studies related to the mass-culture of feed, fundamental in the artificial seed-collection of bivalves, have been in progress. Rearing tests of the free-swimming larvae of bivalves of 5 different species were conducted using feeds which are easily cultivated in large quantity and feed which can be easily obtained from the manufacturer. This paper examines the effectiveness of the feeds and their problems. Among the feed tested were seeds of Green, marine yeast, and adult Cho-se-n Ha-ma-gu-ri (*Meretrix lamarckii Deshayesi*). The larvae were put into a triangle-shaped flask or into a chloride-vinyl water tank filled with filtered sea water. During the period between the attachment and the benthic stage, a standard culture fluid was fed and the growth-yields were examined.

### A Study on the posterior suture tagging in Zuwai crab *Chionoecetes opilio*

by A. Yamasaki. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1989. 6 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5473) *Originally published in Japanese.* ISSN 0704-3716  
MICROLOG 90-00591 1 fiche

Paper on the use of a string anchor tag attached to the coxa of the 4th ambulatory leg sympodite at the suture of Zuwai crabs. The crabs used in the test were gathered in July 1985 by the bolch line fisheries off the Kyoto prefecture of Japan. Three immature females and 1 male were chosen, the crust widths were measured, and anchor tags were attached with a tag gun. The tagged crabs were then reared in a plastic tank during the period preceding ecdysis. The crabs were observed during ecdysis and the placement of the anchor tag was observed.

### Study on the several chemical tests for estimating the quality of canned product, II : on the canned sardine and masu-salmon

by H. Iida... et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1985. 28 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5167) *Originally published in Japanese, by Tokai-ku Suisan Kenkyu-jo in Japan.* ISSN 0704-3716  
MICROLOG 90-00075 1 fiche

In a previous paper, mackerel of various degrees of freshness were subjected to various chemical tests to evaluate the quality of the bottled and canned products. The results of this test indicated that freshness could be determined by the IMP ratio, ethanol content and the histidine-N ratio. This report gives the results of experiments conducted similarly using sardines and masu-salmon. The report also investigated the difference in the values obtained for the chemical tests due to the differing fish species. The results of analysis conducted on the various commercially available canned products using the methods discussed in the paper are also reported here.

### Study paper on wrongful interference with goods

Ralph L. Simmonds and George R. Stewart ; with the assistance of David P. Paciocco. Toronto : Ontario Law Reform Commission, 1989. xiii, 198 p. Bibliogr. *Bilingual executive summary (10, 12 p.) laid in.* ISBN 0-7729-6604-4  
MICROLOG 90-06083 3 fiche

Examines critically the remedies available to those persons whose goods, or whose interests in goods, have been wrongfully interfered with by some other person. The subject matter examined in this paper includes very old legal causes of action, such as the action of replevin, trespass to goods, and detinue. It also includes some relatively modern developments, such as the tort of conversion, the negligent causing of economic loss, and the tort of interference with a reversionary interest. JU ON PR

### A Study to achieve enhanced oil degradation based on composting the oil with a biomass product : final report

by M.M. Francis. S.I. : Nova Husky Research Corporation, 1989. iii, 85 p. : ill. Bibliogr. *CANMET contract: 89177-01-SQ.* MICROLOG 90-01338 1 fiche

A preliminary study was conducted with the objective of achieving enhanced oil degradation in a closed reactor vessel, based on composting the oil with a biomass product such as the heat-treated peat product, Oclansorb. Oily sludge was treated with permanganate to oxidize complex aromatic molecules, absorbed into the Oclansorb, mixed with bacterial culture and nutrients, and allowed to degrade in reactor systems. Microbial biomass rapidly increased in the reactors, generating heat. Heavy metals did not accumulate in the leachate and polynuclear aromatic hydrocarbon compounds did not accumulate in the leachate waters. Indications are that significant degradation rates were obtained in all cases. CA CM EN EV SC

### A Study to assess the impact of a 'pay the producer' method of payment upon Alberta's food processing industry : final report

commissioned by Alberta Agriculture and the Alberta Department of Economic Development and Trade. Edmonton : Peat Marwick Consulting Group, 1989. v, 90 p. : ill. MICROLOG 90-02293 2 fiche

This study assesses the impact that a change in the method of payment of the Crow Benefit would have upon Alberta's food processing industry. It has generally been perceived that the current method of payment under the Western Grain Transportation Act works to the disadvantage of Alberta's food processing industries by inhibiting opportunities and constraining the ability to access export markets. The study determined the impact which a change to a 'pay-the-producer' method would have upon Alberta's food processors and manufacturers. The report examines the impact of a change upon wheat processing, canola processing, meat processing, supply management, coarse grain, malt/brewer/distillers, and beans, peas and protein. Summary of current information on managing sugarbushes to keep them healthy, using concepts embodied in integrated pest management (IPM). The guide covers structure and development; tapping; abiotic and biotic disturbances; diebacks and declines; methods of field testing for sap sweetness; and a classification of insect and disease pests. • CA FO QU SC

#### Suggested microbiological water quality tests for developing countries and rural and isolated North American communities

by B.J. Dutka. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 18 p. Bibliogr. (NWRI contribution ; 89-153) MICROLOG 90-02452 1 fiche

In accordance with the goals of the United Nations water decade program, developing

countries are concentrating on the provision of adequate quantities of drinking water to their populations. Unfortunately, little attention is being given to protecting and monitoring water quality. To overcome these problems, simplified reliable microbiological water quality tests are required. Controlled studies on the use of A-1 Broth MPN test for fecal coliforms in raw and recreational waters and the Presence/Absence H<sub>2</sub>S paper strip test and coliphage count tests for predicting potential hazards in potable waters were carried out on 4 continents and in 9 countries. This report gives the results of those tests and discusses the need for such simple tests for water quality in developing countries. CA EV EX SC

#### Suggested modifications to the non-coal mine diesel standard, CSA M424.2

by E.D. Dainty. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. ii, 20 p. Bibliogr. (Report ; MRL 90-13(TR)) MICROLOG 90-06008 1 fiche

Requests and suggestions from labour, a provincial inspectorate and mine operators for amplification of Clause 5.4 of CSA Standard M424.2 for diesels in non-coal mines, resulted in the analysis and recommendations in this report. The first request was for the definition of relative emissions performance of devices incorporated into the exhaust systems of diesel machines. The second request was for amplification and definition of the on-site factors which could be used to reduce the maximum ventilation prescribed for a given vehicle according to the standard. This report outlines the analysis for the first request. • CA CM EV NR SC

#### Suite aux commentaires du public : élaboration de la Loi canadienne sur la protection de l'environnement

Ottawa : Environnement Canada, 1987. iv, 88 p. L'éd. anglaise (Development of the Canadian...) : 90-02437/1. MICROLOG 90-02438 1 fiche

L'objet de ce document est triple: décrire la nature et l'envergure de la consultation qui a mené à la rédaction de la Loi canadienne sur la protection de l'environnement; répondre aux suggestions et aux commentaires contenus dans plus de 300 mémoires présentés au sujet de l'Avant-projet de loi sur la protection de l'environnement; faire suite aux propositions formulées durant la réunion nationale de consultation au sujet de l'Avant-projet de loi sur la protection de l'environnement. • CA EV SC

#### Le Suivi donné au rapport sur les 'Orientations futures des soins de santé' : rapport d'étape

Saskatchewan. Ottawa : Secrétariat des conférences intergouvernementales canadiennes, 1989. 23, 23 p. Rapport déposé par la Saskatchewan à la Conférence des Premiers Ministres. Présenté au Colloque national sur la promotion de la santé et la prévention des maladies. Bilingue (A Progress report on follow-up...). MICROLOG 90-00037 1 fiche

Ce rapport met en lumière divers facteurs qui contribuent à accroître les pressions exercées sur les services et les coûts dans le système des soins de santé. Les principaux facteurs traités sont: le vieillissement de la population canadienne, l'évolution des besoins en matière de soins de santé, l'apparition de techniques nouvelles dans les soins de santé, les attentes de la population quant à l'accessibilité des services de santé, le manque de coordination de la population en ce qui a trait à la disponibilité, la formation et la répartition des professionnels de la santé, l'organisation et les

structures de remboursement, et les mécanismes fédéraux-provinciaux de financement face à l'innovation dans les services. Le rapport propose également de nouvelles orientations stratégiques pour le système de soins de santé.

Rat and Threepoint lakes are located on the Rat-Burntwood River system. These lakes are flooded in connection with hydro-electric development and the Churchill River diversion. Rat Lake is upstream while Threepoint Lake is downstream of the Notigi control dam. Concerns by native Indian bands affected by the hydro-electric development led to the initiation of ecological assessment. This report gives a baseline analysis and summary of data collected from Rat and Threepoint lakes in 1989, the 5th year of data collection.

### Summary of fish population data from Sipiwek and Cross Lakes, 1989

by D.J. Green. Winnipeg : Manitoba Natural Resources, Fisheries, 1990. viii, 72 p. : ill., maps. Bibliogr. (Manuscript report ; no. 90-06)  
MICROLOG 90-05069 1 fiche

Cross and Sipiwek Lakes are located on the Upper Nelson River system. Cross Lake is immediately downstream of Manitoba Hydro's Jenpeg Generating Station while Sipiwek Lake is just downstream of Cross Lake. In 1983 an ecological monitoring program was initiated to investigate and document the possible impact of hydro development of fish populations within the Churchill River diversion and Nelson River system. Cross and Sipiwek lakes were 2 of the 6 lakes chosen for annual sampling. This

report presents fish population data (fork length, weight, sex, state of maturity, aging structures) collected from Cross and Sipiwesk lakes in 1989.

#### Summary of marine tagging studies of Atlantic salmon *Salmo salar* L. in the Northwest Atlantic area

by D.G. Reddin and W.H. Lear. St. John's : Dept. of Fisheries and Oceans, Newfoundland Region, Science Branch, 1990. iv, 115 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1737) ISSN 0706-6457  
MICROLOG 90-05955 2 fiche

Between 1940 and 1977, numerous tagging studies on adult Atlantic salmon were carried out to learn more about the migration patterns and origins of stocks in the coastal waters of Newfoundland and Labrador and in the Labrador Sea. This paper provides a summary for each tagging site of the number of salmon tagged and recaptured. A brief description is given of the composition of stocks exploited by the Newfoundland and Labrador commercial fishery, the utilization of these stocks, and general migration patterns.

#### Summary of net plankton data and Secchi transparency data for the Nelson River and Rat-Burntwood lakes, 1987-89

by L. Janusz. Winnipeg : Manitoba Natural Resources, Fisheries, 1990. v, 64 p. : maps. Bibliogr. (Manuscript report ; no. 90-09)  
MICROLOG 90-06997 1 fiche

The Northern Flood Agreement was initiated to assess the impact of the Churchill River diversion on the fish ecology of the northern lakes. The 1987-89 data were compiled in conjunction with an ecological monitoring program under the auspices of Claim no. 18 of this Agreement, one aspect of which included the collection of phytoplankton samples from Rat, Threepoint, Cross, Sipiwesk, Split and Stephens lakes. This report identified the

locations where the net plankton samples were taken, summarized the settled volume measurements, and provided histograms of mean annual settled plankton volumes for each of the study lakes. The report provides only baseline information on the net plankton data of these lakes and is not concerned with the interpretation of results.

### Summary report no. 4 : silica

by R.K. Collings and P.R.A. Andrews. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1989. iv, 127 p. Bibliogr. (CANMET report ; no. 89-1E) ISSN 0707-5196 ISBN 0-660-55788-6  
 MICROLOG 90-05996 2 fiche

Silica of commercial interest occurs throughout the whole of Canada as vein and intrusive masses and as sand, sandstone and quartzite deposits, and silica mining operations are conducted in all provinces except P.E.I. Although Canada is self-sufficient in most of its requirements for silica, significant tonnages of high-quality sand for glass and foundry applications continue to be imported, chiefly by Ontario. Studies and research by CANMET have been mainly directed toward beneficiation of submitted samples by a wide variety of mineral processing techniques, and the evaluation of the resulting products for suitability as glass and foundry sand. This report summarizes 115 studies of silica samples undertaken from 1923-86. Reference is also made to R&D by other organizations, including provincial governments and private sector research laboratories.

### The Summer mortality syndrome and haemocytic neoplasia in blue mussels from British Columbia

by S.M. Bower. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1989. v, 65 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1703) ISSN 0706-6457  
 MICROLOG 90-01930 1 fiche

To identify the cause of the high summer mortalities in blue mussels over 4 cm in shell length, 2,000 mussels from 6 locations in B.C. were examined for haemocytic neoplasia, as well as other infectious diseases. The study consisted of 7 separate investigations - 3 field and 4 laboratory studies. The field studies monitored mortality and haemocytic neoplasia in mussels from Departure Bay that usually experience over 90% mortality each summer; examined the prevalence of haemocytic neoplasia in mussels from 3 locations that had undergone reciprocal transplants 6 months prior to examination, and periodically examined the prevalence of haemocytic neoplasia in mussels held in pearl nets at 5 localities over 10 months. The laboratory studies examined the effect of different temperatures and salinities on survival and prevalence of haemocytic neoplasia in mussels during the winter; the effect of temperature on survival and haemocytic neoplasia in small and large mussels during the summer; the infectivity of haemocytic neoplasia using syringe passage; and the DNA content of haemocytes from mussels with haemocytic neoplasia.

### The Summerside project : an AFBC boiler for high-sulphur coal and wood chips

by F.D. Friedrich. Ottawa : Canada Centre for Mineral and Energy Technology, Energy Research Laboratories, 1980. iv, 30 p. : ill. Bibliogr. (Report ; ERP/ERL 80-75(TR))  
 MICROLOG 90-04508 1 fiche

Fluidized-bed combustion (FBC) is generally viewed as the most promising technology by

which low-grade coal can be utilized with minimum environmental impact. Atlantic Canada has ample resources of high-ash, high-sulphur coal and represents an area where FBC technology could be advantageously applied. An FBC boiler demonstration was sponsored at Canadian Forces Base Summerside, Prince Edward Island. By means of a series of contracts, 2 competing teams of designers were engaged to prepare conceptual designs of a heating plant containing two 18,000 kg/h steam boilers. This report describes the design requirements, including fuel and limestone specifications, laid down for the project. A novel feature is that the boilers must accommodate wood chips as a supplementary fuel. Results are presented of pilot-scale test work carried out by one of the contractors using the design fuels and limestone. Finally, the salient features of the 2 conceptual boiler designs are reviewed.

#### **Sump studies V : ecological changes adjacent to sumps at exploratory wellsites in the Mackenzie Delta and Northern Yukon : a summary report**

by D.W. Smith and T.D.W. James. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1985. xiv, 53 p. : ill. Bibliogr. (Environmental studies ; no. 35) ISBN 0-662-14389-2 MICROLOG 90-04624 1 fiche

In northern Canada, drilling wastes are usually contained in below-ground sumps, infilled upon completion of drilling, and domed-over to compensate for subsidence. This report presents key results of surveys completed from 1977-81. The exploratory wellsites in the Mackenzie Delta were Ogrukang M-31, Siku E-21 and Parsons D-20 and the sites in the Yukon were Caribou N-25, N. Parkin D-61 and Peel H-71. Sites were surveyed to document changes in soil and vegetation on disposal of drilling wastes in sumps, identify causal agents of phytotoxicity in wastes and determine their fate after release of drilling fluids, and correlate vegetation changes to physical disturbance of terrain, abiotic and topographic variables of the site, and particularly to the possible toxicological characteristics of the drilling fluids. Information on site conditions, soils and vegetation prior to drilling was unavailable to all sites except Siku E-21, where baseline information was obtained before controlled spillage of drilling fluids as part of a test to determine whether surface disposal is an environmentally acceptable option.

#### Surface Crown Pillar Evaluation for Active and Abandoned Mines : proceedings of the international conference

M.C. B tournay, editor ; sponsored by CANMET, Ontario Ministry of Northern Development and Mines, and CIM. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1989. v, 216 p. : ill., maps. Bibliogr. (CANMET special publication ; SP89-5) ISBN 0-660-13355-5  
MICROLOG 90-01318 3 fiche

Over the last few years, surface crown pillar failures in active and abandoned mines gained the attention of the mining industry and civic officials. The interest and research generated by these occurrences led to the realization that the subject of surface crown pillars is diverse and complex, both in a geomechanical sense and a liability sense. The problems mine operators face do not go away with time and may even worsen, so that the subsequent encroachment by housing developments, schools, highways and railways may prove very risky. This conference provided a forum for the discussion of the short- and long-term behaviour of surface crown pillars, covering investigation of in situ conditions, design methods and consequences, and dealing with abandoned mines and cave-ins.

#### Surface environmental research at the Elliot Lake Laboratory : a compilation of papers

by Y.M. Boucher, N.K. Dave and T.P. Lim. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1989. ix, 72 p. Bibliogr. (Report ; MTL 89-79(LS))  
MICROLOG 90-00173 1 fiche

Increasing concern is being expressed on the environmental problem of uranium and base metal mine/mill tailings. In the early 70s mine/mill waste management research was initiated at the Elliot Lake mining research laboratory to study revegetation and reclamation of the tailings as a means of reducing the environmental impact. In more recent years, extensive biogeochemical and contaminant migration pathway research was undertaken to understand all processes leading to generation, migration and release of contaminants from the reactive tailings into the biosphere and hydrosphere. This compilation consists of abstracts of all extensive surface environmental research carried out by the Elliot Lake laboratory in reclamation/revegetation, microbiology, hydrogeochemistry, contaminant migration, biological pathways, and analytical instrumentation.

#### Surface freight transportation : alternatives into the 21st century

for Nova Scotia Dept. of Transportation and Communications. Halifax : Peat, Marwick, Stevenson and Kellogg, 1989. 2 v. Bibliogr. Contents: Vol. I : Final report -- vol. II : Technical appendices.  
MICROLOG 90-01894 3 fiche

This study was undertaken in response to growing concern over continued decreases in rail service and the long-term impact of this trend on the economy. The study determined if the current roles of the modes are

appropriate in light of established provincial and economic development goals and priorities; ascertained future supply and demand characteristics for surface modes within Nova Scotia for the movement of freight, given the existing policy directions of the provincial and federal governments and the continued priorities of the rail and road carriers; and determined if there is a more appropriate role for road and rail freight transportation modes in light of provincial goals and priorities and the steps that would be necessary to implement this role. The CN mainlines of Halifax-Moncton and Truro-North Sydney were the principal focus for future rail service and freight movements. A broad cross-section of business and industry (both shippers and carriers), labour, industrial development people, government officials and other interested parties were consulted.

#### Surface trawl catch data from the Lower Fraser River at Queens Reach during 1987 and 1988

by T.R. Whitehouse and C.D. Levings. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, West Vancouver Laboratory, 1989. iii, 53 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 768) ISSN 0706-6465  
MICROLOG 90-01434 1 fiche

Description of the results of a trawl sampling program carried out for 1 year on the Lower Fraser River. In September 1987, sampling was initiated immediately downstream from the Port Mann Bridge, at Queens Reach. Weekly sampling was maintained to the end of August 1988. Sampling assessed the temporal abundance and cross channel distribution of fish species present in the surface water of the Lower Fraser River. Subsamples were collected from the total catch to provide size and diet information on fish species captured. Marked fish (adipose fin clipped) were sampled to determine their hatchery of origin and downstream transit time.

Ce bulletin de recherche regroupe les comptes rendus des interventions archéologiques de faible envergure réalisées dans trois sites de la région du Québec au cours de 1988. Les points principaux d'intervention ont été la péninsule de Penouille, Petit-Gaspé, Grande-Grave et l'Anse-aux-Sauvages. Le contexte et la nature des travaux effectuées de même que les résultats obtenus y font l'objet d'une brève présentation.

#### Surveillance nationale de la pollution atmosphérique : extrait annuel, 1987

Ottawa : Environnement Canada, Conservation et protection, Protection de l'environnement, Direction du développement technologique et des services techniques, 1989. xx, 74 p.  
*Bilingue (National air pollution...)*.  
CSI 22142.003.  
MICROLOG 90-00285 1 fiche

Ce programme est un projet conjoint des gouvernements fédéral et provinciaux. Les données contenues dans le présent extrait ont été réunies par les organismes collaborateurs et compilées par Environnement Canada. En décembre 1987, les données étaient obtenues de 415 appareils d'échantillonnage répartis dans 59 villes. Les mesures portent sur le dioxyde de soufre, le monoxyde de carbone, le dioxyde d'azote, l'ozone, l'indice de souillure, les particules en suspension, le plomb, les retombées de poussières et l'indice de formation de sulfate. Ce document contient la compilation des données du réseau pour l'année selon les différents paramètres de pollution. Il inclut aussi une comparaison des données du réseau aux objectifs nationaux de la qualité de l'air.

#### Survey of day care centres in residential zones

Halifax : Halifax Development and Planning Dept., 1989. 25 p.  
MICROLOG 90-03406 1 fiche

In response to Council's request for staff to assess the impact of day care centres in residential zones, a survey of neighbours and day care operators was conducted during January 1989. A total of twenty-nine day care operators were surveyed and 640 questionnaires were sent to area residents. Nineteen operators responded to the survey, as did 33.4 percent of neighbours. This report summarizes survey results, and provides a complete analysis in appendices. It also includes copies of the survey form.

#### A Survey of dilute lakes on the south coast of insular Newfoundland in relation to natural and anthropogenic acidification

by D.A. Scruton and D.H. Taylor. St. John's : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1989. v, 58 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1711) ISSN 0706-6457  
MICROLOG 90-04323 1 fiche

Recent lake surveys in insular Newfoundland have confirmed the extreme susceptibility of the island's freshwaters to anthropogenic acidification but evidence of widespread acidification damage is lacking. The south coast receives the highest annual precipitation in the province, ranging from 1500 mm in the east to over 2000 mm in the west. This survey sampled lakes along the south coast from Port aux Basques to Swift Current, within major and minor river watersheds draining to the south. All lakes were located in remote, undisturbed areas removed from population centers and point sources of pollution, in geologically acid-sensitive terrain. A total of 116 lakes were sampled between July 18 and 24, 1983, 90 for the first time. Samples were analyzed for pH, alkalinity, and conductivity within 24h of collection, then analyzed for 17 separate parameters, while 8 additional parameters were calculated.

#### Survey of eastern hemlock for insects and pinewood nematode in New Brunswick and Nova Scotia

by L.P. Magasi, K.J. Harrison and J.E. Hurley. S.I. : Canadian Forestry Service - Maritimes, 1990. 4 p. (Technical note ; no. 240) ISSN 0820-8107  
MICROLOG 90-07100 1 fiche

Forestry Canada officials have been attempting to gain exemption for certain Canadian lumber species from the ban in Europe of non-kill-dried lumber, expected to come into effect in 1992. Lumber exempted would be that from species which appear not to pose a danger to

European forests, because they do not harbour sawyer beetles *Monochamus*. Hemlock is one of the export species which appear to be free of the beetles. This report describes a study conducted on the validity of the hypothesis that *Monochamus* does not regularly infest hemlock. The study determined the degree of association between sawyer beetles and hemlock and tested insect galleries and clear wood from logs and lumber for the presence of pinewood nematode at mill sites in the Maritime Provinces.

#### A Survey of moulting Canada geese on the Snowdrift and Thelon rivers, Northwest Territories, 1988

by K.J. McCormick, S.A. Alexander and J. Sirois. Ottawa : Canadian Wildlife Service, Western and Northern Region, 1988. v, 22 p. : fold. maps. Bibliogr. (Technical report series ; no. 82) ISSN 0831-6481 ISBN 0-662-17373-2  
MICROLOG 90-06287 1 fiche

In December 1986, the federal Northern Mineral Policy was released, dealing with access to land for mining exploration and development. The policy included a review of the Thelon Game Sanctuary to ensure that the lands it contained are necessary to achieve the conservation objectives for which it was established. In 1984, a compilation of 61 key migratory bird terrestrial habitat sites in the NWT was completed. Two of these sites are in the Thelon sanctuary, providing habitat for moulting Canada geese. A 3-year study was begun in 1988 to examine the distribution and abundance of moulting Canada geese along the Thelon and Snowdrift Rivers. This report presents the results from the first year of the survey. The study determined the distribution and abundance of moulting Canada geese on the rivers; evaluated the importance of key habitat sites along the Thelon River; and recorded ancillary information on other wildlife in the area.

#### A Survey of seedling debarking weevil damage in first and second year plantations in Nova Scotia

Truro, N.S. Dept. of Lands and Forests, 1988. 7 p. : ill. Bibliogr. (Forest research report ; no. 6)  
MICROLOG 90-02226 1 fiche

Recently, debarking weevils have caused varying levels of damage to newly established plantations in the Maritimes Region. Debarking weevils feed on the inner bark of stumps and slash as well as on newly planted seedlings. They are attracted to recent clearcuts by the odour of resins originating from freshly cut stumps and branches. This report summarizes the results of a survey conducted to obtain estimates of the level of debarking weevil damage in selected Nova Scotia plantations.

### A Survey to document the decline status of the sugar maple forest of Ontario, 1986

by W.D. McIveen, D.L. McLaughlin and R.W. Arnup. Toronto : Environment Ontario, Air Resources Branch, 1989. 78 p. : maps. ISBN 0-7729-6253-7. MICROLOG 90-04213 1 fiche

Forest decline has been reported historically, although its severity and extent has become more apparent in the last 10-15 years. In 1985, a province-wide study was initiated on the condition of Ontario's hardwood forest, particularly sugar maples. The study established a network of permanent observation plots and evaluated the trees for their decline status; developed a rating system to assess the condition of the trees; evaluated the assessment data and determined if regional differences were apparent in forest tree conditions. In total, 110 plots consisting of 100 trees greater than 10 cm at breast height were established and the initial evaluation was completed in July and August 1986. The trees were evaluated using a numerical decline index rating system which transformed qualitative assessments of tree condition into quantitative data which could be tested statistically. Additional data regarding gross soil characteristics, stand mensural characteristics, disease and insect activity and the frequency of tree stem defects was also collected.

### Survival rate of the Atlantic salmon embryos incubated in apparatus with closed circulation of water under a certain temperature range

by Y.N. Gorodilov and T.N. Svimonishvili. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 30 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5332) Originally published in Russian. ISSN 0704-3716. MICROLOG 90-02095 1 fiche

Paper analyzing the course of the embryology of salmon in relation to temperature and the absolute duration of the same stages at different temperatures of egg incubation.

Studies were conducted on the eggs of Atlantic salmon from the Kola and Neva Rivers in 1973-78. After fertilization and swelling, the eggs were placed in incubators in which constant temperatures from 1.0C - 11.6C were maintained. The water in the incubators was circulated with periodic replacement of part of the water and with the use of the same water during the entire period of incubation. The temperature and rate of flow were monitored every day during incubation, and if there were dead eggs, they were removed. The development of the embryos were monitored on the live eggs.

### Suspended sediment analysis for three P.E.I. streams using sediment rating curves

by D. Caissie and J. Conlon. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1989. v, 16 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1704) ISSN 0706-6457. MICROLOG 90-04048 1 fiche

The impact of high levels of inorganic sediment are not documented on aquatic life and, in particular, on salmonid fishes. Inorganic sediment, in high concentrations, can be a harmful pollutant during all freshwater stages of the salmonid life cycle. These sediments may be in suspension or they may form a deposit on the gravel bed. This study evaluated the suspended sediment characteristics of 3 river basins in Prince Edward Island, and selected and evaluated a sediment model to enable better prediction of sediment loads and their effect on salmonids. A sediment rating curve in the form of a mathematical relationship between stream discharge and suspended sediment concentration is developed for each river basin which is used to predict sediment concentration for days when only stream discharge data are available.

#### **Le Syndicalisme au Canada**

par J. Dewetere. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 30 p. Bibliogr. (Etude générale ; BP-203F) L'éd. anglaise (*Trade unionism in Canada*) sur la même fiche. ISBN 0-660-92708-X

MICROLOG 90-01887 1 fiche

Depuis l'avènement du mouvement syndical au Canada vers le début du 19e siècle jusqu'à nos jours, l'effectif syndical a augmenté par sauts et par bonds, et sa composition a changé beaucoup avec le temps. Le mouvement syndical a survécu à la participation du Canada à deux guerres mondiales et s'est adapté aux changements qui sont survenus sur la scène économique, politique et législative. Ce document examine la question du syndicalisme au Canada. La première section fait l'historique de la question, et la deuxième porte sur l'effectif syndical au fil des ans. Finalement, après une description des changements apportés à la nature des offres dans le cadre de la négociation collective, on jette un coup d'oeil sur l'avenir du mouvement syndical au pays.

# **Synthèse bibliographique sur les systèmes experts appliqués à l'entretien de l'infrastructure routière**

par B. Lefebvre et D. Ferrero. Montréal : Université de Montréal, Centre de recherche sur les transports, 1990. 35 p. Bibliogr. (Publication ; no. 686)  
MICROLOG 90-04329 1 fiche

Cette recherche bibliographique a pour objectif l'identification des principaux systèmes experts, en Europe, aux États-Unis et au Canada qui oeuvrent dans le domaine de la gestion et de l'entretien du réseau routier. Elle met en évidence les buts, motivations et principaux aspects méthodologiques. Les systèmes ont été regroupés en trois catégories: les prototypes opérationnels, en développement ou à l'état de projet. Ceux qui ont été retenus dans cette étude comme étant les plus significatifs et les plus avancés dans ce domaine sont: Sceptre, Overdrive et Paradigm; Erasme; Arc; Preserver et Rose, PMEX; PAMEX; et, Pavement Expert.

by A.C. Turnock. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1965. 9 p. : ill. Bibliogr. (Report ; MS 65-31) Presented to the Mineralogical Association of Canada.  
MICROLOG 90-04688 1 fiche

Crystalline materials were synthesized from reagent grade chemicals, and reacted in a quench furnace under controlled conditions of temperature and partial pressure of oxygen. The total pressure was one atmosphere for all experiments. Oxidations and reduction reactions between solids and vapour took place. Any changes in the bulk composition, caused by changes in the oxygen content, were determined from weight changes. At the completion of the heating time, the charge was lowered quickly to the cool end of the furnace, where it cooled to room temperature. The phases were identified by powder X-ray diffraction.

# **Syphon hydro research and development, 1984-89**

by J.B. FitzPatrick. Ottawa : Energy Mines and Resources Canada, Technology Branch, Hydraulic Energy ; Niagara Falls, Ont. : Acres International Limited, 1989. 16 p. : ill. Bibliogr.  
MICROLOG 90-00382 1 fiche

The use of syphons date back to 1500 BC when the Greeks and Romans used them to convey drinking water over high terrain. Modern day syphons consist of large installations for both water supply and irrigation schemes and, more recently, smaller installations for hydropower development. Acres International Ltd. participated in (or conducted) 6 syphon hydro studies, 2 in the US and 4 in Canada. These studies included the review and investigation of small syphon hydro installations to understand more fully the engineering design concept characteristics required to develop a site. One of the overall goals of the study is to achieve a generic design of installations, which would be an ideal alternative to using hydrocarbon-fueled power systems in small communities. Syphon hydro installations can be fully automated and operated unattended. This report summarizes the research work undertaken by Acres since 1984.

### Systèmes d'évaluation du rendement policier

par G.J. Carpenter. Ottawa : Collège canadien de police, 1989. 58 p. Bibliogr. (Rapport technique ; 89-1) ISBN 0-662-95557-9  
MICROLOG 90-01230 1 fiche

Cet article a pour but de discuter de questions qui doivent être traitées au cours de la plupart des études sur l'évaluation du rendement. Pour permettre de dresser un tableau complet d'une recherche de cette nature, on y présente les renseignements en deux parties. La première est intitulée 'Considérations préliminaires' et la seconde, 'Conception'. Dans toute organisation, les questions qui demandent d'être débattues commencent par présenter des problèmes. Ce document étudie quelques-unes de ces questions dont notamment: l'escalade des notes; l'ambiguïté des niveaux de description du comportement; le manque de variabilité dans les points obtenus à l'évaluation; le peu de rapport avec l'emploi; le manque de confiance dans le système, de la part de l'employé évalué; la validité discutable; le manque de discernement; et le manque de normes de rendement.

### Systemic insecticides for protecting northern spruce and pine seed trees

by W.H. Fogal and V.C. Plowman. Chalk River, Ont. : Canadian Forestry Service, Petawawa National Forestry Institute, 1989. v, 17 p. Bibliogr. (Information report ; PI-X-92) French ed. (*Insecticides systémiques...*) : 90-06801/1. ISSN 0706-1854 ISBN 0-662-17217-5  
MICROLOG 90-00256 1 fiche

The forestry sectors in Canada and the northern US need increasingly larger and genetically improved quantities of northern spruce and pine seed for reforestation. Some seed orchards have already begun to produce

limited quantities of high value, genetically improved seed. Seed orchards require long range programs of tree selection and progeny testing, but at the same time are subject to losses of cones and seeds to insects and other pests. Several systemic insecticides show promise for use against cone and seed insects. This report reviews the trials conducted to find systemic insecticides for control of insects that feed on cones, seeds, and foliage of spruce and pine seed trees. The report also discusses several factors that influence the assessment and efficacy of treatments, such as treatment timing and insect feeding behaviour, uptake, translocation, and metabolism of insecticides; losses of cones and seeds to factors other than insects; and size of the cone crop.

### Taking aim : the debate on zero inflation

Robert C. York, editor. Toronto : C.D. Howe Institute, 1990. vi, 263 p. Bibliogr. (Policy

study ; no. 10) ISSN 0832-7912 ISBN  
0-8806-256-7  
MICROLOG 90-06677 3 fiche

This document presents an in-depth assessment of the Bank of Canada's zero-inflation policy. It also is a critical peer review of the first study, entitled *Zero Inflation: The Goal of Price Stability*. In this study, the Institute established its position as being in favour of the current stance of Canadian monetary policy. A number of economic commentators, however, disagree with the Bank's policy. The Institute, therefore, convened a workshop in March 1990 to discuss the Bank's policy and the positions laid out by the authors of the study. In this document, a compilation of the papers presented at the workshop, critics of the Bank's zero-inflation policy state their case.

#### Taxe sur les produits et services : examen du rapport du Comité des finances de la Chambre des communes

par R. Domingue. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 9 p. (Etude générale ; BP-223F) L'éd. anglaise (*Goods and Services...review...*) sur la même fiche. ISBN 0-660-92877-9  
MICROLOG 90-05349 1 fiche

Le 8 août 1989, le ministère des Finances publiait un document technique longuement attendu au sujet de la taxe sur les produits et services (TPS). Il proposait de remplacer la taxe fédérale de vente (TFV) par une imposition de 9 p. 100 du type taxe à la valeur ajoutée, applicable à une vaste gamme de produits et services. Ce document porte sur cette question et fait l'examen du rapport du comité des finances de la chambre des communes.

#### Taxe sur les produits et services : notes explicatives du projet de loi C-62 adopté par la Chambre des communes le 10 avril 1990

Ottawa : Ministère des finances, 1990. xxvii, 292 p. L'éd. anglaise (*Goods and Services...explanatory...*) : 90-04986/3.  
MICROLOG 90-04988 4 fiche

Afin de mettre en oeuvre la taxe sur les produits et services (TPS), le projet de loi C-62 propose des modifications législatives à sept lois fédérales. Les principales modifications touchent la Loi sur la taxe d'accise dont les dispositions permettront d'imposer, de percevoir et d'appliquer la TPS. Les modifications dont les six autres lois font l'objet découlent de l'instauration de la TPS. Ce document se penche sur la question et fournit des notes explicatives.

**La Taxe sur les produits et services : commentaires sur le document de technique**

par M. Wrobel. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 30 p. Bibliogr. (Etude générale ; BP-212F) L'éd. anglaise (*The Goods and Services...comments...*) sur la même fiche. ISBN 0-660-92866-3  
MICROLOG 90-05359 1 fiche

Ce document traite de quelques questions liées à la TPS, telle que décrite dans le document technique publié par le ministre des Finances en août 1989. Il sera question des incidences de divers aspects que le Ministère juge désormais réglés, ainsi que d'autres aspects qui restent encore en suspens.

**La Taxe sur les produits et services : perspective provinciale**

par R. Domingue. Ottawa : Bibliothèque du Parlement, Service de recherche, 1989. 20 p. (Etude générale ; BP-210F) L'éd. anglaise (*The Goods and Services...provincial...*) sur la même fiche. ISBN 0-660-92864-7  
MICROLOG 90-05357 1 fiche

La réforme des taxes à la consommation est toujours difficile dans un régime politique fédéral, car le même système de taxation est généralement présent à plus d'un niveau de gouvernement. Ce document examine les préoccupations constitutionnelles, politiques et fiscales des provinces qui prélèvent des taxes sur les ventes au détail relativement au projet de taxe fédérale sur les produits et services.

**Taxonomic position of the genus *Neoheterobothrium* Price, 1943 Monogenea, *Diclidophoridae* in connection with the description of the new species *N. syaii* sp.n.**

by Y.L. Mamaev. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1987. 8 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5331) Originally published in Russian. ISSN 0704-3716  
MICROLOG 90-02096 1 fiche

The paper describes a new species *Neoheterobothrium syaii* sp.n. found on the righteye flounder in the Gulf of Mexico; gives a new, more precise diagnosis of the genus *Neoheterobothrium* Price, 1943 (as a member of the subfamily Choricotylinae); validates the erection of the new genus *Neodidophora* gen. n. (as a member of the subfamily *Diclidophorinae*) for the species *Diclidophora pugetensis* Robinson 1961 (syn. *Neoheterobothrium pugetensis*), and discusses the circumstances that have led to the confusion regarding the taxonomic position of the genus *Neoheterobothrium*.
